Civmec's Order Book Exceeds A\$1.15b with New Projects

PERTH, SINGAPORE 9th December 2021 - Civmec Limited ("Civmec" or the "Company") has been issued with a notice of award for a major construction contract in the resources sector as well as several infrastructure and maintenance projects, raising its order book to more than A\$1.15 billion.

The major construction contract is for the Mount Holland lithium project in Western Australia being undertaken by subsidiaries of Wesfarmers (ASX: WES) and Sociedad Química y Minera de Chile S.A. (NYSE: SQM) through their 50:50 joint venture manager Covalent Lithium Pty Ltd.

The Mount Holland mine site will produce lithium concentrate, which will be transported to a refinery that Civmec has been tasked to construct. The refinery, to be located at Kwinana in Western Australia and within 10 km of Civmec's flagship heavy engineering facilities in Henderson, will convert the lithium concentrate into high-purity lithium hydroxide monohydrate. The scope of work being undertaken covers most disciplines performed by Civmec including structural and piping fabrication, SMP erection, refractory lining, insulation and E&I installation works.

Civmec expects to commence work on this project in 2022. Completion is expected in 2024.

Infrastructure and Maintenance Projects

For the infrastructure contract, Civmec will build a bridge as part of Transport for NSW (TfNSW) \$2.6 billion Sydney Gateway road project. The project, when completed, will provide high-capacity connection from St Peters interchange to Sydney Airport and toward the M5 and Eastern Distributor, and is set to open to traffic at the end of 2024. The works will be carried out at Civmec's Newcastle facility in New South Wales

The company has also continued to make traction in our efforts to secure more market share in the Maintenance area on both the East and West coast of the country with a new contract award for maintenance services for Glencore's Murrin Murrin operations

The Company is also getting more work for maintenance and shutdowns from long-term client Roy Hill. It also recently completed work for a nickel producer in the Goldfields of Western Australia.

Civmec's Chief Executive Officer, Mr Patrick Tallon, said: "Demand for heavy engineering and construction services in the private and public sectors in Australia remains strong and these new contracts underscore, yet again, our strength as a top-tier contractor. Our efforts to generate more recurring income are also paying off as we are getting more work involving maintenance and capital works from both existing and new clients."

This announcement is authorised for release to the SGX and ASX by Civmec's Board of Directors.
