

#### 30 July 2021

#### **QUARTERLY ACTIVITIES REPORT**

### For the June 2021 quarter and to the date of this report

Australia's Po Valley Energy Limited (ASX: **PVE**), ("**Po Valley**" or "**The Company**") provides its Quarterly Activities Report for the period ending 30 June 2021, covering the Company's further progress on gas and oil exploration, development and production outcomes across its onshore and offshore assets in northern Italy.

### **Highlights**

Highlights for the quarter include:

- A\$10.1 million Equity Capital raising:
  - A\$1 million Placement at \$0.028 per share
  - 1 for 2 accelerated non-renounceable pro rata entitlement offer at \$0.028 per share to raise approximately A\$ 9.1m comprising and institutional offer and a retail entitlement offer.
  - The Entitlement offer fully underwritten by Henslow Pty Limited
- Selva Malvezzi (Onshore Gas): Following the issue of the Environmental Impact Assessment (EIA) decree approving the Selva Malvezzi Production Concession and related work program to bring the Podere Maiar 1dir gas well on stream, the Ministry of the Ecological Transition (MiTE) is reviewing the final documentation necessary to issue the Final Production Concession.
- **Teodorico (Offshore Gas)**: Following the issue of the EIA decree approving the d40 AC PY Production Concession and related work program necessary to put in production the Teodorico gas field, the Ministry of Ecological Transitions to reviewing the final documentation necessary to issue the Final Production Concession.
- Regulatory: The Company is actively progressing through the traditional regulatory requirements with MiTE and the relevant authorities from the Emilia Romagna Region to expedite the granting of the Selva Malvezzi and Teodorico final Production Concession decrees.

Po Valley remains a northern Italy-focused energy development, exploration and near-term production company with a streamlined focus on five large assets:

- The onshore gas development at Selva Malvezzi;
- Offshore Adriatic gas development at Teodorico;
- The large-scale gas/oil condensate exploration license at Torre del Moro, and
- The expanded Ravizza (Grattasasso Permit) and Bagnolo (Cadelbosco di Sopra Permit) oil reservoirs and extensions and nearby gas prospects

# Selva Malvezzi Production Concession - 100% PVE (Operator)<sup>1</sup>

Selva Malvezzi is an onshore gas development asset located in the eastern part of the Po Plain, Italy.

Po Valley was awarded the Selva Malvezzi preliminary gas Production Concession (80.68km²) in 2019 and had the final Environmental Impact Assessment (EIA) decree issued by Italy's Ecological Transition Ministry (MiTE) effective date of 29 March 2021.

Under the first phase of the development plan, Po Valley will install a fully automated gas plant at the existing Selva/Podere Maiar 1dir well site and install a one-kilometer long pipeline to connect the well with the nearby Italian National Gas Grid. Based on dynamic reservoir studies, the field development is designed to produce at a maximum rate of up to 150,000 cubic meters/day (5.3 mmscf/day) from successfully tested C1 and C2 production levels in the Medium-Upper Pliocene sands of the Porto Garibaldi Formation (refer ASX announcement 29 May 2018).

Po Valley continues to progress its preliminary work in the Selva gas field to prepare for development and maiden gas production and is progressing with regulatory requirements in the application process for the grant of the final production concession.

Presently Po Valley is preparing the environmental monitoring plan as requested by EIA decree and is carrying out field activities in order to install instruments for seismic and subsidence monitoring.

Following the issue of the EIA, Po Valley has progressed regulatory requirements for the application for an INTESA between the regional Emilia Romagna authorities and the national government, which is standard procedure for onshore gas fields in Italy. This process is currently ongoing with the latest government guidance indicating Production Concession could be expected to be granted in the fourth quarter of 2021.

#### **Teodorico Offshore Gas Field Development (100% PVE)**

The Teodorico gas field is located in shallow east coast waters (30m) of the northern Adriatic Sea; the primary source of domestic gas production for much of Italy; and in close proximity to existing east coast offshore gas production facilities. Teodorico has the largest gas-in-place of all of Po Valley's gas fields and is at an advanced stage of assessment, ready for development.

MiTE issued the final EIA decree for Teodorico with effective date of 29 March 2021 which

paves the way for the grant of full production concession. Po Valley has progressed regulatory requirements and expects final Production Concession approval from MiTE in the fourth quarter of 2021.

# Torre del Moro Gas / Oil Condensate Exploration (100% PVE)

Torre del Moro is a very large oil prospect with a maiden Prospective Resource of 106 million barrels best estimate<sup>2</sup> and has the potential to transform the size and scale of the Company's operations.

The current focus of activities for the Torre del Moro site, south of Forli, is the study of the petroleum system and the drilling plan for submission to the Government which is planned to be carried out as soon as the exploration activities ban ends in September 2021.

<sup>&</sup>lt;sup>1</sup> Transfer approval of JV Partners, UOG (20%) and PROSPEX (17%), quotas for Selva Malvezzi production concession are to be formally requested as soon as final Production Concession is awarded. The relevant quotas to the JV partners on the Podere Gallina exploration licence was formally transferred in October 2020

<sup>&</sup>lt;sup>2</sup> refer ASX announcement 26 April 2019

# Ravizza, Bagnolo-in-Piano, and Bagnolo SW Exploration (100% PVE)

Development design work for these two proven undeveloped oil fields between Bologna and Parma has advanced, with production profiles, development plan, design and verification work at an advanced stage. Additional gas prospects firmed up in the license.

#### Corporate

Po Valley launched a A\$10.1 million equity raise in June 2021 (refer ASX announcement 18 June 2021) by way of a placement of A\$1 million and an Accelerated Non-Renounceable Rights Issue ("ANREO" or "Entitlement Offer") of A\$9.1m at \$0.028 per New Share. The ANREO comprised a non-renounceable entitlement offer to institutional shareholders (Institutional Offer) and to retail shareholders (Retail Offer). The Entitlement offer was fully underwritten by Henslow Pty Ltd.

The placement and Institutional Offer completed on 21<sup>st</sup> June 2021 raising approximately A\$7.5 million (before costs). Approximately A\$1 million was raised through the issue of approximately 35.7 million New shares under the Placement. The Institutional offer raised approximately A\$6.5 million, which included conversion of debt of approximately A\$3.35 million.

The retail offer closed on the 9<sup>th</sup> July with completion on the 15<sup>th</sup> July 2021 raising approximately A\$2.6 million (before costs), which included a conversion of debt of approximately A\$0.6 million.

The capital raising will be used for the development of the Selva Malvezzi project and has strengthened the balance sheet with the retirement of existing shareholder loans, interest on loans and convertible notes and repayment of some convertible notes.

Net operating cash outflows for the quarter was €136k. Exploration expenditure incurred in the quarter was again kept at minimum levels with payments in the quarter amounting to €18k. The Group's cash reserves at 30 June 2021 was €1.87 m.

With regards to Section 6.1 and 6.2, no payments were paid to related parties or their associates in the quarter.

#### Po Valley CEO, Michael Masterman:

"The successful completion of the placement and entitlement offer is a significant capital raising for Po Valley Energy and establishes the balance sheet and funding base to advance the Selva gas field development. The board is very pleased to have the support of new key institutional investors and existing shareholders in the pivotal capital raising"

This announcement has been authorised for release by the Board of Directors of the Company

The Company confirms it is not aware of any new information or data that materially affects the information included in the original market announcements referred to in this announcement and, in the case of estimates for petroleum reserves, contingent resources and prospective resources, all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not materially changed from the original market announcement.

**Prospective Resources** are the estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.
