# Quarterly Report

## For period ended 30 June, 2021

### Central Iron Ore Limited (Gullewa Limited 37%)

#### Gold

#### Red 5 Joint Venture

We have completed geophysics and are awaiting interpretation. The Company views it had earned in excess of a 70% interest in the Red 5 JV Tenements, but this is disputed by Red 5.

The negotiations have been productive and we are hopeful of achieving a resolution shortly.

#### British King (49%)

The British King Mine is now owned 100% beneficially by the Company and is National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI43-101”) compliant. The British King Mine is 5km southwest of Red 5 Limited’s Darlot Mine.

We have received signed transfer forms from BK Gold Mine Pty Limited to Central Iron Ore Limited for 51% as agreed in the Tenement Acquisition Agreement dated 30 October 2014. Silverstream SE22 has refused to remove the caveats which prevents registration of the transfers.

We are evaluating our legal options.

#### Kingwest Resources Limited

The Company holds 2,095,830 shares in Kingwest Resources Limited.

### Gullewa Limited

#### Property

Maitland Council have approved the increase in the number of lots from 26 to 31. The Construction Certificate is expected shortly.

The market in Maitland is currently strong.
