Philadelphia PA and Sydney Australia, 22 January 2021: Clinical stage cannabinoid company Botanix Pharmaceuticals Limited (ASX:BOT, "Botanix" or "the Company") is pleased to release its Quarterly Activities Report and Appendix 4C Quarterly Cash Flow report for the period ended 31 December 2020.

Clinical development

Antimicrobial platform: Phase 2a study completed and awaiting data

In November 2020, Botanix successfully completed a Pre-Investigational New Drug (Pre-IND) meeting with the US Food and Drug Administration's (FDA) Office of Infectious Diseases for the BTX 1801 synthetic cannabidiol antimicrobial product. The meeting provided Botanix with an opportunity to seek advice and clarification from the FDA on the development plan and data package required to initiate clinical studies for BTX 1801 in the US. In addition, Botanix gained feedback from the FDA on the drug development plan required for BTX 1801 to support a Fast-Track designation and New Drug Application (NDA) in light of its existing Qualified Infectious Disease Product (QIDP) designation. The FDA advised that the proposed drug development plan and data package presented were sufficient to initiate clinical development in the US and ultimately support an NDA submission. The FDA encouraged Botanix to request a Fast-Track designation for BTX 1801 following submission of an IND application.

In December 2020, all participants successfully completed the BTX 1801 antimicrobial Phase 2a clinical study and on track to announce data in 1Q CY2021. The double-blind, vehicle-controlled Phase 2a clinical study is designed to evaluate the safety and local tolerability of two formulations of BTX 1801 to decolonise *Staphylococcus aureus* ('Staph') and methicillin-resistant *Staphylococcus aureus* ('MRSA' or 'Golden Staph') from the nose of healthy adults. Volunteers underwent twice-daily treatments across a 5-day period. Following the clinical treatment period, Botanix commenced data collection to support database lock, data analysis and generation of top-line data.

In addition to the clinical development program for the prevention of post-surgical infections, Botanix is also actively exploring opportunities for its synthetic cannabidiol and cannabinoid analog

development assets. These include other bacterial infections, different routes of administration of the drug and new uses for cannabinoids with improved bioavailability and potency.

Dermatology program: BTX 1702 study poised to commence

The Company's BTX 1702 rosacea Phase 1b clinical study is poised to commence recruitment once travel and clinical trial conduct restrictions are eased across Australia and New Zealand. The 8-week randomised, double-blind, vehicle-controlled study will evaluate the safety and tolerability of BTX 1702 in patients with moderate to severe papulopustular rosacea. Botanix continues to monitor the situation closely and plans to begin recruitment for the BTX 1702 study in 1H CY2021.

Given the overlap in characteristics between rosacea and acne, the BTX 1702 study will provide supporting information for the BTX 1503 acne program. Following the successful End of Phase 2 meeting with the FDA, Botanix is reviewing the timetable for progression of the BTX 1503 Phase 3 study, pending the completion of the rosacea clinical study.

Corporate

During the quarter, Botanix had net cash outflows of A\$2.8m, with A\$2.2m invested in R&D activities. At the end of the quarter, Botanix held A\$19.2m in cash and remains in a strong financial position. During the quarter, the Company lodged an application for an R&D Tax Incentive refund of approximately A\$6.8m. If received, funds will be invested into product development. In addition, Botanix continues to assess opportunities and partnerships in the development of new products that can be rapidly brought to market for antimicrobial or dermatological applications.

Payments to related parties as detailed in Section 6.1 of the Appendix 4C relate to salaries, fees and superannuation (or equivalent) entitlements paid pursuant to agreements with Directors or associates.

About Botanix Pharmaceuticals

Botanix Pharmaceuticals Limited (ASX:BOT) is a clinical stage synthetic cannabinoid company based in Perth (Australia) and Philadelphia (USA) committed to the development of pharmaceutical products that are underpinned by science and supported by well-controlled randomised clinical trials. The Company has two separate cannabinoid development platforms, dermatology and antimicrobial products, both of which leverage the unique anti-inflammatory, immune modulating and antimicrobial properties of cannabinoids, particularly synthetic cannabidiol. Botanix has an exclusive license to use a proprietary drug delivery system (Permetrex™) for direct skin delivery of active pharmaceuticals in all skin diseases.

The Company is developing a pipeline of product candidates that leverages the antimicrobial properties of cannabinoids with the BTX 1801 Phase 2a study for the prevention of surgical site infections completed and awaiting data. For the dermatology platform, the Company has confirmed

a drug development plan for the BTX 1503 acne program to support registration and plans to initiate its Phase 1b rosacea study in 1H CY2021. To learn more please visit: <https://www.botanixpharma.com/>
