About Torrens

Torrens Mining Limited (ASX: TRN) is an Australian-headquartered company exploring for gold, copper and cobalt and other metals. Torrens is positioned for value growth through its diversified portfolio of prime gold exploration assets in the Victorian Goldfields, the advanced and active Elizabeth Creek Copper-Cobalt Project in South Australia and, pending the grant of an exploration licence, at the formerly producing high-grade copper-gold Laloki Project in Papua New Guinea (PNG).

Torrens holds the strategically positioned Mt Piper Gold-Antimony Project in Central Victoria, where exploration is focused on the search for structurally-controlled gold-antimony mineralisation, similar to that being successfully mined at the nearby Fosterville gold-antimony mine, and the adjacent Costerfield gold-antimony mine. The Costerfield mine lies on the immediate strike extension of major fault zones cutting through Torrens' tenure. Within its granted tenure and exploration licence applications encompassing approximately 1630 km², Torrens is exploring several targets generated by previous exploration, including the Northwood Hill gold prospect, where important intersections of shallow gold mineralisation were reported in drilling in the 1990's. Torrens' field exploration program, now underway following its listing on ASX on 7 January 2021, includes geochemical sampling, geological mapping and geophysical surveying, leading to planned drilling.

The Club Terrace Project in Eastern Victoria includes some 50km strike length of the regional-scale Combiénbar Fault system, where historical mining and exploration activities have generated gold and polymetallic, including copper and lead, base metal targets that are yet to be drill-tested. Torrens has granted tenure and exploration licence applications encompassing some 492 km². Torrens is conducting systematic exploration for gold and copper mineralisation over this contiguous exploration zone on the Combiénbar Fault.

The Elizabeth Creek Project in South Australia covers an area of approximately 739km² in the Olympic Copper Province, which is Australia's most productive copper province. The Company holds a 30% interest in this project, which is subject to a farm-in agreement with ASX-listed Coda Minerals Limited (ASX: COD), with Coda holding the option to acquire an additional 5% for \$1.5M.

Subject to the Company seeking and being granted a review of the Minister's decision not to grant its exploration licence (as announced on 28 January 2021) and its exploration licence applications ultimately being granted, the Company also intends to explore high-grade copper-gold Volcanogenic Massive Sulphide (VMS) mineralisation at Laloki, located about 15km from Port Moresby, the capital of PNG and in the adjoining Rigo area.

Forward-Looking Statements

This announcement contains “forward-looking statements.” All statements other than those of historical facts included in this announcement are forward-looking statements. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper, gold, cobalt and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly any revisions to any “forward-looking statement”.
