

Corporate Presentation

Exploring for Lithium, Gold, Nickel in Western Australia

October 2021

Acknowledgement of Country

In the spirit of reconciliation, Forrestania Resources acknowledges the Traditional Custodians of Country throughout Australia and their connections to land, sea and community.

We pay our respect to Elders past and present and extend that respect to all Aboriginal and Torres Strait Islander peoples today.

We value the Lands on which we operate and are committed to the protection and preservation of their Heritage, Culture, Spirit and Environment.

Disclaimer

This document has been prepared by Forrestania Resources Limited ACN 647 899 698 and/or its affiliates (together, "Forrestania Resources") for the exclusive use of the party to whom Forrestania Resources delivers this document (the "Recipient"). The information contained in this document has been prepared in good faith by Forrestania Resources. However, no representation or warranty, either express or implied, is made as to the accuracy, completeness, adequacy or reliability of the information contained in this document. This document contains only a synopsis of more detailed information in relation to the matters described herein and accordingly no reliance may be placed for any purpose whatsoever on the sufficiency or completeness of such information as presented herein. This document should not be regarded by the Recipient as a substitute for the exercise of its own judgment and the Recipient should conduct its own due diligence in respect of the contents of this document. To the maximum extent permitted by law Forrestania Resources, its directors, officers, employees, advisers, and agents disclaim any or all liability for any loss or damage which may be suffered by any person as a result of the use of, or reliance upon. anything contained within or omitted from this document.

This document has been prepared solely for informational purposes. This document does not constitute a prospectus and is not to be construed as a solicitation or an offer to buy or sell any securities, or related financial instruments, in any jurisdiction. The Recipient should not construe the contents of this document as legal, tax, accounting or investment advice or a recommendation. The Recipient should consult its own legal counsel, tax and financial advisors concerning any matter described herein. This document does not purport o be all-inclusive or to contain all of the information that the Recipient may require. No investment, divestment or other financial decisions or actions should be based solely on the information in this document. The distribution of this document may be restricted by law in certain jurisdictions. The Recipient and any other persons who come into possession of the document must inform themselves about, and observe, any such restrictions.

Cautionary Statement Regarding Values and Forward-Looking Information

The figures, valuations, forecasts, estimates, opinions and projections contained herein involve elements of subjective judgment and analysis and assumption. Forrestania Resources does not accept any liability in relation to any such matters, or to inform the Recipient of any matter arising or coming to the company's notice after the date of this document which may affect any matter referred to herein. Any opinions expressed in this material are subject to change without notice, including as a result of using different assumptions and criteria. This document may contain forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "believe", "plan", "expect", and "intend" and statements than an event or result "may", "will", "should", "could", or "might" occur or be achieved and other similar expressions. Forward-looking information is subject to business, legal and economic risks and uncertainties and other factors that could cause actual results to differ materially from those contained in forward-looking statements. Such factors include, among other things, risks relating to property interests, the global economic climate, commodity prices, sovereign and legal risks, and environmental risks. Forward-looking statements are based upon estimates and opinions at the date the statements are made. Forrestania Resources undertakes no obligation to update these forwardlooking statements for events or circumstances that occur subsequent to such dates or to update or keep current any of the information contained herein. The Recipient should not place undue reliance upon forward-looking statements. Any estimates or projections as to events that may occur in the future (including projections of revenue, expense, net income and performance) are based upon the best judgment of Forrestania Resources from information available as of the date of this document. There is no quarantee that any of these estimates or projections will be achieved. Actual results will vary from the projections and such variations may be material. Nothing contained herein is, or shall be relied upon as, a promise or representation as to the past or future. Forrestania Resources, its affiliates, directors, employees and/or agents expressly disclaim any and all liability relating or resulting from the use of all or any part of this document or any of the information contained herein.

Competent Person's Statement

The information in this report that relates to Exploration Results is based on and fairly represents information compiled by Ms Melanie Sutterby. Ms Sutterby is the CEO/GM of Forrestania Resources Limited and is a member of the Australasian Institute of Mining and Metallurgy. Ms Sutterby has sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results. Mineral Resources and Ore Reserves. Ms Sutterby consents to the inclusion in this report of the matters based on information in the form and context in which they appear.

Previous Disclosure

The information in this presentation is based on the Forrestania Resources Limited Prospectus, available from the Forrestania Resources website www.forrestaniaresources.com.au and the ASX website www.asx.com.au within previously announced Company releases. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and that all material assumptions and technical parameters underpinning the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are represented have not been materially modified from the original market announcement.

Opportunity For Growth

- Funded for growth
- Active drilling and exploration programs to add value

Forrestania Lithium, Gold & Nickel Project

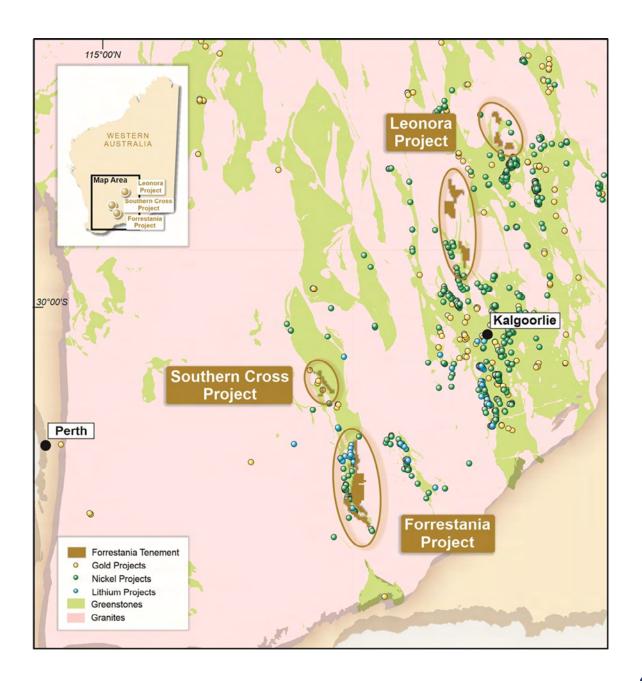

- ► Rare consolidation of major tenure in emerging mineral province
- ► Several multi-commodity walk-up drilling targets

Southern Cross Gold Project

- Artisanal high-grade workings in an established gold field
- ► Multiple early-stage Au geochemical anomalies

Leonora Gold Project

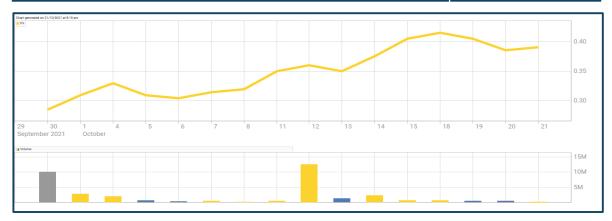

- ► Prospective for world-class granite-hosted Au
- ► Tier-1 multi-million-ounce district

Corporate Overview

Forrestania Resources Limited	ASX:FRS
Share price (20 October 2021)	\$0.40
Shares on issue (ASX:FRS)	51.0M
Options on Issue	18.25M
Market Capitalisation (Undiluted)	\$20.4M
Cash (as at listing)	\$5M
Debt	NIL

Enterprise Value \$15.4M

Other ASX:FFR 12% Board & Management

Other Top 20

- ► Top 20 shareholders comprise 68%
- ► Low enterprise value

36%

► High trading volume

Board & Management Team

Proven mineral discovery and corporate track record

John Hannaford | Non-Executive Chairman BCom, CA, FFin

John is an experienced corporate executive with extensive experience in the ASX resources sector as a Corporate Advisor, Executive, Chairman, company promoter and investor

Mel Sutterby | Chief Executive Officer BSc. (Hons) Geology, MBA, MAusIMM

Mel is an experienced, commercially minded geologist with 18 years broad industry experience in exploration, resource development, open pit and underground mining.

Simon Adams | CFO/Company Secretary B.Bus., M. Acc , AGIA

Simon has over 25 years experience with listed and private companies where he has filled executive roles across a range of industries including mining, aquaculture, finance and most recently in the upstream energy sector.

David Izzard | Non-Executive Director BBus, CPA, MBA, MSc, GAICD

David is a highly experienced Executive and Non-Executive Director with extensive skills in all aspects of financial and commercial management at a senior executive level in both listed and unlisted companies.

William Higgins | Non-Executive Director BSc, Geology, AIG

Billy has more than a decade's worth of experience as a Geologist across multiple commodities, with a specialised expertise in gold exploration.

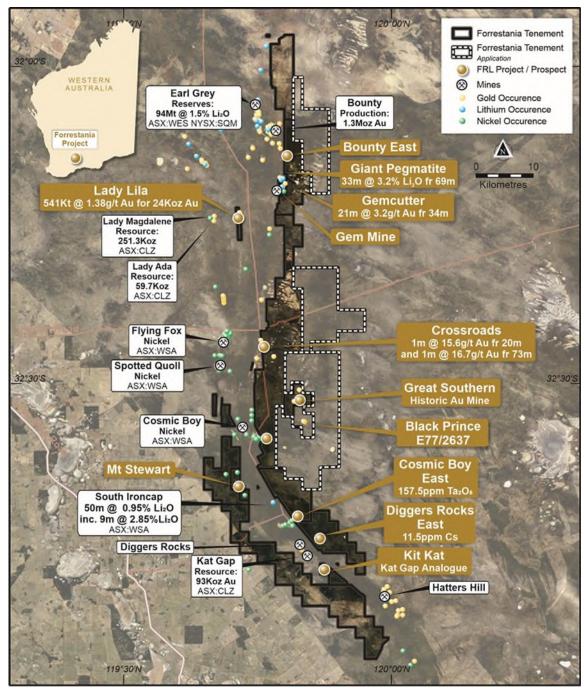

Ashley Bennett | Exploration Manager BSc. (Hons) Geology, AIG

Ashley is a Geologist with extensive multi commodity experience across New South Wales, the Northern Territory and Western Australia.

- Experienced Exploration and Corporate team
- ► Results focused, **transdisciplinary** team
- ► Unique IP, applied exploration and resource development experience

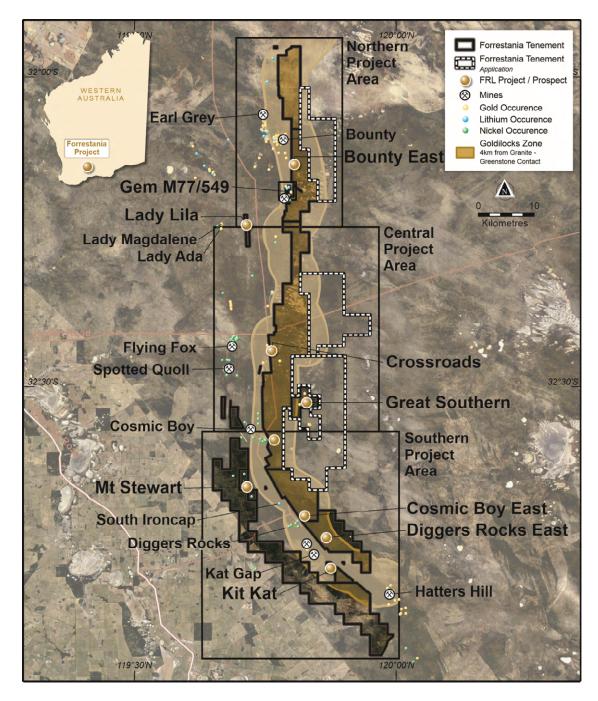

Background: major consolidation play

- Tightly held region with historical focus on nickel and base metals
- ▶ Discovery of **Bounty** in 1986 underlined Au prospectivity with >1.3Moz produced
- ▶ Strategic metals potential recognised in 2016 by Kidman Resources' Earl Grey Li discovery
 - Mt Holland Li Project (ASX:WES/NYSX:SQM)
 - ▶ \$1.9b investment
 - ▶ Mine set to produce 50,000t of LiOH in 2024
- ► Prospective land position adjacent to major mines:
 - ► Earl Grey (Li)
 - ► Bounty (Au)
 - ► Flying Fox (Ni)
 - Spotted Quoll (Ni)

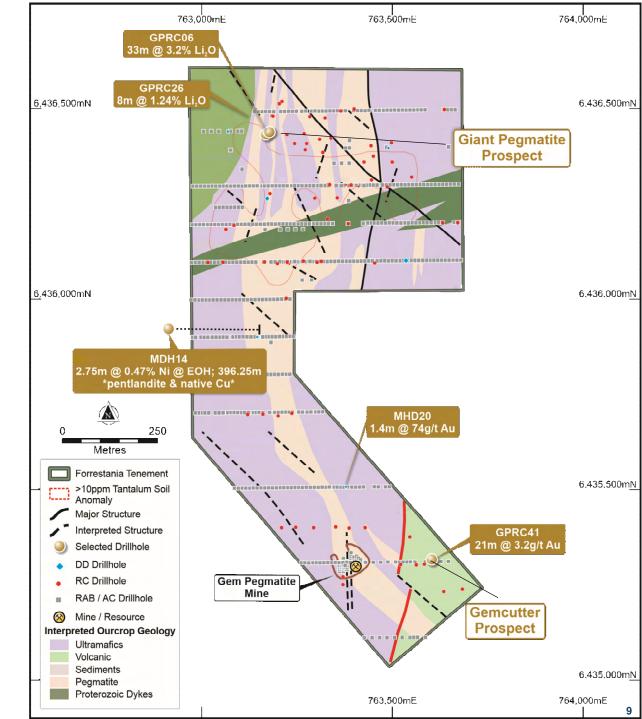

Multi-Commodity Prospectivity

- ▶ Optionality along 100km of Greenstone Belt strike
 - Specialty pegmatites already identified across FRS tenure
 - Project-wide data review ongoing as potential for a world-class Li province emerges
 - Historic drilling and geochemical data generally not sampled for lithium or specialty metals
 - Existing Inferred Au Resource at Lady Lila
 - tip of a "Bounty" iceberg?
 - Untested known nickel positions on the Eastern Ultramafic Belt
- ► Substantial regional infrastructure:
 - ► ASX:WSA Forrestania Nickel Project operational for the past ~20 years
 - ► ASX:WES Mt Holland Lithium Project in development

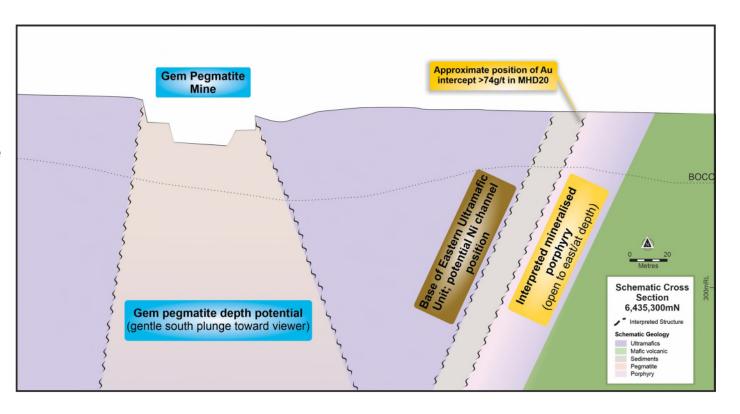

Lithium Prospectivity: Northern Project Area

- Mining Lease (M77/549) with known specialised Lithium-Caesium-Tantalum (LCT) pegmatites
- Pegmatites host to historic "Gem Pegmatite" mine
 - mined in 80's for tantalum, tin and gem quality rubellite
- ► Historic drill result:
 - ► 106m of pegmatite with significant mineralisation including:
 - ▶ 33m @ 3.2% Li₂O fr. 69m, including 13m @ 4% Li₂O fr. 81m.
- Conceptual model indicates mineralisation not closed off
 - ▶ limited drill-testing of E-W striking accumulation zones
- ► Multiple priority Li targets identified

Lithium, Gold and Nickel Prospectivity – Gem Prospect

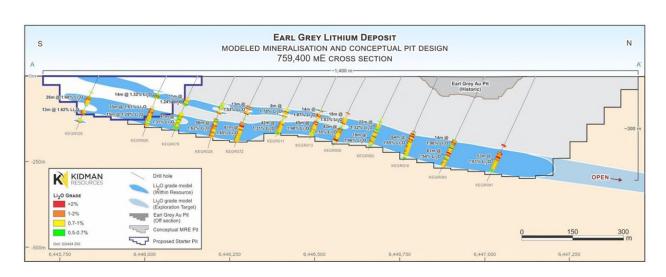

- ▶ 1980s AMAX diamond hole reported visible Au within quartz veining associated with a mafic sedimentporphyry contact
- Assay repeats across 1.43m include: 190g/t, 95g/t, 10g/t and 2.3g/t Au (average of 74g/t) from 248.12m
 - ► An additional 23m of porphyry assayed between 0.03 0.2 g/t
 - ► This hole was **not** assayed for Au between 0m 244.39m
- ▶ 2019 FFR RC drilling identified ultramaficmafic contact east of historic Gem Pegmatite Mine (Gemcutter Prospect)
- ▶ Best result: 21m @ 3.2g/t Au fr. 34m
 - mineralisation open to north and south

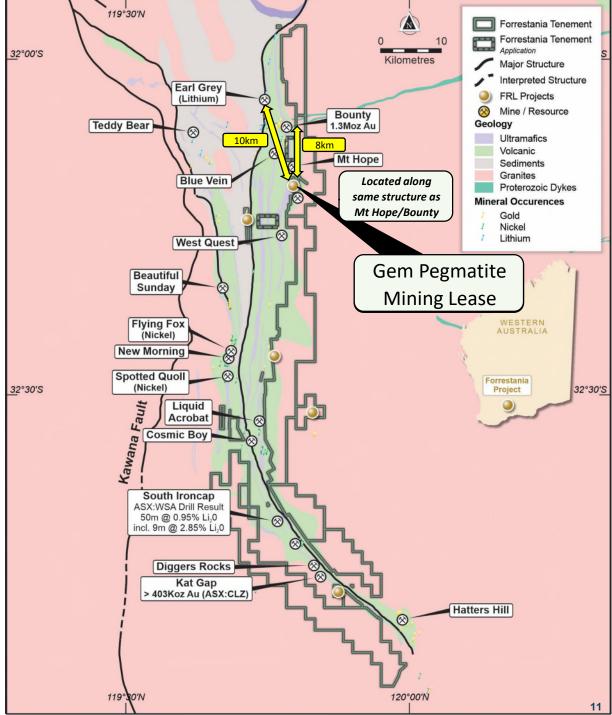

Schematic Long Section across the Gem Pegmatite Mine showing interpreted geology and prospective units.

Forrestania Project Conceptual Specialty Metals Model: Northern Project Area

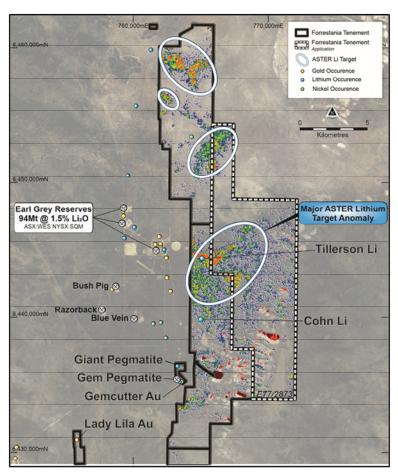

- ▶ LCT pegmatites occur in 2 orientations regionally:
 - 1. NW-SE-striking narrow "veins" linked to;
 - 2. voluminous NE-SW-striking accumulation zones.
- ► **Accumulations** can be 100s of meters thick, "sheeted" or stacked and sub-horizontal or gently dipping

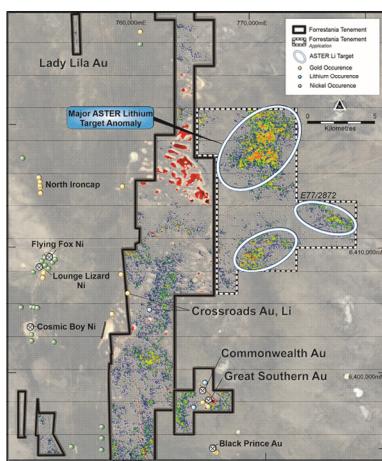

Lithium Prospectivity: ASTER identifies new target areas

- ► ASTER lithium target map represents *probability* that an area contains Li
 - warmer colours indicate a higher the probability for Li
- ASTER alteration mapping shows extensive and coherent "lithium target" anomalies
- New tenement applications recently made on basis of ASTER and correlation of prospectivity indicators

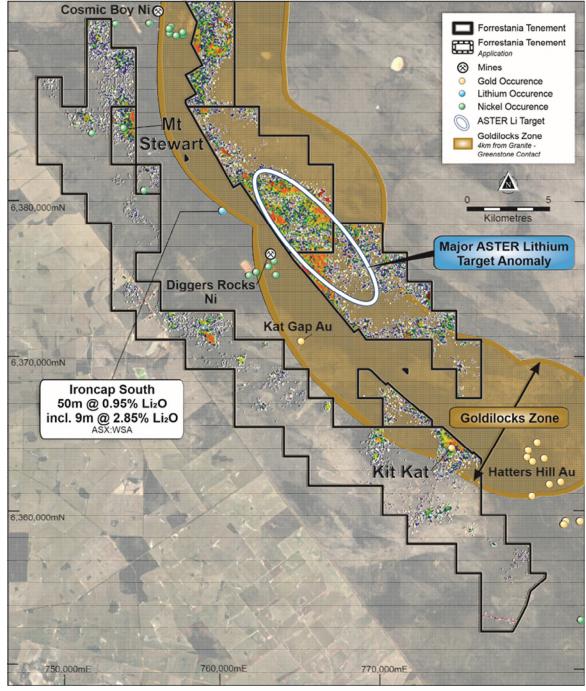

North project area

Central project area

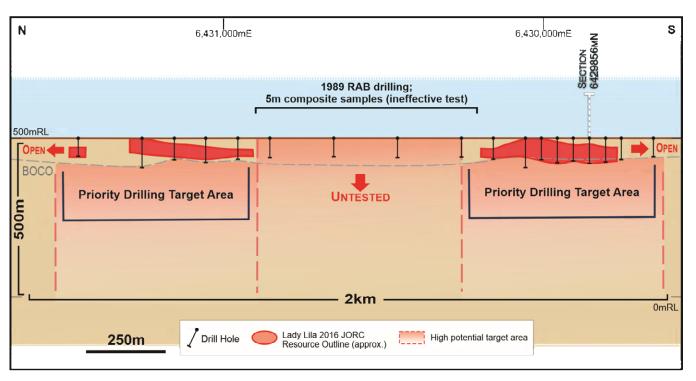

Lithium Prospectivity: Southern Project Area

- ➤ ~100km strike of prospective 1-4km wide granitegreenstone "Goldilocks Zone"
- Area theoretically favourable for pegmatite-hosted lithium mineralisation
- ▶ Using a combination of:
 - conceptual models; and
 - empirical data; geology, geochemistry, geophysics
- ► Define new target areas
- ► Refine existing targets

Lady Lila Au Resource: Northern/Central Project Area

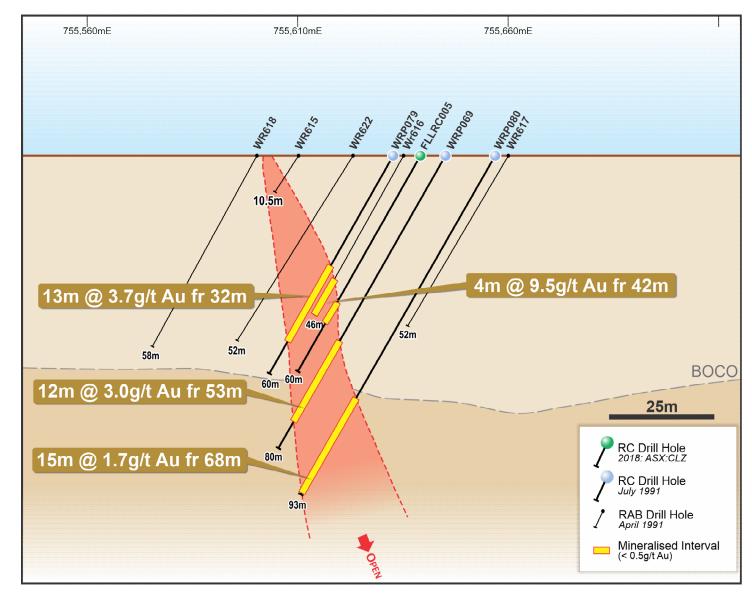

- ► Existing Inferred Resource estimated in 2016 from drilling pre-1999:
 - 541,000t @ 1.38g/t for 24,000oz Au*
 - 85% of drill holes = RAB
 - Average drilling depth 60m
- ► Significant potential open in all directions
- ► Bounty lookalike (1.3 Moz @ 3.7g/t)
 - Comparable geology; steeply dipping BIF/chert
 - Nuggety/high grade Au associated with quartz, sulphide and carbonate
- ► Drilling planned Quarter 4, 2021

North South Long Section of Lady Lila

Lady Lila Au Resource

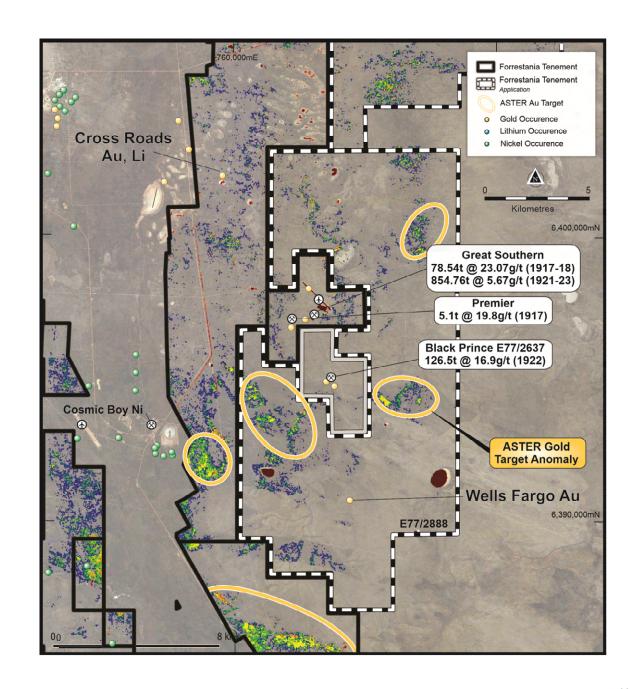

- ► Potential to rapidly expand resource
- ► Walk-up RC drilling targets
 - Immediate news flow
- ► Known Au depletion in top ~60m
 - ► Potential for higher grades at depth
- ► Known >20m veneer of recent transported cover
 - Obscures Au anomalies and provides opportunity to discover extensions along strike
- Mineralisation clearly open: at depth and along strike in both directions

West-East Cross Section (6,429,856mN) of the Lady Lila deposit.

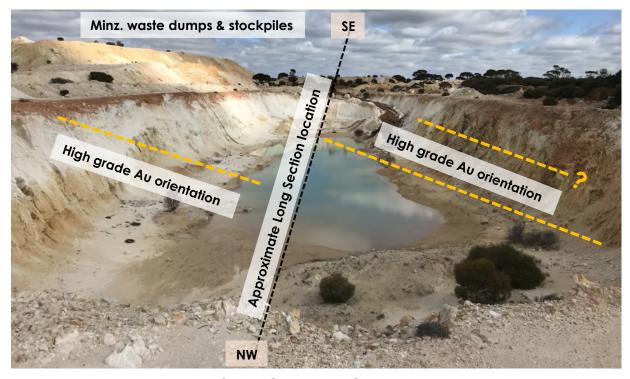

Gold Prospectivity: Central Project Area

- ► Structurally hosted, high grade Au in granite
- ► Selective artisanal miners focused on Au >19g/t
- ► Shallow mining 1980s @ 7.1g/t Au
- ▶ 1987 Julia Mines notes (ref. Great Southern):
 - « good gold » (fr. panning) in drill cuttings but poor results @ 0.19g/t returned
 - Only AAR assays undertaken
- ▶ Wells Fargo prospect
 - ► Historic exploration identified series of NNEtrending anomalous Au in geochem over ~600m: AC drill target
 - Granite hosted Au potential

Great Southern: Central Project Area

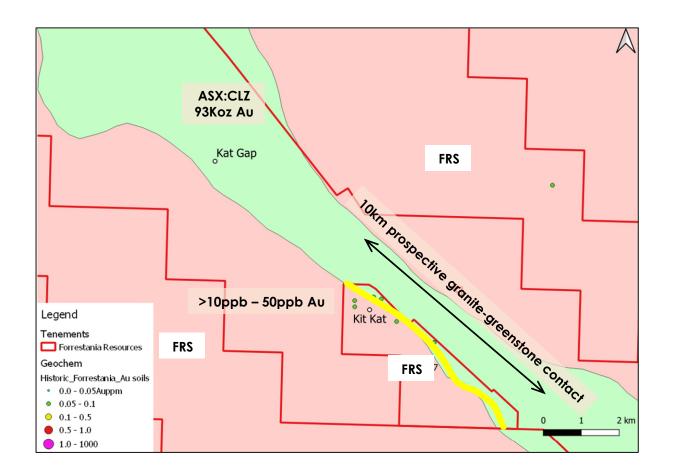

- ➤ 2019 RC drilling by ASX:FFR targeted suspected granite-greenstone contact "along strike" (NW-SE direction) of historic pits
- Analysis of drilling and geophysics suggests
 high-grade Au is controlled by
 "perpendicular" NE-SW structures
 - ► Turn the rig around!
- Stock-pile samples also returned up to 9.95g/t Au (ASX:FFR)
- ► FRS plan to test under pit and along strike
- Several untested structures nearby with similar potential

Great Southern Open Pit

Kit Kat Au: Southern Project Area

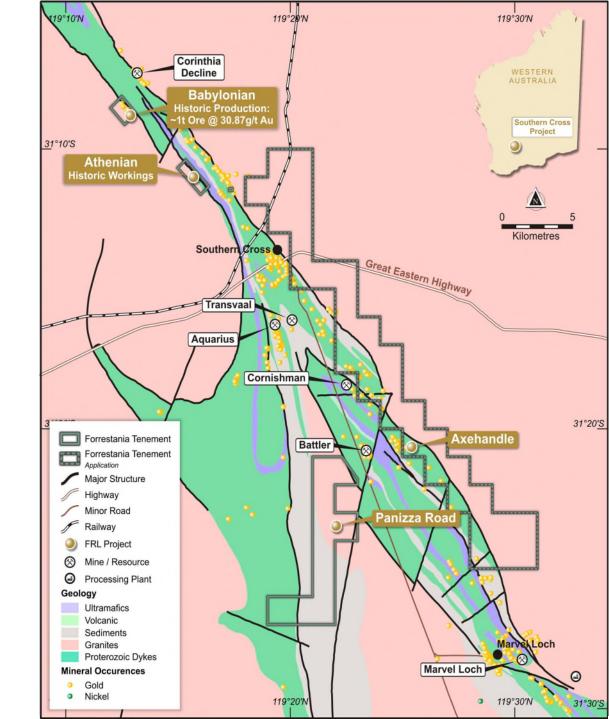

- ► Historic auger drilling identified 10-55ppb anomalies near granite-greenstone contact
- Directly along strike from ASX:CLZ's Kat Gap deposit
 - Recently announced 10m @ 40.54g/t Au fr. 26.5m incl. 0.5m @ 592g/t Au fr. 28.5m
- ▶ 2019 FFR SAM survey identified Kat Gap lookalike, however drilling failed to intersect targeted contact
- ► Priority walk-up RC targets identified:
 - ► ~10km of prospective granite-greenstone
 - structurally hosted Au in granite

Southern Cross Project

Background: established gold field

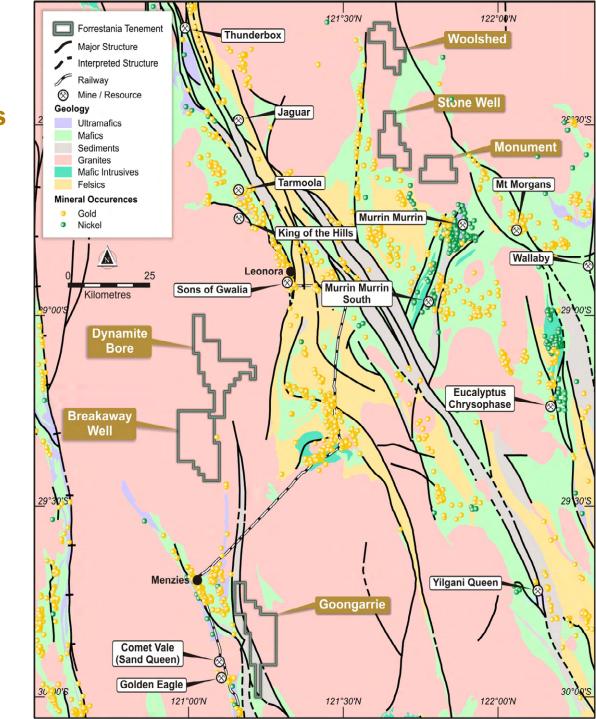

- ▶ Multiple targets across 128.8 km²
- Panizza Road
 - Early-stage Au geochemical anomaly
- ▶ Ghooli Dome
 - ► Au anomalies in granite
- Athenian and Babylonian artisanal underground mining
 - ▶ 1990 RC:
 - **2m** @ **2.75g/t Au** fr. 5m,
 - ▶ 5m @ 4.45g/t Au fr. 39m and
 - **> 3m @ 4.03g/t Au** fr. 39m

Leonora Project

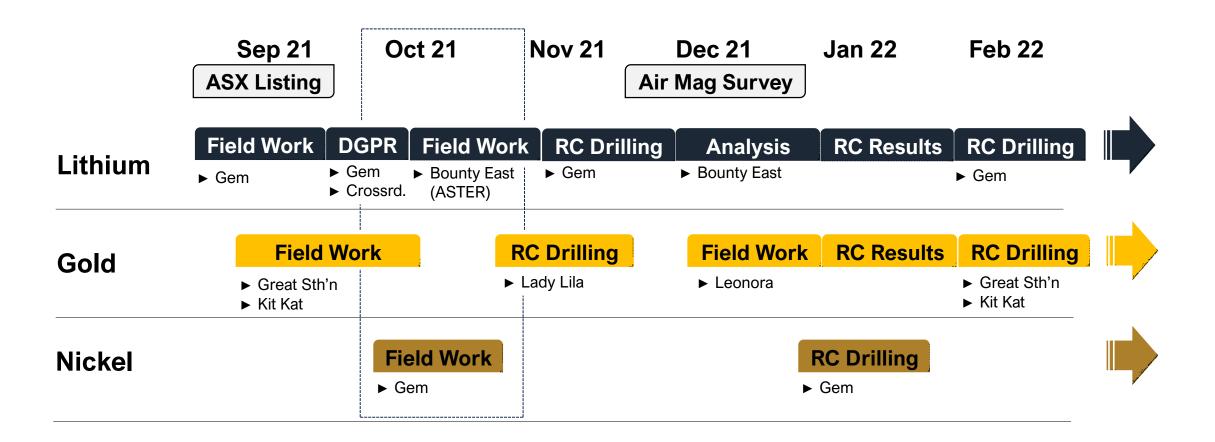

Background: Targeting granite hosted Au eposits

- ► 6 tenements covering 853km² of prospective granites
- ► Tenements acquired by team that made significant discoveries of Au in granite
- ▶ Recent work shown granite hosted Au deposits can potentially host +10Moz World class deposits
- Forrestania using leading tech to target World class Au deposits in internal granites
- ► Goongarrie and Woolshed Well priority targets
 - GSWA sampling across Tonkin Monzogranite and Felsic Intrusives have prospective "Sanukitoid" geochemical properties akin to Hemi and Tropicana
 - ► Au anomalies identified in historic Auger drilling
 - ▶ +1g/t bottom of hole assays in AC drilling

Work Programs

Strong pipeline of activity and news flow
