

Element 25 Limited

Investor Update – Commissioning for Growth

Growing a world class Zero Carbon Manganese™ business

Investor Presentation – March 2021

Introduction

Disclaimer

This presentation contains only a brief overview of Element 25 Limited and its associated entities ("Element 25") and their respective activities and operations. The contents of this presentation, including matters relating to the geology of Element 25's projects, may rely on various assumptions and subjective interpretations which it is not possible to detail in this presentation and which have not been subject to any independent verification.

This presentation contains a number of forward-looking statements. Known and unknown risks and uncertainties, and factors outside of Element 25's control, may cause the actual results, performance and achievements of Element 25 to differ materially from those expressed or implied in this presentation.

To the maximum extent permitted by law, Element 25 does not warrant the accuracy, currency or completeness of the information in this presentation, nor the future performance of Element 25, and will not be responsible for any loss or damage arising from the use of the information.

The information contained in this presentation is not a substitute for detailed investigation or analysis of any particular issue. Current and potential investors and shareholders should seek independent advice before making any investment decision in regard to Element 25 or its activities.

Overview

Developing the world class **Butcherbird Manganese Project** in Western Australia to produce high quality manganese concentrate and High Purity Manganese (HPM) products for traditional and new energy markets.

Financial Information	
ASX Ticker	E25
Shares on Issue	133M
Share Price	\$2.44
Debt	Nil

- Australia's largest onshore manganese deposit.
- >260 Mt of manganese ore in JORC resources¹.
- Reserve containing 5.22 Mt of manganese².
- 100% owned by Element 25 Limited.
- Located in WA, ranked #1 for mining investment³.
- Ethical, proven, sustainably regulated jurisdiction.
- Excellent infrastructure (highway and gas pipeline).
- Simple low-cost mining and processing.
- No blasting or dewatering required.
- Long mine life. Currently 42 years using only 20% of the global resource.
- Outstanding economics²

Not all manganese is created equal...

Serving the Old...

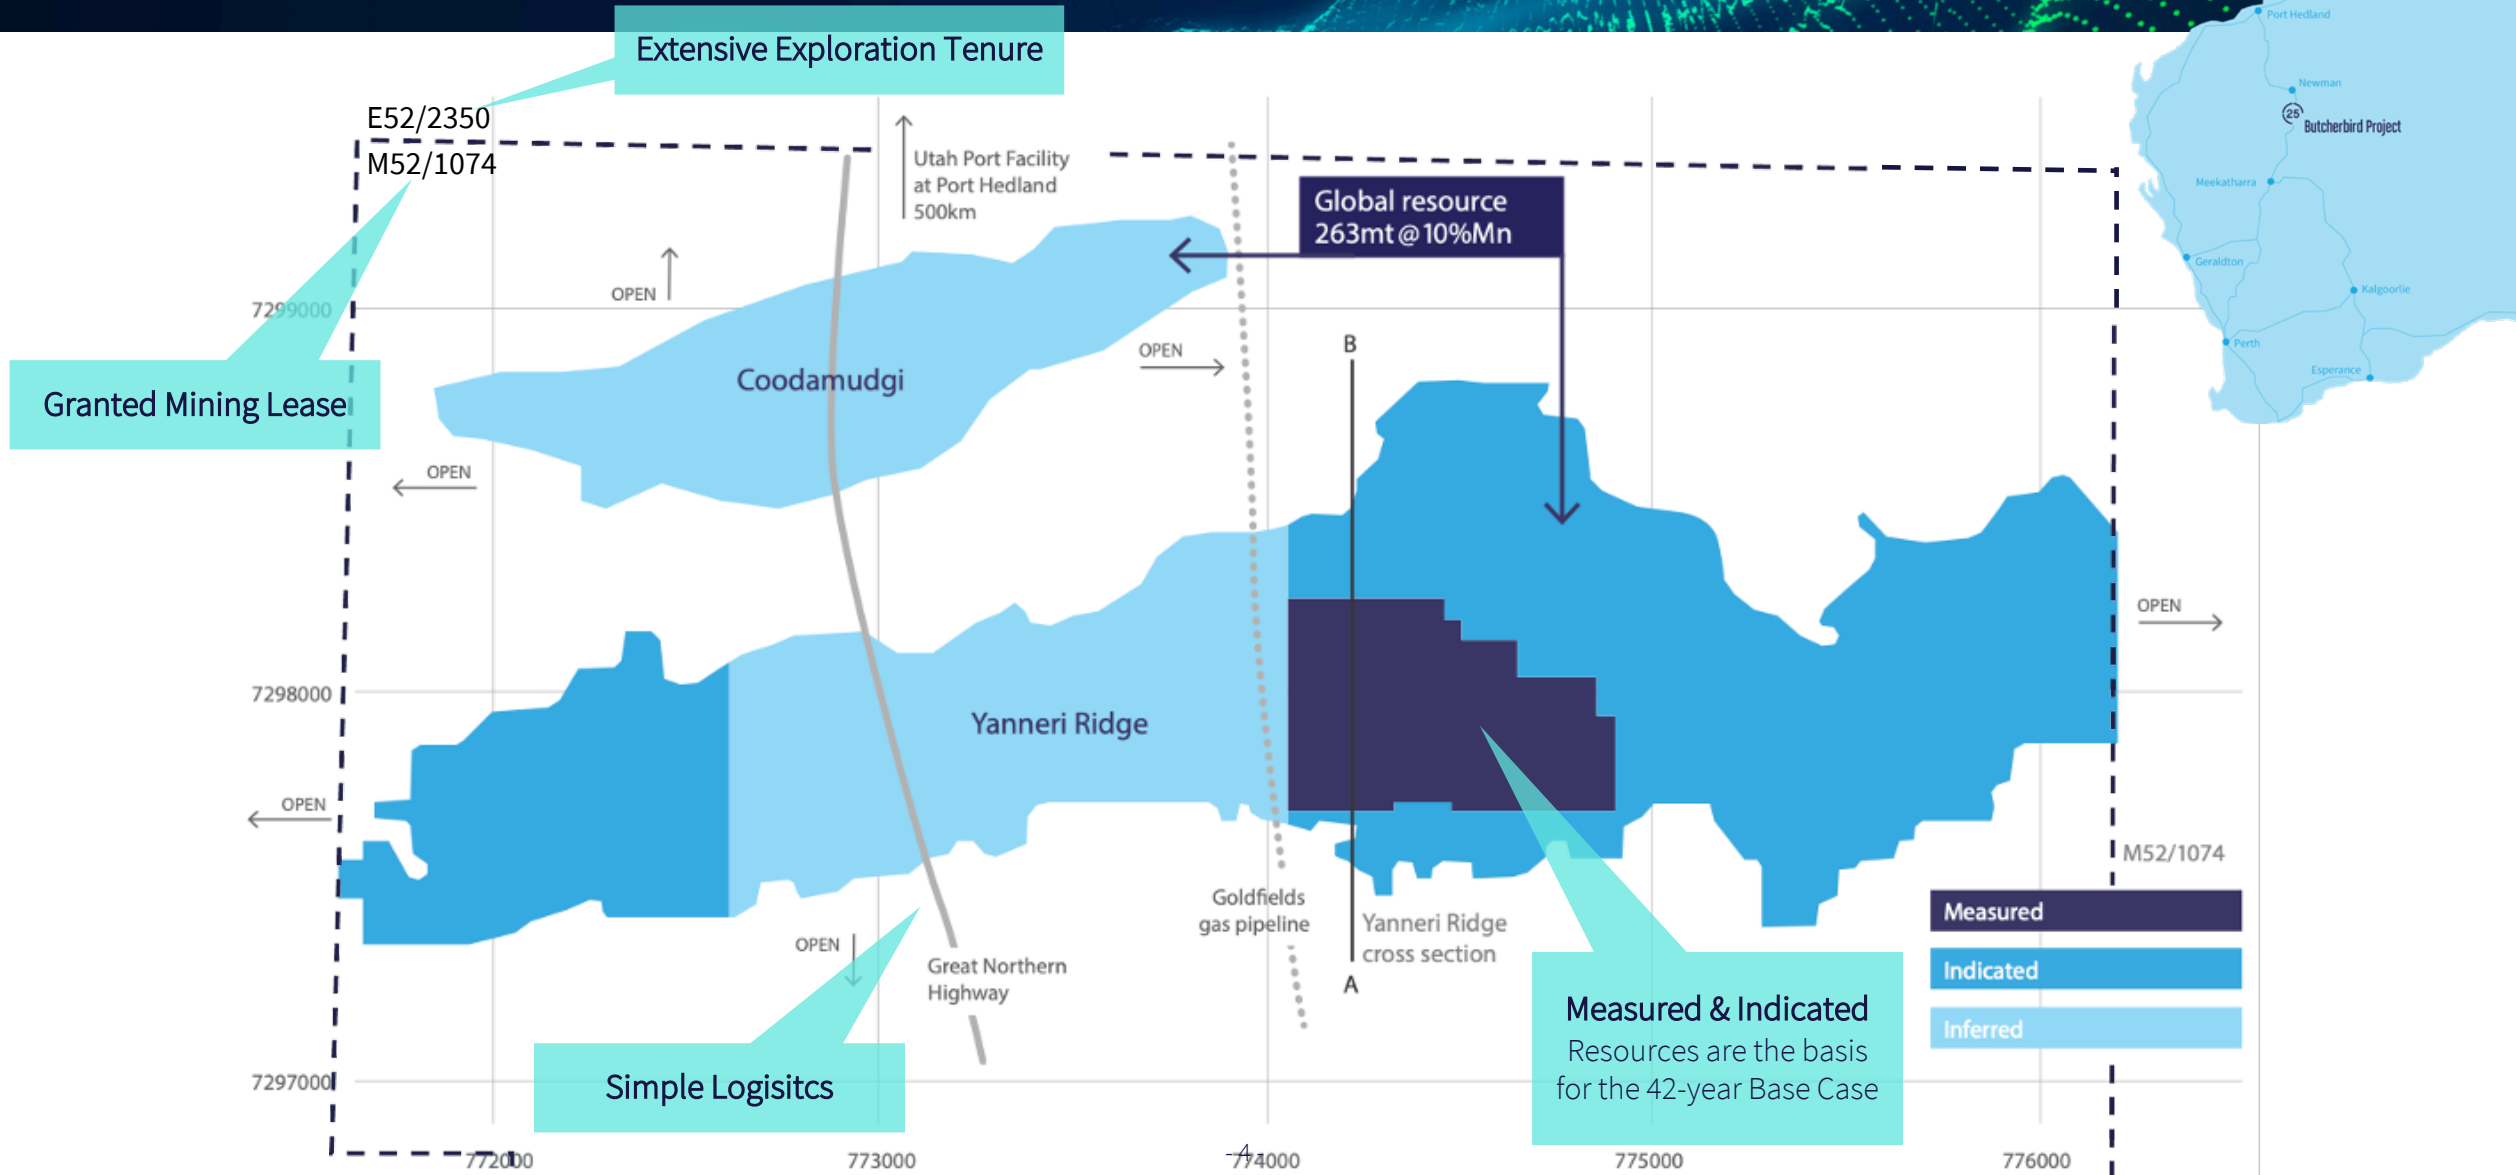

- Manganese (**Mn**) is the fourth most used metal on earth in terms of tonnage.
- Used in steel, specialty alloys and aluminium products.
- Traditionally the market has been dominated by the steel and alkaline battery industries.
- There is no substitute for manganese in steel.
- **E25 manganese concentrate and EMM feed this market.**

And the New...

- The electrification of the global vehicle fleet requires vast amounts of cathode materials.
- Nickel and cobalt supplies cannot meet the demand for projected NEV growth.
- Batteries are trending toward higher manganese content for safer, more cost-effective solutions.
- **E25 high purity manganese will feed these markets.**

Great infrastructure endowment, fully permitted.

Very simple geology equals low-cost manganese...

- Ore from surface
- Above the water table
- Strip ratio ~0.3:1
- Free digging (no blasting)

Stage 1: Project Delivery on time and budget

Mining Lease granted

Access agreements finalised

Processing water confirmed

Engineering design completed

Fully funded

Fully permitted

Construction completed

Dry commissioning completed

Wet commissioning has commenced!

Maiden product shipment imminent.

Low capex Stage 1 provides a springboard for rapid growth...

Low capex Stage 1 provides a springboard for rapid growth...

- Low capex.
- Rapid startup.
- Establish cashflow.
- Fund High Purity Manganese (HPM) from strengthened balance sheet.

Mn²⁵

341,000 t/a

annual Production over
40 year mine life

\$583 million

NPV₅ pre-tax

387%

IRR pre-tax

**Only ten months from
announcing the PFS to
commissioning.**

\$20.3 million

capital cost including
working capital

0 months

payback period
no debt

March 2021

commissioning
scheduled

Stage 2 expansion turbocharging cashflows to fund HPM...

- Incremental capital required.
- Financing being secured now.
- Flowsheet process proven.
- Rapid deployment.
- Fund High Purity Manganese from strengthened balance sheet.

Mn²⁵

1,023,000 t/a

Annual Production over 40 year mine life

\$1.138 billion

NPV₅ pre-tax

359%

IRR pre-tax

Establish a globally significant low carbon manganese business in record time with minimal dilution.

\$20.3 million

Incremental capital cost including working capital

6 months

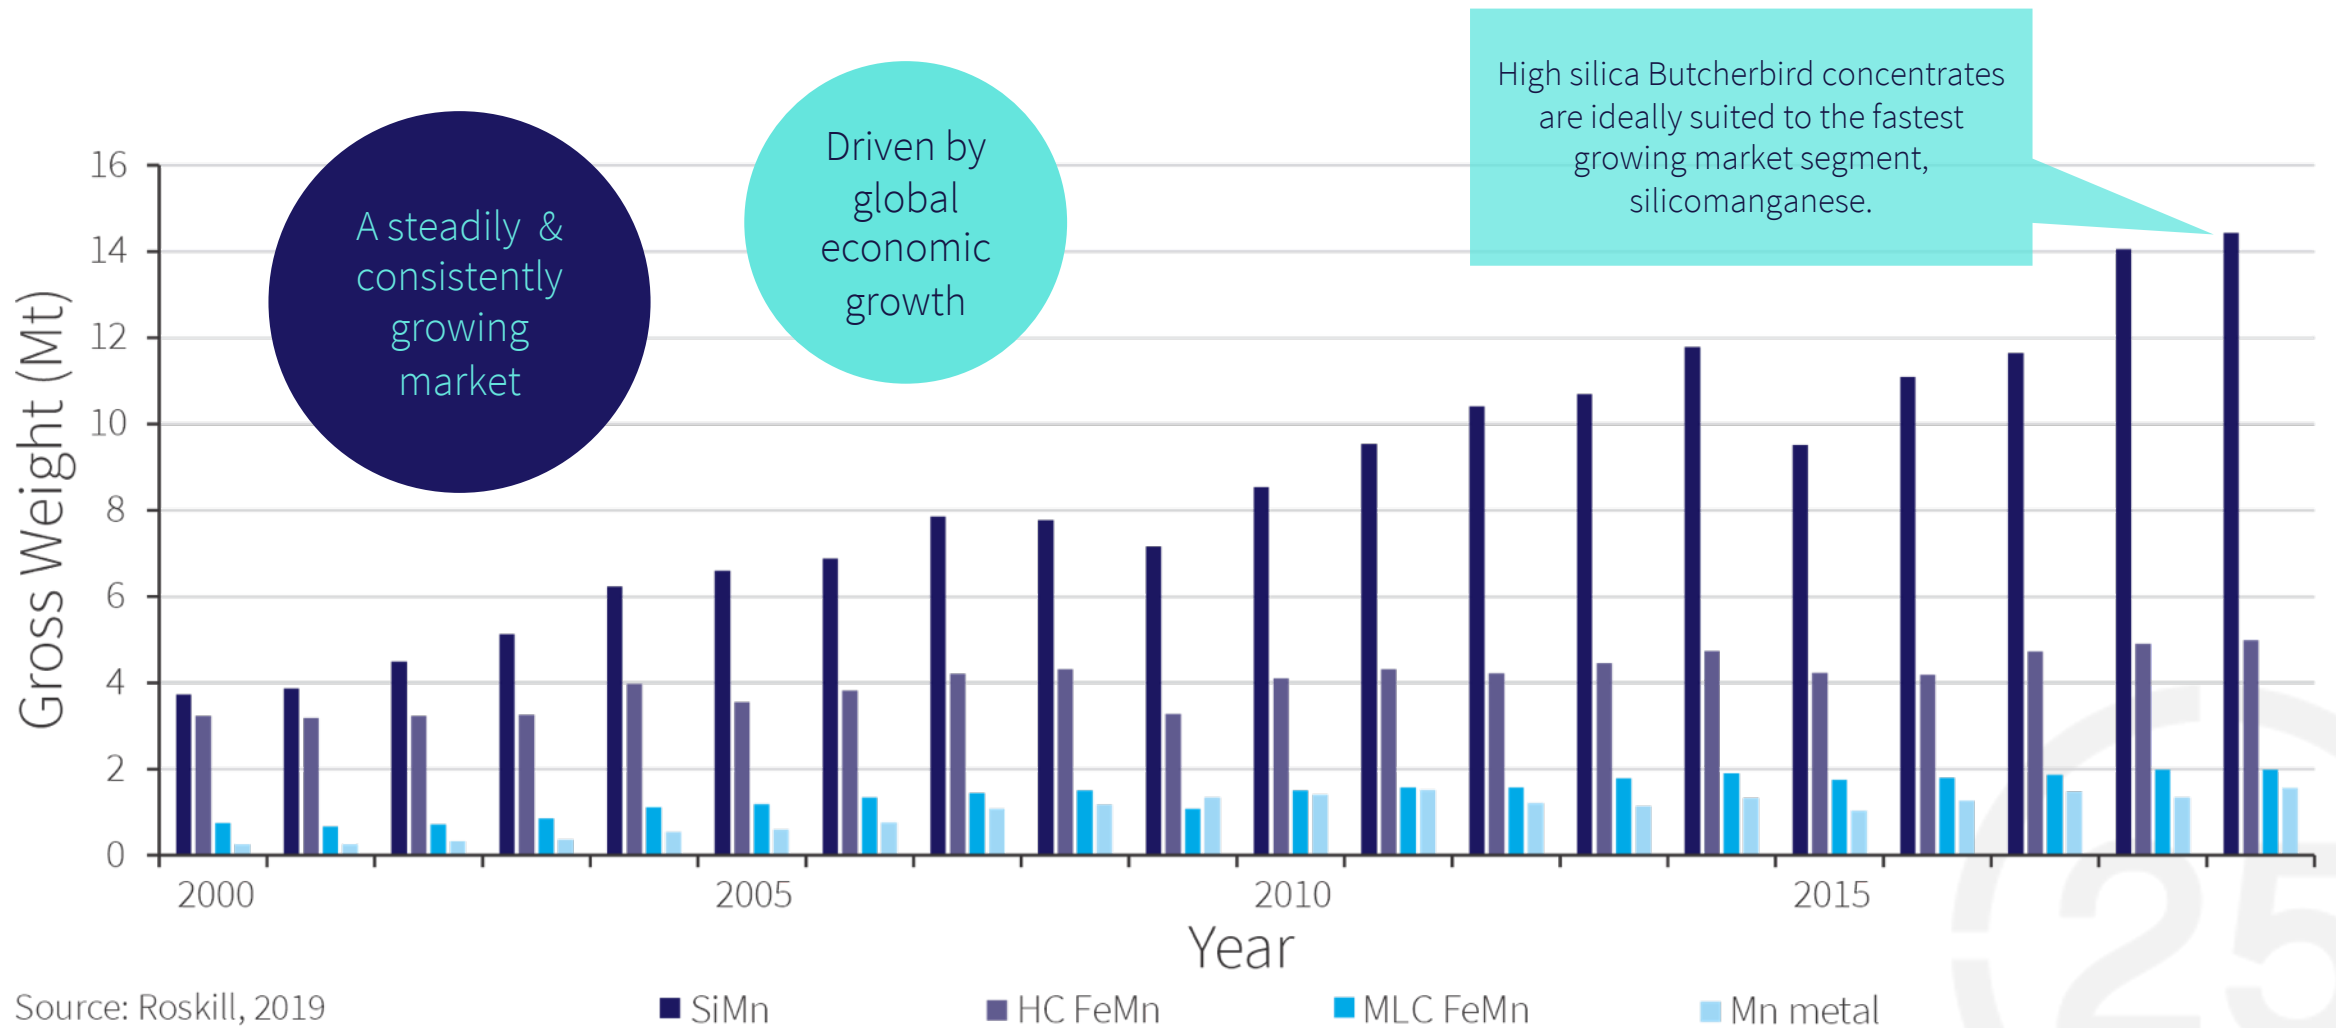

Payback period
Semeru Energy U\$5M debt

February 2022

Commissioning scheduled

“Old world” manganese demand continues to grow

New Energy Vehicle (NEV) Demand Growing MUCH Faster...

58% by 2040

percentage of new vehicles that will be EV or hybrid

54 million

EV passenger sales by 2040

from 2033

decline emissions from road transport

17.6M by 2040

barrels of oil displaced by EVs each day

“It is reasonably straight forward to do a cathode that is two-thirds nickel and one-third manganese...”

Elon Musk, Tesla

Li-ion battery market development for electric vehicles

SOURCE: Rocky Mountain Institute/BloombergNEF. Data is projected starting with 2020.

Global battery sector demand by capacity (GWh)

If not manganese, then what?

58% by 2040

percentage of new vehicles that will be EV or hybrid

54 million

EV passenger sales by 2040

from 2033

decline emissions from road transport

17.6M by 2040

barrels of oil displaced by EVs each day

“In order to save battery costs, VW wants to use nickel and manganese for the cells in the volume segment and, if possible, do without the – more expensive – cobalt...”

- Manganese (Mn) is the fourth most utilised metal globally.
- It is the cheapest, most abundant of the NMC cathode materials (Ni,Mn,C).
- Nickel and cobalt have supply constraints, manganese does not.
- For cobalt, there are serious ethical concerns around production methods.
- Manganese is perfectly placed to provide the material needed to satisfy the worlds hunger to electrify.
- **Battery makers have manganese rich cathode designs in their roadmaps post 2025.**

Global mined cobalt output (Kt)

Class 1 Nickel Supply and Demand Outlook

If not manganese, then what?

- VW moving to a high manganese cathode for the majority of its vehicles.
- High manganese means better energy density and lower cost.
- Requires large volumes of high purity manganese sulphate.
- Element 25 is targeting this market for its long term growth strategy.
- Discussions underway in relation to potential offtake partners in this segment.

“Our transformation will be fast, it will be unprecedented...”

VW Group CEO Herbert Diess

Zero Carbon Manganese™ – a no brainer...

Supply-chain decarbonization will be a 'game changer' for the impact of corporate climate action.

Element 

Reserves and Resources

Maiden Ore Reserve¹

Category	Tonnes (Mt)	Mn (%)	Contained Mn (Mt)
Proved	14.4	11.5	1.65
Probable	36.2	9.8	3.56
Total	50.6	10.3	5.22

Global Mineral Resource²

Category	Tonnes (Mt)	Mn (%)	Si (%)	Fe (%)	Al (%)
Measured	16	11.6	20.6	11.7	5.7
Indicated	41	10.0	20.9	11.0	5.8
Inferred	206	9.8	20.8	11.4	5.9
Total	263	10.0	20.8	11.4	5.9

- 89% conversion of measured and indicated resources to reserve.
- Maiden Reserve only exploits approximately 20% of global mineral resource.
- Excellent potential for future expansion.
- More drilling has potential to add to global resource.

Competent Person's Statement

The information in this presentation that relates to Exploration Results is based on information compiled by Mr Justin Brown who is a full-time employee of the Company and is a member of the Australasian Institute of Mining and Metallurgy. Justin Brown has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Justin Brown consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

All references to Mineral Resources pertain to the ASX release dated 17 April 2019. The Company confirms that all material assumptions, underpinning the estimations continue to apply and have not materially changed.

All references to Mineral Reserves pertain to the ASX release dated 19 May 2020. The Company confirms that all material assumptions, underpinning the estimations continue to apply and have not materially changed.

For further information on Element 25 Limited and its Projects please visit its website at www.element25.com.au which contains copies of all continuous disclosure documents to ASX, Competent Persons' Statements and Corporate Governance Statement and Policies.
