

Advanced Human Imaging Receives Additional Patent Protection in New Zealand for Imaging a Body

Advanced Human Imaging Limited (ASX: AHI) (Advanced Human Imaging) is pleased to announce the positive outcome regarding examination of its New Zealand Patent for Imaging a Body. Advanced Human Imaging has successfully executed additional patent coverage for its technology suite in imaging a human body. AHI now holds New Zealand Patent # 731721 which has been granted by the New Zealand Intellectual Property Office on 31st August 2021.

Vlado Bosanac, Chairman & Chief Executive Officer of Advanced Human Imaging, said:

“Acquiring our patent protection to most might seem minor. However, New Zealand has a strong presence in motion, sports, and health technology advancement, and we identified a need to protect our process in this jurisdiction when assessing technologies that may potentially look to expand into our functionality. I am pleased to share this news with our shareholders”.

*This announcement has been approved by the board of Advanced Human Imaging Limited.

About Advanced Human Imaging:

AHI has developed and patented a proprietary dimensioning technology that enables its users to check, track, and assess their health and associated dimensions using only a smartphone both privately and accurately.

Our goal is to assist our B2B partners by providing them with our easy to implement SDK's to then empowering their consumers with these unique and diverse capability. This in return gives our partners the ability to assess, assist, and communicate outcomes with their consumers when navigating day to day life. Whether this is a personal journey to better health, understanding the risk associated with their physical condition, tracking the changes they are experiencing through training, dieting, or under medical regimes, or simply wanting to be correctly sized for a garment when shopping online. The AHI technology delivers this seamlessly, privately, and cost-effectively in under one minute.

Our partners benefit from our (MAAS) Measurements as a service pricing solution, that reduces with scale. Integration is made easy with the AHI modular system, based on multiple (SDK's) software development kits, allowing a partner to select the functions, measurements, and displays to suit their individual needs.

AHI has developed this capability by leveraging the power of Computer Vision, Machine Learning, and proprietary patented algorithms, that process captured images on secure, enterprise-level infrastructure, delivering an end-to-end experience that is unrivalled in the industry. AHI simplifies the collection of measurements and removes the human error present in traditional methods.
