## Void Forms

*CYP Melbourne Metro*

Design and supply 7m diameter circular void formers to seven locations on the project. Extremely complex build and stripping methodology to safely install and remove with limited crange and access.

## Travelling Platform

*Sun-Metals Zinc Refinery*

Re-usable travelling platform - 260m long and 36m wide. Eliminated 80% of the gear and labour by making a small section of falsework 20m long and 20m high, travelling on electric drive motors to each concrete pour.

## Wall Formwork on Wheels

*CYP Melbourne Metro CBD South*

Used for top-down shaft lining walls where there is no crane and extremely large formwork pressures. Formwork was designed as 3m modules and placed on castor wheels which allowed them to move the formwork by hand between concrete pours.
