

PENTANET LAUNCHES BETA PLAY FOR CLOUD GAMING TODAY

Pentanet Limited (ASX:5GG, Pentanet or Company) is pleased to announce the formal commencement of the Beta Play phase of the GeForce NOW Powered by Pentanet cloud gaming service in Australia.

From 12pm AWST today, players across Australia and New Zealand who participated in the 'Beta Quest' program have the opportunity to experience cloud gaming on GeForce Now Powered by Pentanet. Demand leading into the Beta Play stage remained strong, with over 30,000 unique users completing over 191,000 Cloud.GG Quests as at 22 September in an effort to secure a seat in Beta Play.

The Beta Play stage will run for about a month and gather further data on performance, system requirements, queue times, and confirm which Australian internet infrastructure and providers will be recommended for GeForce NOW. The national commercial launch remains on track for October 2021, with pricing for GeForce NOW in Australia to be announced in the coming weeks.

Pentanet Managing Director, Mr Stephen Cornish, said "The launch of GeForce NOW Powered by Pentanet is a momentous day for Australian gamers, and we are very happy to bring this opportunity to the Australian market. We are excited to get the service into the hands of the public and demonstrate the power of this technology."

This announcement has been authorised for release by the Managing Director of Pentanet Limited, Mr Stephen Cornish.

About Pentanet

Pentanet is a Perth-based, growth-focused telco delivering high-speed internet to a growing number of subscribers by providing them with next-generation internet speeds. This is achieved through Pentanet's market-leading private fixed-wireless network, the largest in Perth, as well as reselling fixed-line services such as NBN, where its wireless is not yet available.

Pentanet's flagship fixed wireless network has benefits for both customers and investors, offering an outstanding customer experience and a fixed-wireless product that is technically superior to most of the NBN – with attractive margins for investors. This sets Pentanet apart from most broadband providers, which only resell the NBN.

Pentanet will also be part of the rollout of the next wave of subscription-based entertainment services – cloud gaming. The Company's Alliance Partner Agreement with NASDAQ listed NVIDIA – one of the world's largest producers of specialised graphic chips used in gaming – allows Pentanet to be the first to bring their GeForce NOW technology to Australia in 2021.

Pentanet was listed as #28 in the Deloitte Technology Fast 500™ Asia Pacific 2020, a ranking of the region's 500 fastest growing technology companies. On top of the Company's #28 overall ranking, Pentanet also ranked #3 for Australian companies on the list.
