

Pure Hydrogen signs MOU for Hydrogen refuelling

Sydney, 20 May 2021: Australian East Coast Clean Energy Company, *Pure Hydrogen Corporation Limited* (ASX: PH2 or 'Pure Hydrogen') is pleased to report it has executed a Memorandum of Understanding (MOU) with leading Australian hydrogen focused company H2H Energy Pty Limited ('H2H Energy') which has agreed to supply and maintain refuelling outlets on a number of Pure Hydrogen's proposed sites.

The team at H2H Energy have successfully supported the delivery of multiple hydrogen refuelling stations throughout Australia, New Zealand and further abroad. Services include design, construction, installation and sustainment.

Among their refuelling solutions, is H2H Energy's *Gateway Refueller™* (*see image 1 below*), a Queensland designed and manufactured, low cost, short lead-time, mobile hydrogen refueller with both 350 and 700 bar [refuelling](#) capability and 18 months of field proven performance.

<https://www.h2henergy.com.au/>

Pure Hydrogen is planning to develop hydrogen refuelling hubs on the East Coast of Australia in order to supply local customers with Hydrogen fuel at the required pressure of 35 or 70 MPa. These sites will be used to refuel motor vehicles (especially trucks) powered by Hydrogen gas. H2H's refuelling stations are expected to be supplied to *Pure Hydrogen* when the first refuelling station is planned to commence operation, at this stage within ~18 months.

This news marks a step closer to the rollout of Hydrogen gas as a clean and sustainable alternative to petroleum and diesel. As well as, the development of a larger Hydrogen network across Australia.

Chief Executive Officer of H2H Energy Cranston Polson commented: *"It is great to be able to offer our Australian designed, built and supported hydrogen refuelling solutions to Pure Hydrogen and we look forward to working with them on the roll-out of their planned network of hydrogen refuelling stations across the East Coast. We look forward to advancing the first refuelling site relatively quickly and reporting on progress."*

This announcement is authorised by the Managing Director.
