## **DELTA DRONE INTERNATIONAL'S PARAZERO EXPANDS INTO SOUTH AFRICA WITH ENTERPRISE MINING CONTRACT**

### **Highlights:**

- Delta Drone International's safety specialist brand, ParaZero, has signed its first customer contract in South Africa to provide its SafeAir drone parachute technology to the enterprise mining sector
- The contract with a leading South African mining company, will see ParaZero's patented SafeAir drone parachutes installed in onsite drones to enhance safe work practices

**18 May 2021** – Global drones-as-a-service provider, Delta Drone International 's (**ASX:DLT**) safety specialist brand, ParaZero, has signed its first customer contract in South Africa with Kumba Iron Ore Limited ("**Kumba**") (a subsidiary of Anglo-American) for its patented SafeAir drone parachute technology.

Kumba will deploy ParaZero's SafeAir at scale to enhance its drone safety practises, with the technology comprising independent sensors to constantly monitor and analyse a drone's flight patterns, so in the unlikely event of a drone failure, a parachute is automatically activated to land safely – including over people and moving vehicles. The revenue from this contract is insignificant in value and has normal termination clauses for non-performance.

This sales contract is reflective of the synergy benefits of the combined Delta Drone and ParaZero businesses and represents great potential for additional sales of ParaZero's market leading technology through the industry networks of its parent entity, Delta Drone SA (France), as the company increases the international footprint of its specialist business units covering safety, compliance, training and drone service operations in all commercial sectors and environments.

Commenting on the agreement, Delta International CEO, Christopher Clark said:

"Leveraging the contacts of our parent entity, Delta Drone SA (France) to sign ParaZero's first customer contract in South Africa moves us a step closer to achieving our goal of becoming a truly international drones-as-a-service provider."

"Ensuring our customers' inhouse drone systems not only comply but exceed the most stringent safety standards set by the world's civil aviation regulators is of the utmost importance to our business and is a testament to our research and development team who consistently work to create the newest innovations in drone safety technology."

"As the world continues to further embrace drone technology, we will continue to play a leading role in helping the drone industry ensure safety and compliance through our patented safety solutions."

*This announcement has been authorised for release by the Board of Delta Drone International Limited.*

**About Delta Drone International**

Delta Drone International is a multinational drone-based data service and technology solutions provider for the mining, agricultural and engineering industries. It provides aerial surveying and mapping, security and surveillance, and blast monitoring and fragment analysis through a fully-outsourced service with AI and fast data turnaround that allows enterprise customers to focus on operations on the ground while Delta Drone International takes care of everything in the air.

It has in-house enabling proprietary technology, an R&D and integration centre and specialist expertise in designing, developing and providing best-in-class autonomous safety systems for commercial drone deliveries, drone flights for crowd monitoring and in urban areas, as well as 'beyond visual line of sight' (BVLOS) missions.
