

MARCH 2021

QUARTERLY ACTIVITIES REPORT

HIGHLIGHTS

- *All DNRME statutory reporting and rental payments are up to date and in compliance*
- *The Company continued to pursue alternative opportunities to develop the Blackall Coal Resource during the quarter*
- *The Company continued to work on the preparation for a General Meeting of Shareholders set for May 2021.*

BLACKALL COAL PROJECT

The Blackall Project consists of three main coal resource areas within MDL464, EPC1398 and EPC1399. It is located immediately to the south of the township of Blackall in central western Queensland.

These permits host a combined **JORC Total Coal Resource Estimate of 3.44 billion tonnes** of thermal quality coal.^{Note 1}

The Company confirms that it is not aware of any new information or data that would materially affect the resources and all material assumptions and technical parameters underpinning the Resource estimates continue to apply and have not materially changed in the meantime.

With the reduced demand for new sources of thermal coal the company has minimised its expenditure and has carried out no field work during the quarter. Alternative strategies for development of the resource continue to be considered.

Statutory Compliance, Reporting and Development

All tenements remain in good standing with rents paid, statutory obligations complied with and the necessary government reports lodged on time.

There have been no other changes to tenements held. A tenement listing for the Group is provided at the end of this report.

ASX: EER

East Energy Resources is a coal exploration and development company primarily focused in the Eromanga Basin in Queensland.

EER has combined Total JORC Resources of 3.44Bt of Thermal Coal (627.5Mt Indicated and 2817Mt Inferred) located south west of the major deposits of GVK Hancock Coal and Waratah Coal in the Galilee Basin.

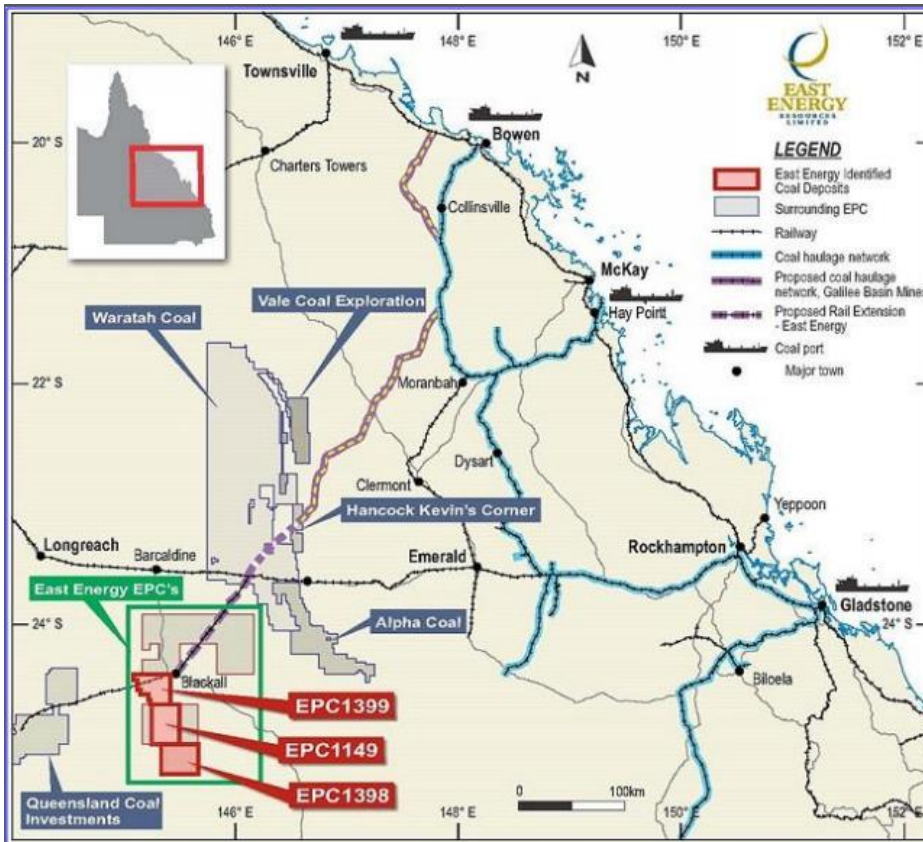

Figure 1: Blackall Project Location Map

During the quarter, the Company continued to assess the demand for thermal coal and the potential for further development of the coal resource within MDL 464 and the three EPCs covering the main body of the Blackall Coal Project.

The Board continues to monitor the progress of coal projects in the Galilee Basin and the proposed rail line for Adani's Carmichael Coal Mine, which will provide a crucial link for the future transport of coal from the Blackall Project.

CORPORATE

The Company continued discussions regarding potential strategic opportunities during the quarter, for investigation and assessment of any of these potential strategic opportunities including potential opportunities to develop the Blackall Coal project.

On 17 September 2020, the Company was placed into voluntary suspension on the ASX, which was extended during the quarter to 31 March 2021. The request was made by the Company, as it had been in discussions with its major shareholder to determine the outcome of a possible recapitalisation transaction and was in discussions and negotiations in respect of their controlling shareholding in the Company.

On 30 December 2020, the Company provided an update to the market and advised that Noble Netherlands BV, the owner of the Company's major shareholder, Maylion Pty Limited ("Maylion"), had entered into an agreement to sell all of its shares in Maylion to Axis Minerals Pty Ltd, an unrelated company. Maylion currently owns 2,990,419,558 ordinary shares in the capital of the Company. The shares are to be sold subject to a number of conditions precedent, including obtaining approval from the Company's shareholders.

On 9 April 2021, the Company provided a further update to the market and advised that a Notice of Meeting, including an Independent Expert's Report, would be dispatched prior to the end of April for a meeting in May, and therefore requested an extension to the voluntary suspension until 31 May 2021, which was granted by ASX.

The Company then dispatched its Notice of General Meeting materials (including an independent expert's report) to its shareholders on 20 April 2021. The Company is also continuing with discussions to determine the outcome of a possible recapitalisation transaction and the determination of the outcome in respect to Noble's controlling shareholding of EER.

There are no further developments to this situation at the time of this report.

Finance and Activities

During the quarter the Company undertook exploration activities including the assessment of the demand for thermal coal and the potential for further development of the coal resource within MDL 464 and the three EPCs covering the main body of the Blackall Coal Project, and some compliance activities with an associated cash outflow of approximately \$31,000.

There were no development or production activities.

As outlined in the attached Appendix 5B (section 6) during the quarter approximately \$76,000 in payments was made to related parties and their associates for director salaries, consultancy fees, superannuation and other related costs.

Strategic Opportunities

During the quarter, the Company continued to focus on reviewing new opportunities to enhance its project portfolio and increase the overall value proposition of EER and continued to review strategic options for development of the Blackall Project. The Company also continued to appraise the market outlook for thermal coal and monitor the rail and port infrastructure commitments by Galilee Basin projects and their impact on the potential development of the Blackall Project.

This Report has been authorised for release by the Board of Directors of East Energy Resources Ltd.

Competent Persons Statement – EPC 1399 Resources

The information in this report relating to estimates of Mineral Resources within EPC1399, is based on information compiled by Mr Peter Tighe who is a member of the Australian Institute of Mining and Metallurgy. Mr Tighe is a geological consultant to East Energy Resources Limited. Mr Tighe has had over 30 years' experience in exploration, mining and resource evaluation and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Tighe consents to the inclusion in the report of the matters based on the information, in the form and context in which it appears.

Competent Persons Statement – EPC 1398 Resources

The information in this announcement relating to the estimates of Mineral Resources within EPC 1398 is based on the 2004 JORC code and information reviewed by Mr Bill Knox, who is a Member of The AusIMM. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Mr Knox has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Knox consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

Competent Persons Statement – EPC 1149 Resources

The Coal Resource estimation for the Blackall Project (EPC 1149) presented in this announcement has been carried out in accordance with the principles and guidelines of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2004) and the Australian Guidelines for Estimating and Reporting of Inventory Coal, Coal Resources and Coal Reserves, 2003. The information in the announcement to which this statement is attached, that relates to East Energy's Blackall Coal Resource on EPC 1149 is based on information reviewed by Dr Gerard McCaughan, who is a Member of The AusIMM and is a full time employee of SRK. . This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Dr McCaughan has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the JORC Code. Dr McCaughan consents to the inclusion in the announcement of the matters based on this information in the form and context in which it appears.

Competent Persons Statement – Exploration Targets

The information in this announcement relating to Exploration Targets within EPC 1398 and EPC 1399 is based on information compiled by Mr Peter Tighe who is a Member of The AusIMM and a geological consultant to East Energy Resources Ltd. Mr Tighe has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Tighe consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

Forward Looking Statements

This Announcement may contain forward looking statements. The words 'anticipate', 'believe', 'expect', 'project', 'forecast', 'estimate', 'likely', 'intend', 'should', 'could', 'may', 'target', 'plan' and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. Forward-looking statements are subject to risk factors associated with the Company's business, many of which are beyond the control of the Company. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially from those expressed or implied in such statements. There can be no assurance that actual outcomes will not differ materially from these statements. You should not place undue reliance on forward-looking statements and neither East Energy Resources Limited nor any of its directors, employees, servants, advisers or agents assume any obligation to update such information.

The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcement.
