

ASX RELEASE**11 August 2021****ASX: NVU**

ANZ distributor signs agreement with Linfox Armaguard

Nanoveu Limited ("Nanoveu" or the "Company") is pleased to advise that its exclusive Australian and New Zealand distributor, Touch Guard Pty Ltd ("Touch Guard"), has signed an agreement with Linfox Armaguard Group ("Armaguard").

Touch Guard, which has an exclusive agreement with Nanoveu¹, is incorporating the unique Nanoveu antiviral, antibacterial technology into its own "shield" product called High Touch™.

Under the partnership agreement Touch Guard and Armaguard plan to introduce High Touch™ to a vast number of vulnerable high use community contact points like ATMs, self-service kiosks, and devices.

High Touch™ Antiviral Surface Protection will also be rolled out across Linfox Armaguard owned devices including atm's by Armaguard ATMs.

The Company advises that at this point no guarantee can be given to the volume and value of orders to be purchased by Touch Guard under this agreement and that there have not been any additional orders from Touch Guard. Accordingly, there is currently no financial impact on Nanoveu from this agreement.

**About Nanoveu's Products:**

Nanoshield is a film which uses a patented polymer of Cuprous embedded film to self-disinfect surfaces. Nanoshield antiviral protection which is available in a variety of shapes and forms, from mobile phone screen covers, to mobile phone cases and as a PVC commercial film, capable of being applied to a number of surfaces such as doorhandles and push panels. The perfectly clear plastic film contains a layer of charged copper nanoparticles which have antiviral and antimicrobial properties.

EyeFly3D is a film applied to digital displays that allowed users to experience 3D without the need for glasses on everyday mobile handheld devices.

Customskins are vending machines capable of precisely applying screen covers to mobile phones with an alignment accuracy of 150 microns.

Currently in research and development stage, EyeFyx is a vision correction solution using hardware and software to manipulate screen output addressing long-sightedness without the need to wear reading glasses.
