

**ASX Release | ClearVue Technologies Limited (ASX: CPV)****Director Conversion of Options**

**4 June 2021:** Smart building materials company ClearVue Technologies Limited (ASX:CPV) (**ClearVue** or the **Company**) advises that Mr Victor Rosenberg has given notice of the exercise of all of the options controlled by him, being 22,660,099 unlisted options (each having an exercise price of \$0.25c per option). The conversion is funded by the sale of 18,000,000 ClearVue shares which was undertaken on 3 June 2021 by a sale to a number of third-party investors, including some Australian institutional investors. Mr Rosenberg's relevant interest in ClearVue shares will increase from 22,410,099 to 27,070,198 on completion of the conversion and sale.

The Company further advises that another major shareholder has also given notice of the exercise of a portion of the options controlled by that party, being 3,006,560 unlisted options (each having an exercise price of \$0.25c per option). The conversion is funded by the sale of 2,000,000 ClearVue shares to the same third-party investors as referred to above.

The effect of the conversion of options and the sale of these shares to third-party investors as referred to above, is that the Company will receive proceeds of \$6,416,664, and a large portion of the sale shares are held by institutional shareholders who are supportive of the Company.

The Company will lodge the relevant Director appendices in due course, as required by ASX Listing Rules.

### **About ClearVue Technologies Limited**

ClearVue Technologies Limited (ASX: CPV) is an Australian technology company that operates in the Building Integrated Photovoltaic (BPIV) sector which involves the integration of solar technology into building surfaces, specifically glass and building façades, to provide renewable energy. ClearVue has developed advanced glass technology that aims to preserve glass transparency to maintain building aesthetics whilst generating electricity.

ClearVue's electricity generating glazing technology is strategically positioned to compliment and make more compelling, the increased use of energy-efficient windows now being regulated in response to global climate change and energy efficiency goals.

Solar PV cells are incorporated around the edges of an Insulated Glass Unit (IGU) used in windows and the lamination interlayer between the glass in the IGU incorporates ClearVue's patented proprietary nano and micro particles, as well as its spectrally selective coating on the rear external surface of the IGU.

ClearVue's window technology has application for use in the building and construction and agricultural industries (amongst others).

ClearVue has worked closely with leading experts from the Electron Science Research Institute, Edith Cowan University (ECU) in Perth, Western Australia to develop the technology.
