

20 September 2021

August 2021 Production & Operational Update

Calima Energy Limited ("Calima" or the "Company") (ASX: CE1) is pleased to provide a financial and operational update for the month of August 2021.

Highlights

- Operating Netback of A\$2.8 million for August 2021, an increase of 9% from July
- Average August sales volumes of 3,493 boe/d, an increase of 202 boe/d from July

Production & Financial Estimates

	July	August	% Change
Average production (boe/d)	3,291	3,493	6%
Revenue, net of royalties (A\$ Millions)	\$4.9	\$5.0	2%
Operating netback (A\$ Millions) ¹	\$2.5	\$2.8	12%
Funds flow ² (A\$ Millions)	\$2.2	\$2.4	9%
Capital expenditures (A\$ Millions)	\$2.7	\$3.8	41%
Net debt (A\$ Millions)*	\$17.2	\$18.6	8%
Realised oil price (C\$/bbl)	\$74.17	\$70.15	-5.4%
Realised gas price (C\$/mcf)	\$4.17	\$3.35	-19.7%

* Net debt increased as a result of Leo drilling campaigns, production from the 3 Leo wells are anticipated to commence in November 2021

This release has been approved by the Board.

Forward Looking Statements

This release may contain forward-looking statements. These statements relate to the Company's expectations, beliefs, intentions or strategies regarding the future. These statements can be identified by the use of words like "anticipate", "believe", "intend", "estimate", "expect", "may", "plan", "project", "will", "should", "seek" and similar words or expressions containing same. These forward-looking statements reflect the Company's views and assumptions with respect to future events as of the date of this release and are subject to a variety of unpredictable risks, uncertainties, and other unknowns. Actual and future results and trends could differ materially from those set forth in such statements due to various factors, many of which are beyond our ability to control or predict. These include, but are not limited to, risks or uncertainties associated with the discovery and development of oil and natural gas reserves, cash flows and liquidity, business and financial strategy, budget, projections and operating results, oil and natural gas prices, amount, nature and timing of capital expenditures, including future development costs, availability and terms of capital and general economic and business conditions. Given these uncertainties, no one should place undue reliance on any forward-looking statements attributable to Calima, or any of its affiliates or persons acting on its behalf. Although every effort has been made to ensure this release sets forth a fair and accurate view, we do not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Oil and Gas Glossary and Definitions

Term	Meaning
Adjusted EBITDA:	Adjusted EBITDA is calculated as net income (loss) before interest and financing expenses, income taxes, depletion, depreciation and amortisation, and adjusted to exclude certain non-cash, extraordinary and non-recurring items primarily relating to bargain purchase gains, gains and losses on financial instruments, transaction and advisory costs and impairment losses. Calima utilises
Adjusted working capital:	adjusted EBITDA as a measure of operational performance and cash flow generating capability. Adjusted EBITDA impacts the level and extent of funding for capital projects investments or returning capital to shareholders. Adjusted working capital is comprised of current assets less current liabilities on the Company's balance sheet and excludes the
	current portions of risk management contracts and credit facility draws. Adjusted working capital is utilised by Management and
