

Zimi integrates with leading smart home automation provider, RTI

ASX RELEASE

29 November 2021

Zimi Ltd (ASX:ZMM) ("Zimi", the "Company") is delighted to announce it has integrated its platform with leading custom automation provider, Remote Technologies Inc ("RTI"). This integration means that RTI users can complement their automation solutions with the complete Zimi range of devices, all of which can be controlled through the RTI platform.

Founded in the USA in 1992, RTI is a leading innovator in the control and automation industry and has won numerous awards for hardware and software products. The award-winning RTI portfolio of products enables integrators to deliver exceptional and personalised control solutions to their customers.

RTI has been operating in Australia for more than fifteen years. The integration means Zimi products will be offered to RTI's 500 plus dealers across Australia. At the same time, Zimi is establishing a display suite at its headquarters in Helensvale which will allow partners to experience the integration firsthand. The integration with RTI therefore opens up a complementary sales channel and broadens the range of market opportunities available to Zimi. This is the second integration Zimi has announced following its integration with Polyaire¹ and represents an important part of the strategy to expand the available ecosystem.

Zimi's CEO, Brett Savill, commented: 'We are really excited to be working with RTI, a global market leader in custom automation. To date Zimi has not focused on the integrators, but we now have access to a new channel of high end residential and commercial market opportunities that were not available to us before.'

This release has been approved by the board.
