

Quarterly Activities Report – 31 December 2020

Calima Energy Limited

ABN: 17 117 227 086

ASX Code: CE1

Calima Energy Limited is an oil & gas company with more than 60,000 acres of drilling rights over the Montney Formation in British Columbia, the most active oil and gas play in Canada.

The principal activity of Calima is investing in oil and gas exploration and production projects. Calima's core assets are the lands that lie within the liquids rich gas sweet-spot of the Montney Formation in NE British Columbia, Canada and provide a prospective resource of 2.18 TCFE ⁽¹⁾ gas, and the Tommy Lakes facilities and infrastructure.

Calima Energy Limited (ASX: CE1) (Calima or the Company) is pleased to provide shareholders with the following summary of its activities during the December 2020 quarter. The Company has completed preliminary results with Canadian Discovery in further understanding the Middle and Upper Montney with beneficial results.

KEY ACTIVITIES AND HIGHLIGHTS

- A\$1.7 million cash as of 31 December 2020.
- The Canadian Discovery study of core and testing data was completed in the quarter confirming the presence of high productivity zones in the sections tested by the Calima-2 and Calima-3 wells. Core data from Calima-1 indicates a resource potential in the Lower Montney that is underdeveloped in the basin and currently not incorporated in the Company's resource statement, delivering future upside.
- Additional tankage was installed at the Paradise oil well to reduce production shut-in due to weather.
- The Tommy Lakes Facilities continues to be to be managed on care

and maintenance as planned, while increasing gas prices (currently C\$2.50) support the case for field development.

- Extensive evaluation of new opportunities to leverage of the companies resources, facilities and sector knowledge

RESOURCE TABLE¹

	Prospective Resource (2U)	Contingent Resource (2C)		
		Dev on hold	Dev Pending	Total Contingent
Natural Gas (MMCF)	1,680,391	639,208	248,904	888,113
Total Liquids (MBBL)	84,036	31,947	12,468	44,415
Total PJe	2,228	847	330	1,178
Total Tcfe	2.18	0.83	0.33	1.15

CAPITAL STRUCTURE AND FINANCIAL SNAPSHOT

ASX Code	CE1	Cash @ 31/12	A\$1.7 million
Share Price	0.7 cent	Net Rec/(creditors)	(A\$150,000)
Shares	2,207,124,112	Working Capital	A\$1.55 million
Market Cap	A\$15.5 million	Producing wells	1
Quarterly Prod	1,788 bo	Avg daily Production	20 BOD

¹ See Calima Energy ASX Announcement 14 July 2020. The Company is not aware of any new information or data that materially affects the information included in the referenced ASX announcements and confirms that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed.

OPERATIONS

Canadian Discovery Findings

During the quarter the Company announced that Canadian Discovery's findings concluded that

"Pressure and flow test results from the Upper Middle Montney in Calima-2 and the Upper Montney in Calima-3, in addition to core analysis from Calima-1, indicate the presence of high productivity Montney zones at the northern edge of the current Montney fairway. Regional mapping and the production history of analogue wells at Laprise and Birley Creek also point to Calima's wells becoming strong performers. While not tested, lower Montney intervals, based on core and log analysis from Calima-1, represent a potential resource that to date has been under-developed elsewhere in northeast BC.

As of November 2020, Calima holds approximately 26,000 ha (61,735 acres) of Montney rights, over half of which have been converted to leases, with expiry dates no earlier than June 2029. Combining this land base with the company's recent acquisition of infrastructure at Tommy Lakes, and receipt of approval to construct pipeline from its recent wells to that infrastructure, Calima is well positioned to build forward on its current Montney development."

Tommy Lakes Facilities

On 15 April 2020 the Company closed its acquisition of compression facilities, associated pipelines and infrastructure in the Tommy Lakes Field which lies immediately 20km's to the north of the Calima Lands. The Facilities provide cost-efficient access to North River Midstream pipeline and Jedney processing facility and access to regional markets via the major pipeline networks including NGTL, Alliance and T-North.

The Tommy Lake infrastructure continues to be maintained by Sproule and Associates with their local field operations staff. Winterization of camp facilities and preservation of assets has been successfully completed.

Paradise Well (100% WI)

The Paradise well (Official designation; Boundary 5-1-86-15 00/11-01-08615W6/0) is located 40 kilometres to the northeast of Fort St John and 250 km to the southeast of the Company's extensive Montney interests in northeast British Columbia. Total production days for the period was 86 days, resulting in 1,789 barrels of oil total (averaging ~21 barrels of oil per producing day).

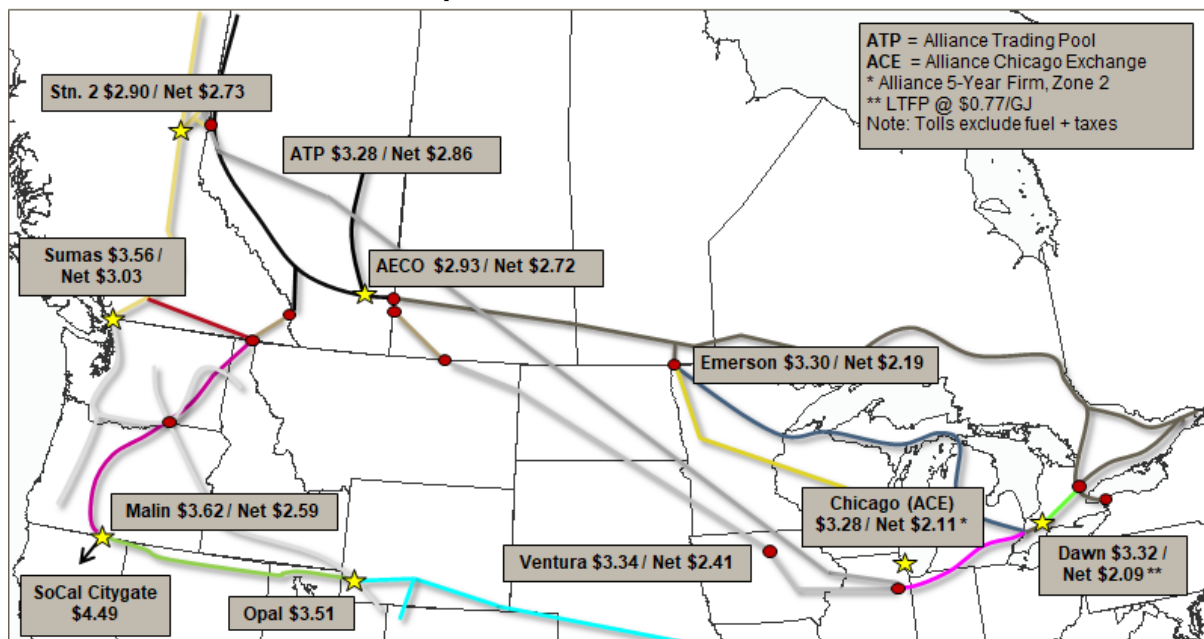

Calima completed the installation of additional oil storage during September which added 800bbl of oil storage on location will ensure a higher number of days on production. The additional storage capacity has already increased quarterly productive days by ~10% from the previous quarter.

Montney Regional Activity Update

- The most active Montney operators include Seven Gen (5 rigs), Ovintiv (3 rigs), and Tourmaline (3 rigs) while the most active Viking operators include Teine (3 rigs), Crescent Point (2 rigs), and Tamarack (1 rig).
- Paramount has committed to accelerate its 2021 development plans with C\$60 million of capital spending at its Karr and Wapiti assets. The additional spending will grow Montney production from the two assets for 2021.
- CNRL closed the C\$461 million purchase of Montney-focused Painted Pony on 6 October 2020. Painted Pony operated near CNRL's (and Calima's) core Montney shale acreage, providing synergies related to existing infrastructure and takeaway. CNRL holds 1 million net acres in the Montney, one of the largest positions in its peer group. The Painted Pony assets consist of 277,568 net acres in Northeast British Columbia and 5,120 net acres (5,760 gross) in Alberta.

- Advantage has brought forward a four-well Montney pad into December 2020 Quarter increasing its projected 2020 capex by C\$17 million (\$13 million) to a range of C\$147-162 million. The company is drilling the four wells in the Glacier area, with two each targeting the D4 Montney and Upper Montney intervals. Production from all 10 wells will be processed using existing capacity at Advantage's 400 MMcf/d Glacier gas plant, with payout expected within a year of their spud dates.
- Keyera Corp.'s Pipestone gas processing and liquids stabilization facility has commenced operations enabling Ovintiv to maximize its condensate-rich Montney production and grow its resource base in the area while optimizing midstream fees by routing production to gathering systems with lower line pressures. Ovintiv will use 170 MMcf/d and 19,000 bbl/d of the plant's 200 MMcf/d and 24,000 bbl/d capacity under a fee-for-service agreement. No new drilling is required to satisfy these capacity requirements. Ovintiv had Q2 net production of 1.22 Bcfe/d (24% liquids) from the Montney, where it drilled 12 net wells with an average of two active rigs, down from five in Q1. The company achieved a record completion rate of 3,450 ft/day on a recent four-well pad at Pipestone, 45% faster than its 2019 average. H1 D&C costs at Pipestone averaged \$480/ft, down 14% from 2019.
- Delphi Energy Corp. completed its restructuring on 16 Oct (eliminating C\$176 million of debt) and raising C\$22.9 million in new financing from Kiwetinohk Resources (who now hold 50% of Delphi).

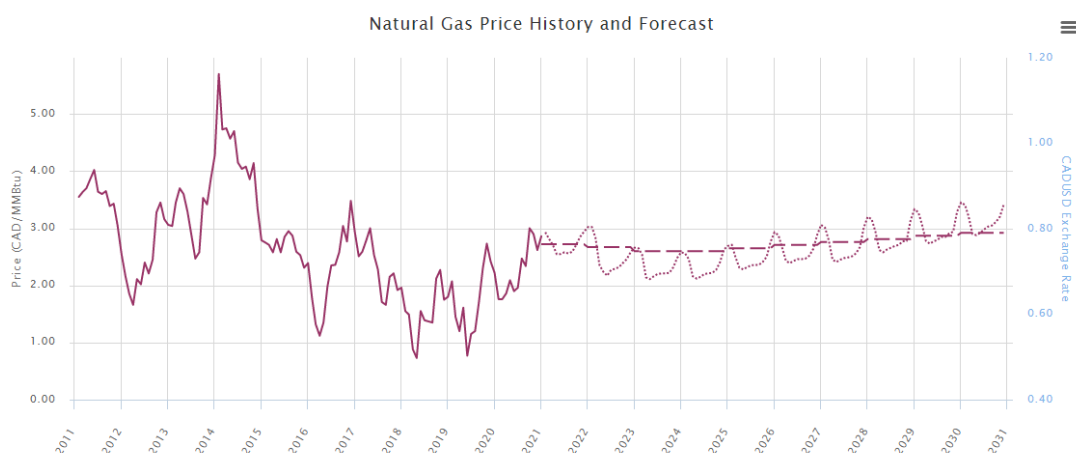

Canadian Oil and Gas Market Update

Source: Cormark 28/1/2021

Gas Pricing continue above C\$2.50

Natural gas futures have continued to be buoyant above C\$2.50 as detailed in the graph below. The outlook continues to be strong with futures pricing above C\$2/GJ out to December 2024. AECO is currently at C\$2.78/GJ.

Related Party Payments

During the quarter ended 31 December 2020, the Company made cash payments of \$11,660 to related parties and their associates in respect of fees GST, cost recoveries and rental of the Perth office. As previously advised all directors are being remunerated with shares until April 2021. On 14 October 2020 and 14 January 2021 the Company issued \$72,200 and \$59,000 worth of shares respectively to directors or their related parties. These payments relate to existing remuneration agreements with Directors.

Corporate

- 14 October 2020 the Company issued 20,963,981 shares to Directors and consultants reflecting consulting and directors fees of \$136,225.
- 14 January 2021 the Company issued 15,185,901 shares to Directors and consultants reflecting consulting and directors fees of \$116,052.

Forward Looking Statements

This release may contain forward-looking statements. These statements relate to the Company's expectations, beliefs, intentions or strategies regarding the future. These statements can be identified by the use of words like "anticipate", "believe", "intend", "estimate", "expect", "may", "plan", "project", "will", "should", "seek" and similar words or expressions containing same. These forward-looking statements reflect the Company's views and assumptions with respect to future events as of the date of this release and are subject to a variety of unpredictable risks, uncertainties, and other unknowns. Actual and future results and trends could differ materially from those set forth in such statements due to various factors, many of which are beyond our ability to control or predict. These include, but are not limited to, risks or uncertainties associated with the discovery and development of oil and natural gas reserves, cash flows and liquidity, business and financial strategy, budget, projections and operating results, oil and natural gas prices, amount, nature and timing of capital expenditures, including future development costs, availability and terms of capital and general economic and business conditions. Given these uncertainties, no one should place undue reliance on any forward-looking statements attributable to Calima, or any of its affiliates or persons acting on its behalf. Although every effort has been made to ensure this release sets forth a fair and accurate view, we do not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Qualified petroleum reserves and resources evaluator statement

The petroleum resources information in this announcement is based on, and fairly represents, information and supporting documentation in a report compiled by technical employees of McDaniel and Associates Ltd, a leading independent Canadian petroleum consulting firm registered with the Association of Professional Engineers and Geoscientists of Alberta, and was subsequently reviewed by Mr Mark Sofield who is a consultant (Havoc Services Pty Ltd) contracted to Calima Energy. Mr Sofield holds a BSc. Geology (Hons), is a Geologist with over 20 years of experience in petroleum geology, geophysics, prospect generation and evaluations, prospect and project level resource and risk estimation and is a member of the American Association of Petroleum Geologists. Mr Sofield has consented to the inclusion of the petroleum resources information in this announcement in the form and context in which it appears.

Oil and Gas Glossary

B or b	Prefix – Billions	BBL, BO, bbl or bo	Barrel of oil
MM or mm	Prefix – Millions	BOE or boe	Barrel of oil equivalent (1 bbl = 6 mscf)
M or m	Prefix – Thousands	CF or cf	Standard cubic feet
/ D	Suffix – per day	BCF or bcf	Billion cubic feet
G	Gas	O or o	Oil
Pj	Petajoule	E or e	Equivalent
EUR	Estimated Ultimate recovery	C	Contingent Resources – 1C/2C/3C – low/most likely/high
WI	Working Interest	NRI	Net Revenue Interest (after royalty)
PDP	Proved Developed Producing	1P	Proved reserves
PUD	Proved Undeveloped Producing	2P	Proved plus Probable reserves
IP24	The peak oil rate over 24 hrs	3P	Proved plus Probable plus Possible reserves

Appendix Two - Capital Structure

Securities on Issue as at 31 December 2020.:

- 2,191,938,208 fully paid ordinary shares (quoted)
- 19,450,000 performance rights
- 16,081,866 performance shares
- 10,000,000 options exercisable at \$0.09 on or before 25 August 2022
- 10,000,000 options exercisable at \$0.12 on or before 25 August 2022
- 750,000 options exercisable at \$0.07 on or before 6 November 2021

In relation to the Performance rights:

- a) No performance rights were issued during the period.
- b) The Performance Rights will vest, subject to completion of a minimum of 18 months' continuous service, on satisfaction of at least two of the following three conditions:
 - The VWAP for Calima shares for any period of 30 consecutive trading days being above \$0.15;
 - Calima raising more than \$5 million (excluding the Public Offer) at an average price of \$0.15; and
 - Calima's market capitalisation exceeding \$50 million (based on the VWAP for Calima shares for any period of 30 consecutive trading days).
- c) No performance rights were converted or redeemed during the period.
- d) The milestone for the performance rights was not met during the period.

In relation to the Performance Shares:

- a) No Performance Shares were issued during the period.
- b) Class A and Class C Performance Shares will vest and convert on a one for one basis into a share on achievement of either of the following milestones:
 - Class A – Milestone A
 - any of Calima's Production Sharing Contracts with the SADR Government (or a replacement title) commencing and taking effect in accordance with the applicable Assurance Agreement with the SADR Government; or
 - the Company selling all or part of Calima's Production Sharing Contracts with the SADR Government (or a replacement title) for an amount greater than A\$0.132 million.
 - Class C – Milestone C
 - spudding of an exploration well in any Offshore Comoros Blocks licensed by Bahari; or
 - the Company selling the Bahari Shares for an amount greater than A\$1.32m.
- c) No Milestones for the performance shares were met during the period.

Appendix Three - Notes to accompany Resources Tables

(1) Natural Gas Liquids refers to the product recovered after processing. Approximately 10 bbl/MMcf of the product recovered after processing is also condensate (C5) see also Note 2.

(2) Sum of Condensate and Natural Gas Liquids. Based on Company drilling results public domain data and the results of wells drilled on adjacent land McDaniel estimate that the average condensate to gas ratio for wells in the Calima Lands would be 22.5 bbl/MMcf (wellhead condensate/gas ratio) for the Middle Montney and 17.5bbl/MMcf for the Upper Montney. Additional liquids 25bbl/MMCF would be stripped from the gas upon processing comprising 6 bbl/MMcf of C3, 9 bbl/MMcf of C4, and 10 bbl/MMcf of C5+ (Condensate).

(3) Barrels of Oil Equivalent based on 6:1 for Natural Gas, 1:1 for Condensate and C5+, 1:1 for Ethane, 1:1 for Propane, 1:1 for Butanes. BOE's may be misleading, particularly if used in isolation. A BOE conversion ratio of 6 Mcf:1 bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

(4) Contingent Resources (2C) - Those quantities of petroleum estimated, as of a given date, to be potentially recoverable from known accumulations by application of development projects, but which are not currently considered to be commercially recoverable owing to one or more contingencies. Contingencies may include factors such as economic, legal, environmental, political, and regulatory matters, or a lack of markets. Contingent resources are further categorized in accordance with the level of certainty associated with the estimates and may be sub-classified based on project maturity and/or characterized by the economic status. The Contingent Resources (2C) in Tommy Lakes have been sub-classified as a "Development on Hold" and "Development Pending" as the accumulation is well defined and does represent a viable drilling target. The Contingent Resources have been classified using a deterministic method of estimation having an evaluation date of 31 March 2020.

(5) Prospective resources (2U) are the estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) related to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbon. The Prospective Resources (2U) in Tommy Lakes have been sub-classified as a "Prospect" as the accumulation is well defined and does represent a viable drilling target. The prospective resources have also been classified using a deterministic method having an evaluation date of 31 March 2020.

(6) Pre-Development – A pre-development study is an intermediate step in the development of a project scenario. The amount of information that is available for the reservoir of interest is greater than for a conceptual study. In particular, the petroleum initially in place has been reasonably well defined and the remaining uncertainty lies largely in the recovery factor and the economic viability.

(7) The resources have been calculated on a reduced land position of 58,981 acres in which Calima Energy holds a 100% working interest. This includes 33,643 acres (49 sections) held under a 10-year Continuation Lease (valid to 2029) and the balance held leases that expiring in 2021/2.

8.4 Cash and cash equivalents at quarter end (item 4.6)	1,701
8.5 Unused finance facilities available at quarter end (item 7.5)	0
8.6 Total available funding (item 8.4 + item 8.5)	1,701
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	3
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer:	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer:	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: ..29/01/2021.....

Authorised by: ..The Board.....
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
