

QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDING 31 DECEMBER 2020

Triton Minerals Limited (ASX: TON) ("**Triton**" or "**the Company**") provides its activity report for the three-month period ending on the 31st December 2020 ("**the Quarter**").

During the quarter, the Company continued to progress its flagship Ancuabe Graphite Project ("**Ancuabe**" or "**the Project**") in north east Mozambique and the board remains focussed on completing financing and mobilisation to commence construction in 2021.

ANCUABE GRAPHITE PROJECT

Located within the established graphite region of Cabo Delgado in north eastern Mozambique, Ancuabe is closest to port of all East African graphite projects. The Ancuabe Project is the only large scale, large flake graphite project in the region and its high-purity, large flake graphite, commands a market price premium over smaller flake products.

Ancuabe graphite is suitable for all markets and ideally positioned to take advantage of the forecast rapid growth in electric vehicle production. Anode producers are reporting increased orders and prices responded in December 2020 with a 6.2 percent increase in the Benchmark Price Index, the largest increase since May 2018.

During the quarter, the Board reported progress on financing and mobilisation to commence construction at the Company's flagship Ancuabe Project. Representatives of Triton's largest shareholder, Jigao International Investment Development Co. Ltd (a subsidiary of Jinan Hi Tech) have engaged with a major Chinese state-owned construction company to assist Triton with discussions on mobilisation, bulk earthworks and financing.

Triton management were advised that the outcome of the meeting was that financing of mobilisation and bulk earthworks for the Ancuabe Project was at a very advanced stage, however, final approval remained subject to detailed terms being negotiated and further senior internal approvals in China.

Triton is aiming at becoming the next East African graphite producer, currently targeting production of 60,000 tonnes of high purity, large flake graphite concentrate per annum.

Late in 2019 a \$19.5 million investment by state-owned enterprise Jinan Hi Tech ("JHT") was completed to provide financing support for the early construction activities at Ancuabe. This investment brought JHT to become Triton's largest shareholder with a 34.01% interest.

The Company has signed binding offtake agreements with Tianshengda Graphite and Chenyang Graphite each for up to 16,000 tonnes of annual Ancuabe graphite concentration production, equating to over 50% of anticipated annual production from Ancuabe.

A Definitive Feasibility Study ("DFS") (ASX release 15 December 2017) completed by Triton confirms Ancuabe to be a high quality, long life, high margin graphite project and was underpinned by a Maiden JORC Compliant Ore Reserve of 24.9Mt at 6.2% TGC that supported the DFS evaluation period of 27 years.

MCC International Incorporation Limited has been awarded the Engineering, Procurement and Construction contract for the mineral processing facility and other infrastructure at Ancuabe.

CHANGE IN MANAGEMENT STRUCTURE

In December, Triton advised that Peter Canterbury will step down as Managing Director and Chief Executive Officer of Triton effective 31 January 2021, commencing a new senior executive role at the beginning of February 2021. Mr. Canterbury has agreed to continue as a Non-Executive Director to ensure a smooth transition as the Company looks to proceed into the construction phase of the Ancuabe Graphite Project in Mozambique.

Triton Chief Financial Officer, Mr. David Edwards, will assume the role of Interim Chief Executive Officer effective 1st February 2021.

Triton's Chairman Max Ji said:

"Peter has achieved significant milestones during his four years with Triton and has ideally positioned the Company reach the stage we are now at, to begin the construction of Ancuabe in 2021. The Board is pleased that Mr. Canterbury has agreed to continue as a Non-Executive Director of the Company, providing invaluable support as we transition into the next exciting chapter of the Ancuabe Project, with construction to commence in 2021."

CORPORATE INFORMATION

At 31 December 2020, the Company had 3,666 shareholders and 1,134,468,067 shares on issue. The top 20 shareholders held 58.7% of the issued ordinary shares.

At 31st December 2020, the Company had cash at bank of approximately \$2.3 million. The cash at bank excludes the cash backed construction guarantee of approximately \$2.6 million lodged with INAMI in November 2019.
