

## AHI Signs Binding Term Sheet with Inter-Psy to integrate CompleteScan into Health i Check

### Highlights:

- Binding term sheet signed with INTER-PSY B.V.
- Inter-Psy provide psychological, psychiatric, health and wellbeing services primarily to the Netherlands and European markets.
- Health i Check, Inter-Psy's preventative health screen iOS and Android app is scheduled to go live in June 2021 in the Netherlands.
- AHI's technology will be integrated into the Health i Check platform for an October 2021 release.
- The integrated Health i Check solution will be offered to the population of the Netherlands under the Government funded Combined Lifestyle Intervention programs .

Advanced Human Imaging Limited (ASX: AHI) ("AHI" or the "Company") is pleased to inform its shareholders that the company has signed a binding term sheet with INTER-PSY B.V (Inter-Psy), a Netherlands based mental health and addiction care company that has developed Health i Check, a preventative health screening app for the Dutch and European markets.

Health i Check is a preventive screening instrument platform soon to be available in the Netherlands on both iOS and Android devices. Based on the results of Health i Check, users receive professional advice on medical steps to be taken and how to improve health in a responsible manner. Health i Check works with an ICT platform on which all data is collected securely and in accordance with privacy legislation and on which the results are visually reported in real time. Where required Health i Check also supports the medical process by means of referral and aftercare.

The Health I Check iOS and Android applications are scheduled to go live in June 2021 in the Netherlands: <https://www.healthicheck.nl/> with the AHI integration planned to go live in October 2021.

To prevent is better than to cure.

Inter-Psy plan to market the Health i Check AHI integrated solution to the population of the Netherlands that are eligible for the Government funded GLI - gecombineerde leefstijlinterventie (combined lifestyle Intervention) program, which is a government funded behavioural change program designed for people who are overweight or obese, with the goal to achieve and maintain a healthier lifestyle through healthier food, eating habits, and exercise. In the Netherlands, the Government pays organizations up to EUR800 per person that have a BMI over 30 that undertake a 24-month GLI program.

Upon the completion of the integration with AHI, Inter-Psy's intention is to offer the combined Health i Check to the remaining countries within Europe, where the governments offer a similar program to the GLI initiative in the Netherlands.

**Vlado Bosanac, Chief Executive Officer of Advanced Human Imaging, said:**

“Companies like Inter-Psy combined with forward thinking countries such as the Netherlands are leading the way in reducing the burden on individuals, their families, and government health systems when contemplating the power of early intervention of common, chronic disease 1, and the long-term effects of lifestyle related and preventable chronic diseases such as cardiovascular disease, and Type 2 Diabetes by addressing these challenges through early intervention programs such as GLI. This initiative is based on identifying the early warning signs, which our technology can assist in identification of the markers of such lifestyle diseases.

Providing at risk individuals with early warning signs and setting them on a healthier lifestyle course, not only benefits the individual, it has also been proven to lead to a longer, healthier lifespan, but also means that less money is spent by insurers, payers and governments treating individuals with chronic disease, reducing the tax payer burden and impact on already overloaded healthcare systems.

This is the first of our partners to leverage government funded programs when providing our technology to end users free of charge. I look forward to working with Adryan and his team to help turn the tide on the common and preventable chronic disease plague of many nations.”

**Adryan van der Linde, Health i Check Project Leader said:**

“Health i Check's mission is simple, prevention is better than cure. The Health i Check app provides unique health tests and risk indicators that maps personal health and potential risk in real time. AHI's technology helps Health i Check realize our dream; one app with a menu of accessible health checks that can be done by the user from the privacy of their own home.

At Inter-Psy we pride ourselves on being market leaders and innovators, and I am looking forward to leveraging AHI's technology to provide real outcomes to the Netherlands and European populations. Both through our platform and the governments paid initiative for the correction of these diseases through early intervention.”

**Summary of Material Terms:**

Item	Summary/Details
Parties	Advanced Human Imaging Limited (AHI) INTER-PSY B.V (Inter-Psy)
Conditions Precedent	None
Agreement	Binding Term Sheet

<sup>1</sup> <https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.121.053461> - accessed May 27th 2021.

<p>Formal Agreements to be concluded</p>	<p>The main commercial agreement between the parties pursuant to which AHI agrees to grant Inter-Psy the right to use AHI's licensed Software Development Kits (SDKs) and related intellectual property to integrate them into the partner platform/technology.</p> <ul style="list-style-type: none"> <li>• Commercial Agreement,</li> <li>• The Software Development Kit, End User License Agreement,</li> <li>• Support Agreement,</li> <li>• Data Processing Agreement.</li> </ul> <p>Under the terms of the binding term sheet, all the aforementioned agreements will be concluded no later than the 25<sup>th</sup> of August 2021.</p>
<p>User Target</p>	<p>Under the terms of the binding term sheet, Inter-Psy will use its best endeavours to target 200,000 active users on the <i>Health i Check</i> platform within the first 12 months. There are no penalties for not achieving this target.</p>
<p>Financial Impact</p>	<p>AHI does not expect any immediate material financial return as a result of entering into this agreement.</p> <p>AHI expects to start generating licence and other fees from the commercial arrangement in the future (which cannot be forecast at this time).</p>
<p>Governing Law</p>	<p>Australia</p>

### About Inter-Psy

Inter-Psy offers psychological help in the form of diagnostics, counseling and treatment to infants, children, adults and the elderly, whereby promoting mental health through personal, professional contact and evidence-based treatment is paramount.

With several locations across the Netherlands in the provinces of Groningen, Friesland and Drenthe and the possibility to receive support in the home situation via Inter-Psy Home, Inter-Psy always offers help close to the patient. Treatments within Inter-Psy are reimbursed from the basic health insurance of all health insurers.

### About Advanced Human Imaging:

The Company has developed and patented a proprietary technology which enables its users to privately check, track, and accurately assess their dimensions, solely using a smartphone. AHI refers to this physical measurement and analysis tool as "BodyScan." AHI is globalizing its technology in order to assist individuals, communities and populations live healthier lives, worldwide.

AHI's patented technology allows individuals, via an automated system, take a series of images of themselves using a smartphone which delivers accurate and repeatable measurements across the individual's entire body. These measurements allow the individual to understand his/her dimensions and the physical changes which they are undergoing through diet, exercise and lifestyle. Further, the images that AHI captures also provide the individual with an understanding of their health risk related to certain chronic diseases (including obesity and related diseases such as diabetes). AHI uses global standards set by the World Health Organization (WHO), and the International Diabetes Federation (IDF) when assessing and deriving this information feedback loop.

The Company has recently advanced its technology to run these complex mathematical algorithms directly on the user's smartphone, rather than limiting that computation to the Cloud. AHI's overarching technology strategy has been to take advantage of the mobile device's accelerated performance, specifically by utilizing on-device general purpose Graphic Processing Units (GPU).

**ASX Announcement**  
**Monday 31<sup>st</sup> May 2021**

AHI delivers a non-invasive, highly accurate and privacy-sensitive solution which returns results within seconds. The Company leverages machine-learning and computer vision to analyze images, detect pose and joint features, and create non-personally identified data for measurement estimation. AHI takes advantage of dedicated GPU libraries such as TensorFlow Lite (Android) and Metal (Apple) to run prediction models, which have been trained with a substantial and diverse human data set proprietary to the company from around the globe, which is enabled on device to process multiple captured images in fractions of a second. The result is a solution that runs on-device and does not sacrifice speed, security or privacy. Images and private information never leave the users personal device, ensuring security and privacy standards are met across global regions and requirements.

This unrivalled process allows us to produce exceptional results and simplify the output of useful, reliable, digital measurements and remove the human error otherwise present in traditional methods.

Advanced Human Imaging's MultiScan platform simplifies the collection of bio metric measurements across the body, vital signs and skin conditions, reducing the human error present in traditional information gathering and analysis methods.
