

SEPTEMBER 2021 QUARTERLY ACTIVITIES REPORT

HIGHLIGHTS

- *The Company is engaging with the ASX in respect to conditions for reinstatement*
- *Subsequent to Quarter end, the Company engaged GOMAC Projects Pty Ltd ("GOMAC") to conduct a concept study.*

BLACKALL COAL PROJECT

The Blackall Project consists of three main coal resource areas within MDL464, EPC1398 and EPC1399. It is located immediately to the south of the township of Blackall in central western Queensland.

These permits host a combined **JORC Total Coal Resource Estimate of 3.44 billion tonnes** of thermal quality coal. ^{Note 1}

The Company confirms that it is not aware of any new information or data that would materially affect the resources and all material assumptions and technical parameters underpinning the Resource estimates continue to apply and have not materially changed in the meantime.

Alternative strategies for development of the resource continue to be considered.

The Board continues to appraise the market outlook for thermal coal and monitor the rail and port infrastructure commitments by Galilee Basin projects, their impact on the potential development of the Blackall Project, as well as investigate and assess any other potential strategic opportunities available.

Note 1. See ASX announcement dated 10 July 2014 – "EER REPORTS 3.44 BILLION TONNE JORC RESOURCE".

Disclaimer: The Company confirms that it is not aware of any new information or data that would materially affect the resources and all material assumptions and technical parameters underpinning the Resource. Estimates continue to apply and have not materially changed in the meantime"

ASX: EER

East Energy Resources is a coal exploration and development company primarily focused in the Eromanga Basin in Queensland.

EER has combined Total JORC Resources of 3.44Bt of Thermal Coal (627.5Mt Indicated and 2817Mt Inferred) located south west of the major deposits of GVK Hancock Coal and Waratah Coal in the Galilee Basin.

GOMAC STUDY

Subsequent to quarter end, the Company advised that as part of its continuous efforts to explore strategies for the development of its Blackall Coal Project, it has engaged GOMAC Projects Pty Ltd ('GOMAC') to conduct a concept study to fully assess all available strategic options and opportunities to develop the Blackall Project.

GOMAC specialises in hydro-carbon project development and has extensive experience in undertaking preliminary studies and planning for a diverse portfolio of large and complex energy, infrastructure, and resources projects both in Australia and globally.

The objectives of the study are to identify a commercially viable route for EER to convert its coal resource into the following potential production opportunities:

- Synthetic natural gas (SNG)
- Hydrogen (H2)
- Coal to fertilisers (CTF)
- High energy, low emission (HELE) power
- Coal to liquids (CTL)
- Coal to chemicals (CTC)
- Combinations of the above

All of the above potential opportunities provide for carbon capture and sequestration/storage (CCS) to enable the Blackall Project to continue to progress with minimal carbon dioxide emission risks.

CORPORATE

Following on from the significant changes to the Board in the last quarter, the Company appointed Alastair Smith to join the Board as a Non-Executive Director on 12 July 2021.

The Company was originally placed into voluntary suspension on 17 September 2020, which has subsequently been extended a number of times to November 2021. The Company is engaging with the ASX in respect to conditions for reinstatement and will provide shareholders with an update by way of further ASX announcements.

Finance and Activities

During the quarter the Company undertook exploration activities including the assessment of the demand for thermal coal and the potential for further development of the coal resource within MDL 464 and the three EPCs covering the main body of the Blackall Coal Project, and some compliance activities with an associated cash outflow of approximately \$4,000.

There were no development or production activities.

As outlined in the attached Appendix 5B (section 6) during the quarter approximately \$25,000 in payments was made to related parties and their associates for director salaries, consultancy fees, superannuation and other related costs.

Strategic Opportunities

During the quarter, the Company continued to focus on reviewing new opportunities to enhance its project portfolio and increase the overall value proposition of EER and continued to review strategic options for development of the Blackall Project. The Company also continued to appraise the market outlook for thermal coal and monitor the rail and port infrastructure commitments by Galilee Basin projects and their impact on the potential development of the Blackall Project.

This Report has been authorised for release by the Board of Directors of East Energy Resources Ltd.

See ASX announcement dated 10 July 2014 – “EER REPORTS 3.44 BILLION TONNE JORC RESOURCE”.

Disclaimer: The Company confirms that it is not aware of any new information or data that would materially affect the resources and all material assumptions and technical parameters underpinning the Resource. Estimates continue to apply and have not materially changed in the meantime”

Competent Persons Statement – EPC 1399 Resources

The information in this report relating to estimates of Mineral Resources within EPC1399, is based on information compiled by Mr Peter Tighe who is a member of the Australian Institute of Mining and Metallurgy. Mr Tighe is a geological consultant to East Energy Resources Limited. Mr Tighe has had over 30 years’ experience in exploration, mining and resource evaluation and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify as Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Tighe consents to the inclusion in the report of the matters based on the information, in the form and context in which it appears.

Competent Persons Statement – EPC 1398 Resources

The information in this announcement relating to the estimates of Mineral Resources within EPC 1398 is based on the 2004 JORC code and information reviewed by Mr Bill Knox, who is a Member of The AusIMM. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Mr Knox has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Knox consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

Competent Persons Statement – EPC 1149 Resources

The Coal Resource estimation for the Blackall Project (EPC 1149) presented in this announcement has been carried out in accordance with the principles and guidelines of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2004) and the Australian Guidelines for Estimating and Reporting of Inventory Coal, Coal Resources and Coal Reserves, 2003. The information in the announcement to which this statement is attached, that relates to East Energy's Blackall Coal Resource on EPC 1149 is based on information reviewed by Dr Gerard McCaughan, who is a Member of The AusIMM and is a full time employee of SRK. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Dr McCaughan has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the JORC Code. Dr McCaughan consents to the inclusion in the announcement of the matters based on this information in the form and context in which it appears.

Competent Persons Statement – Exploration Targets

The information in this announcement relating to Exploration Targets within EPC 1398 and EPC 1399 is based on information compiled by Mr Peter Tighe who is a Member of The AusIMM and a geological consultant to East Energy Resources Ltd. Mr Tighe has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Tighe consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

Forward Looking Statements

This Announcement may contain forward looking statements. The words 'anticipate', 'believe', 'expect', 'project', 'forecast', 'estimate', 'likely', 'intend', 'should', 'could', 'may', 'target', 'plan' and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. Forward-looking statements are subject to risk factors associated with the Company's business, many of which are beyond the control of the Company. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially from those expressed or implied in such statements. There can be no assurance that actual outcomes will not differ materially from these statements. You should not place undue reliance on forward-looking statements and neither East Energy Resources Limited nor any of its directors, employees, servants, advisers or agents assume any obligation to update such information.

The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcement.
