

Chief Development Officer Appointed

Highlights:

- **Province secures oil and gas professional Cameron Bateman to drive the development of its projects.**
- **Cameron is an engineer with 30 years Australian and international experience in early development.**
- **Appointment of Cameron will help drive the development of the HyEnergy™ green hydrogen project in the Gascoyne.**

Province Resources has completed a key appointment with experienced engineer Cameron Bateman joining the company as Chief Development Officer.

Cameron brings over 30 years of Australian and International experience to the team and adds significant development capability to the company.

He is passionate about value creation in the early development phases of projects, leveraging innovation, technology and pragmatic solutions to drive towards optimal project outcomes.

Cameron has successfully worked on and delivered numerous projects such as commercial developments, infrastructure projects, minerals processing and LNG developments.

From 2006 to 2020 he worked for Woodside Energy where he held numerous senior roles including LNG Development Manager and Portfolio Manager for Oil and Gas Technology.

As the Development Manager for Woodside's proposed Canadian LNG Opportunities, Cameron was responsible for all aspects for the proposed novel onshore and floating LNG concepts. This required working closely with technical partners as well as First Nation groups, the government, other community stakeholders and joint venturers.

Cameron has previously worked for various internationally recognised service providers including Worley and Arup.

He holds a Bachelor of Engineering (Civil) from the University of Western Australia, a Graduate Diploma of Finance and Investment through FINSIA and is a Member of Engineers Australia.

Province Resources Managing Director David Frances said the company's development capability was significantly enhanced by Cameron's appointment.

"Cameron brings 30 years of experience to the table and has the expertise required to lead our development activities.

"His appointment at the early stages of our HyEnergy™ green hydrogen project will ensure we are focused on producing the right project outcomes.

"We are excited to have someone with Cameron's credentials share our enthusiasm for the development of green hydrogen and thrilled that he is joining the Province team."

This announcement has been approved for release by the Board.
