

**CLEANSING NOTICE UNDER SECTION 708A OF THE CORPORATIONS ACT 2001
(CTH)**

Comet Resources Ltd (**Comet or the Company**) (**ASX:CRL**), has issued the following fully paid ordinary shares (**FPO**) in the Company.

- The Company has issued 5,000,000 FPO Shares upon the exercise of unlisted options exercisable at \$0.02 each on or before 30 June 2021.

The Corporations Act 2001 ("Act") restricts the on-sale of securities issued without disclosure, unless the sale is exempt under section 708 or 708A of the Act. By giving this notice, the issue of the Shares will fall within the exemption in section 708A(5) of the Act. Pursuant to section 708A(5)(e) of the Corporations Act 2001 (Cth) ("Corporations Act"), the Company gives notice that:

- a) the Company issued the Shares without disclosure under Part 6D.2 of the Corporations Act; and
- b) as at the date of this notice, the Company has complied with the provisions of Chapter 2M of the Corporations Act as they apply to the Company; and section 674 of the Corporations Act; and
- c) as at the date of this notice there is no information:
 - i. that has been excluded from a continuous disclosure notice in accordance with the Listing Rules; and
 - ii. that investors and their professional advisors would reasonably require for the purpose of making an informed assessment of:
 - a. The assets and liabilities, financial position and performance, profits and losses and prospects of the Company; or
 - b. The rights and liabilities attaching to the Shares.

For the purpose of ASX Listing Rule 15.5, the Board has authorised for this announcement to be released.

- ENDS -

About Comet Resources

Santa Teresa Gold Project (Mexico)

The Santa Teresa Gold Project is comprised of two mineral claims totalling 202 hectares located in the gold rich El Alamo district, approximately 100 km southeast of Ensenada, Baja California, Mexico; and 250 km southeast of San Diego, California, USA. The Project is prospective for high grade gold. In addition to the two claims of the Project, two additional claims totalling a further 378 hectares in the surrounding El Alamo district are being acquired from EARL.

Barraba Copper Project (NSW)

The 2,375ha exploration license that covers the project area, EL8492, is located near the town of Barraba, approximately 550km north of Sydney. It sits along the Peel Fault line and encompasses the historic Gulf Creek and Murchison copper mines. The region is known to host volcanogenic massive sulphide (VMS) style mineralisation containing copper, zinc, lead and precious metals. Historical workings at Gulf Creek produced high-grade copper and zinc for a short period around the turn of the 19th century, and this area will form a key part of the initial exploration focus.

Northern Territory Projects (NT)

The portfolio of Northern Territory exploration licenses and exploration license applications covers an area of approximately 840km². Although historical exploration results were indicative of near surface gold and copper mineralisation, very limited modern exploration has occurred. Comet plans to utilise modern exploration techniques to rapidly advance the scale of known mineralisation, especially where known geophysical and geochemical anomalies exist that have not been comprehensively drill tested.

Springdale Graphite Project (WA)

The 100% owned Springdale graphite project is located approximately 30 kilometres east of Hopetoun in South Western Australia. The project is situated on free hold land with good access to infrastructure, being within 150 kilometres of the port at Esperance via sealed roads. The tenements lie within the deformed southern margin of the Yilgarn Craton and constitute part of the Albany-Fraser Orogen. Comet owns 100% of the three tenement's (E74/562 and E74/612) that make up the Springdale project, with a total land holding of approximately 198 square kilometres.
