## ASX ANNOUNCEMENT

ASX: TMG

### Investor Presentation

Trigg Mining Limited (**ASX: TMG**) (**Trigg** or the **Company**) is pleased to release a copy of its latest Investor Presentation.

This announcement was authorised to be given to ASX by the Board of Directors of Trigg Mining Limited.

**Keren Paterson**  
Managing Director & CEO  
Trigg Mining Limited

# Company Presentation

## Potential Top 10 Global Sulphate of Potash Producer

19 January 2022

*Trigg Mining: Building mines communities can be proud of*

# DISCLOSURES AND DISCLAIMERS

This presentation (**Presentation**) is for informational purposes only and is not a prospectus, disclosure document or offer document under the Corporations Act 2001 (Cth) (**Corporations Act**) or any other law. This Presentation does not constitute, and is not to be construed as, an offer to issue or sell, or a solicitation of an offer or an invitation to subscribe for, buy or sell securities in Trigg Mining Limited ACN 168 269 752 (ASX:TMG) (**Trigg** or the **Company**). The material contained in this Presentation is of general information about the activities of the Company current as at the date of this Presentation. It is provided as a summary and does not purport to be complete.

To the extent permitted by law, no responsibility for any loss arising in any way (including by way of negligence) from anyone acting or refraining from acting as a result of this material is accepted by the Company, including any of its related bodies corporate. This Presentation is not a financial product and does not consider the investment objectives, taxation situation, financial situation or needs of individuals. You should not rely upon it as advice for investment purposes, as it does not take into account your investment objectives, financial position or needs. These factors should be considered, with or without professional advice, when deciding if an investment is appropriate.

## Cautionary Statement

The Scoping Study referred to in this Presentation is based on the Scoping Study released by Trigg to ASX on 05 October 2021 titled “Positive Scoping Study for Lake Throssell Sulphate of Potash Project following Mineral Resource Upgrade”(Scoping Study Announcement).

The Company advises the Scoping Study referred to in this Presentation has been undertaken to determine the potential viability of the Lake Throssell Sulphate of Potash Project (the **Project**) in Western Australia. The Scoping Study is a preliminary assessment based on low accuracy technical and economic assessments ( $\pm 25\text{-}35\%$  Class 5). It is insufficient to support the estimation of Ore Reserves or to provide assurance of an economic development case at this stage, or to provide certainty that the conclusions of the Scoping Study will be realised. Further exploration and evaluation work and appropriate studies are required before the Company will be able to estimate any Ore Reserves or to provide any assurance of an economic development case.

The Scoping Study is based on the material assumptions outlined in the Scoping Study announcement. These include assumptions about the availability of funding. While the Company considers all of the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the Scoping Study will be achieved.

The Inferred and Indicated Mineral Resource estimate underpinning the production target was prepared by a competent person in accordance the JORC Code (2012). Over the payback period 82% of the production target is sourced from Indicated and 18% from Inferred Drainable Mineral Resources. Over the life of mine 70% of the production target is derived from Indicated Drainable Resources and 41% of the Total Drainable Mineral Resource estimate is scheduled over the life of mine. The inclusion of the Inferred Drainable Mineral Resource in the production target does not impact technical or financial viability. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Measured or Indicated Mineral Resources or that the Production Target or preliminary economic assessment will be realised.

To achieve the range of outcomes indicated in the Study, funding for capital and working capital requirements in the order of \$412 million will likely be required. Investors should note that there is no certainty that the Company will be able to raise that amount of funding when needed. It is also possible that such funding may only be available on terms that may be dilutive to or otherwise affect the value of Trigg’s existing shares. It is also possible that Trigg could pursue other ‘value realisation’ strategies such as a sale, partial sale or joint venture of the Project. If it does, this could materially reduce Trigg’s proportionate ownership of the Project.

The Scoping Study results contained in this Presentation relate solely to the Project and does not include Exploration Targets or Mineral Resources defined elsewhere. The Company has concluded it has a reasonable basis for providing the forward-looking statements included in this Presentation.

The Project will need environmental approvals and the grant of a mining lease. Although the Company currently sees no impediment to acquiring these, there is no guarantee that the Company will be able to obtain these or obtain them within the timeframe proposed in the Project development schedule. Given the uncertainties involved, investors should not make any investment decision based solely on the results of the Scoping Study.

# DISCLOSURES AND DISCLAIMERS cont.

## Forward Looking Statements

This Presentation contains 'forward-looking statements' that are based on TMG's expectations, estimates and projections as of the date on which the statements were made. These forward-looking statements include, among other things, statements with respect to prefeasibility and definitive feasibility studies, TMG's business strategy, plans, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations, mineral reserves and resources, results of exploration and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'potential', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this Presentation are cautioned that such statements are only predictions, and that TMG's actual future results or performance may be materially different. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause TMG's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is developed based on assumptions about such risks, uncertainties and other factors set out herein, including but not limited to the risk factors set out in the Scoping Study Announcement. The forward-looking statements included in this document speak only as of the date of this Presentation. Except where required by law or the ASX Listing Rules, the Company doesn't intend to update or revise the forward-looking statements in this Presentation in the future.

## Key Assumptions

Average LOM AUD/USD exchange rate of 0.73, SOP Price of US\$550/t LOM and 8% discount rate. All dollar values are in Australian dollars (A\$ or AUD) unless otherwise stated. Figures, amounts, percentages, estimates, calculations of value and other factors used in his presentation are subject to the effect of rounding.

## Competent Person Statement

The Mineral Resource Estimate was first announced, together with a Competent Person's Statement from Mr Adam Lloyd of Aquifer Resources Pty Ltd, on 05 October 2021 in the announcement titled "Positive Scoping Study for Lake Throssell Sulphate of Potash Project following Mineral Resource Upgrade". The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources, Exploration Target or Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements; and that the information in the announcement relating to exploration results is based upon, and fairly represents the information and supporting documentation prepared by the named Competent Persons.

## Production Targets and Financial Forecasts

The production target was first announced on 05 October 2021 in the announcement titled "Positive Scoping Study for Lake Throssell Sulphate of Potash Project following Mineral Resource Upgrade". The Company confirms that it is not aware of any new information or data that materially affects the assumptions underpinning the production target or the forecast financial information derived from the production target.

## Acceptance

By attending an investor presentation or briefing, accessing or reviewing this document you acknowledge and agree to the "Disclosure and Disclaimers" set out above.

# TIER 1 PROJECT AND LOCATION

## LARGE, HIGH-GRADE DEPOSIT

- Total drainable Mineral Resource<sup>1</sup> - 14.4Mt @ 10.4kg/m<sup>3</sup> K<sub>2</sub>SO<sub>4</sub> or SOP
- Including Indicated drainable Resource - 4.2Mt @ 10.6kg/m<sup>3</sup> K<sub>2</sub>SO<sub>4</sub>
- Further upside potential with additional Exploration Target

## EXCELLENT TRANSPORT LOGISTICS

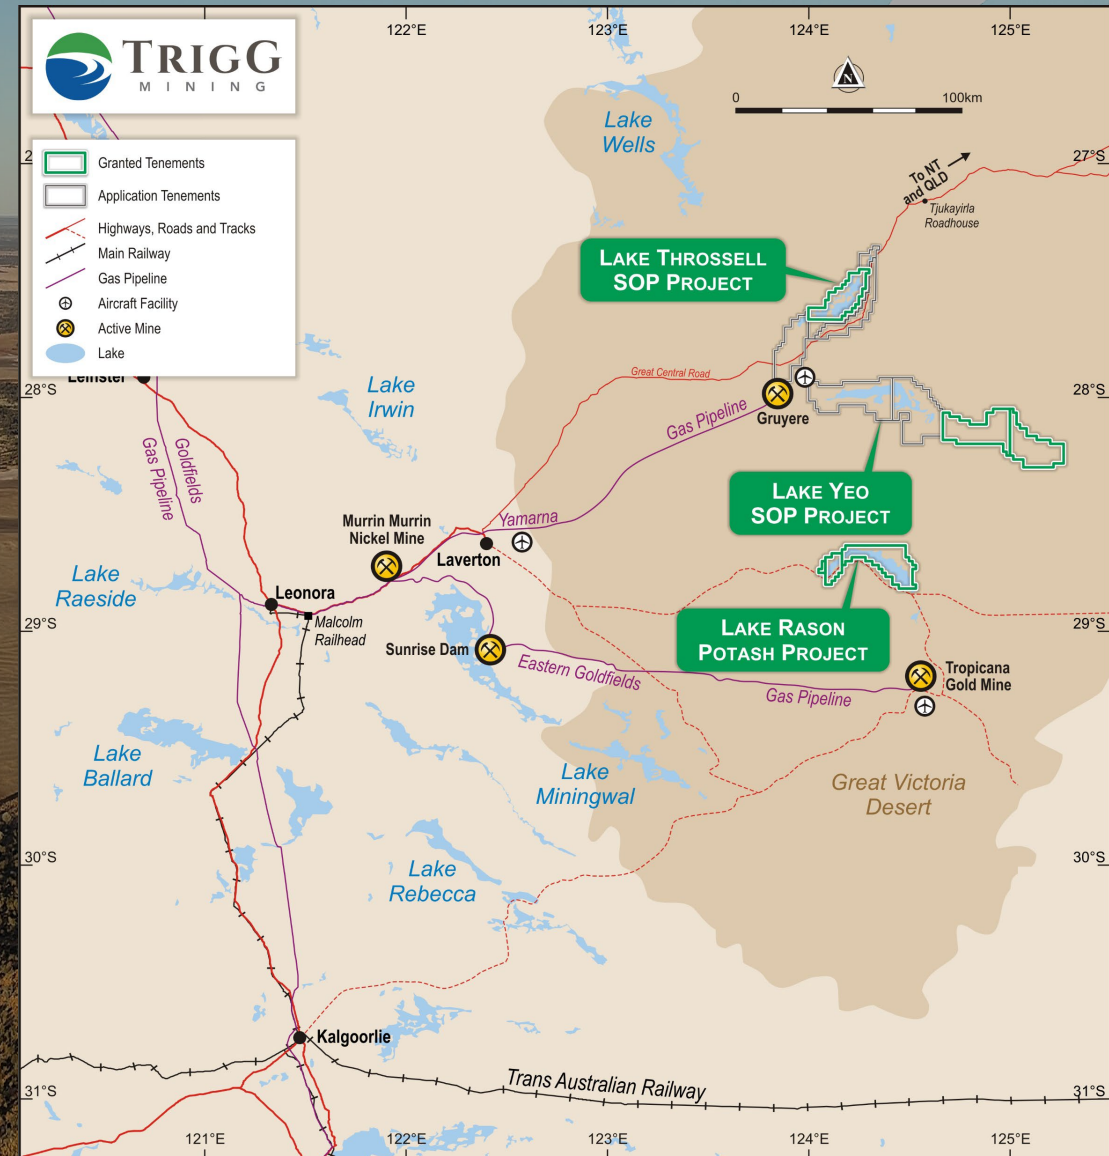

- 350km to Leonora on bitumen<sup>2</sup>, then
- 900km rail to Fremantle, WA

## TRULY SUSTAINABLE MINING

- Solar evaporation of saline brine (no open pit or rock waste dump)
- Producing a natural mineral fertiliser needed for food production and carbon farming

1. See Appendix A

2. Trigg anticipates the sealing of the Laverton to Lake Throssell section of the Outback Way Highway upgrade, currently underway, will be completed prior to first production.

# SCOPING STUDY HIGHLIGHTS<sup>3</sup>

## THE LAKE THROSSELL SULPHATE OF POTASH PROJECT

### Key Physical Assumptions

- LOM Production Target – 5.9Mt @10.4kg/m<sup>3</sup> SOP
- LOM Schedule – 41% Total drainable Mineral Resource
- Overall Recovery – 82%

<sup>3</sup>. Note scoping study economics assume a WA Government royalty of \$0.73/t in the operating cost

Nameplate  
Production

**245ktpa**

# RAPIDLY RISING PRICES

SCOPING STUDY - USD550/t

CURRENT GRANULAR PRICE -  
>USD850/t (+60%)

SCOPING STUDY NPV SENSITIVITY -  
+\$144M / 10% increase in price<sup>4</sup>

## PRICE RISE DUE TO

- Surging crop prices
- Supply side constraints
- Mannheim input costs
  - Energy
  - Muriate of Potash
  - Sulphuric Acid

4. See ASX Release Positive Scoping Study on Lake Throssell and MRE Upgrade dated 05/10/2021

NW Europe Benchmark - Standard SOP & MOP, Scoping Study Assumption plus SOP Premium

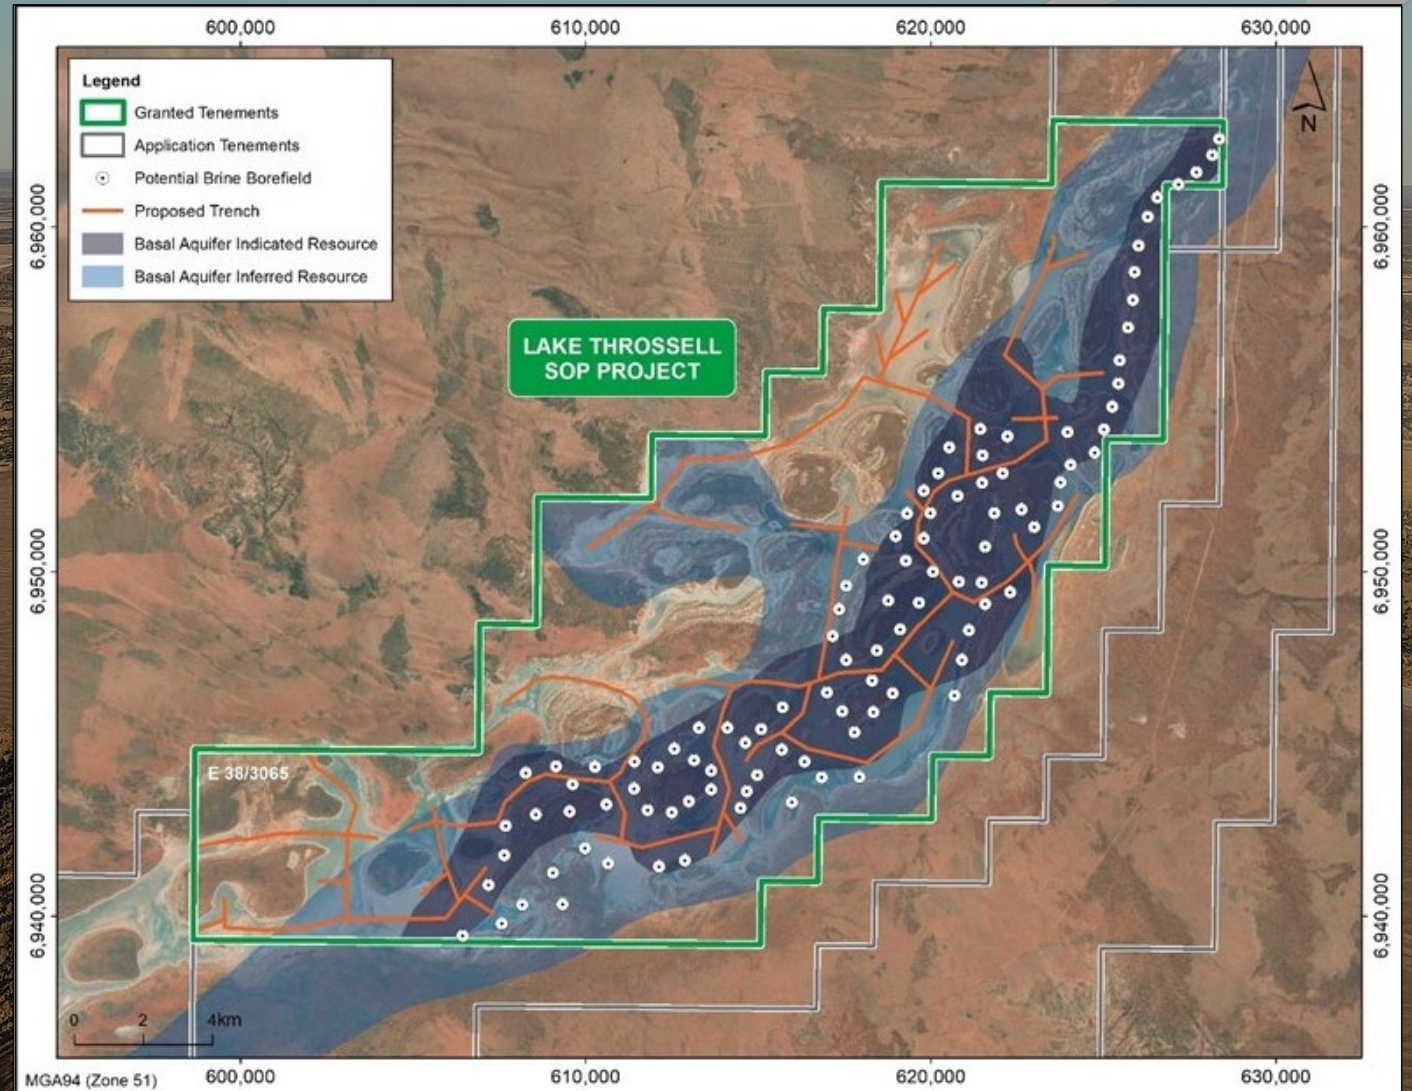

Source: Argus Media – Potash (18/01/2022)

# PRODUCTION

## FROM TRENCHES AND BORES

- 110km trenches
- 22 bores, increasing to 112 over the mine life

# CROSS SECTION

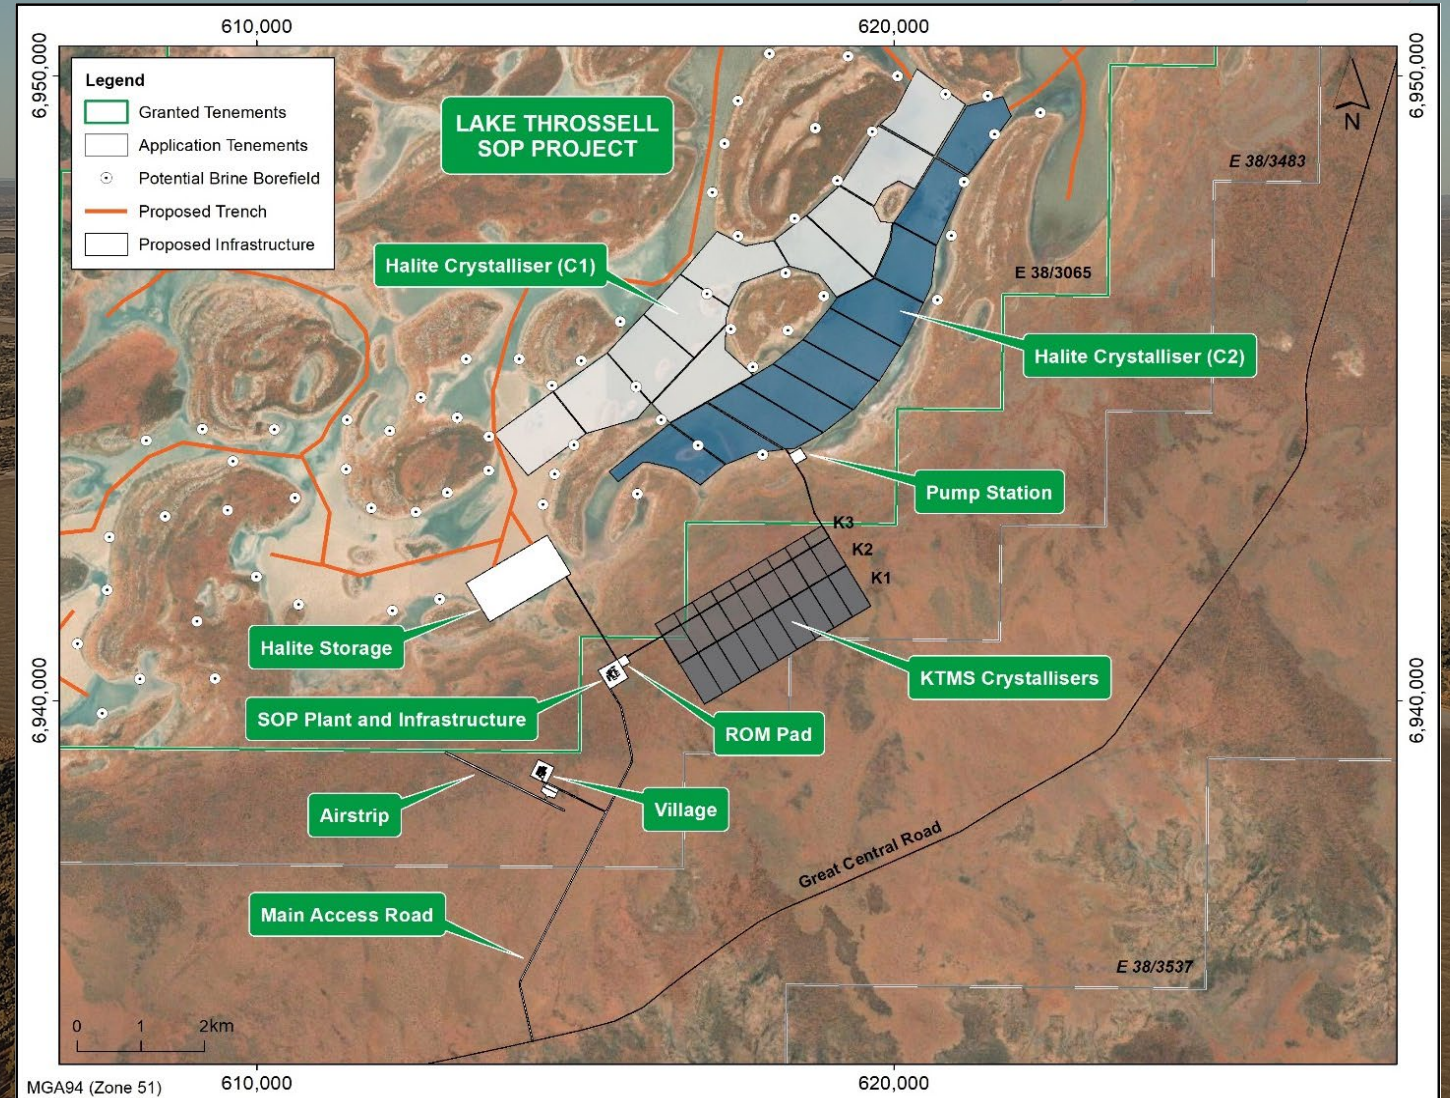

- 5km wide palaeovalley
- ~36km long
- Up to 150m in depth

# SITE LAYOUT

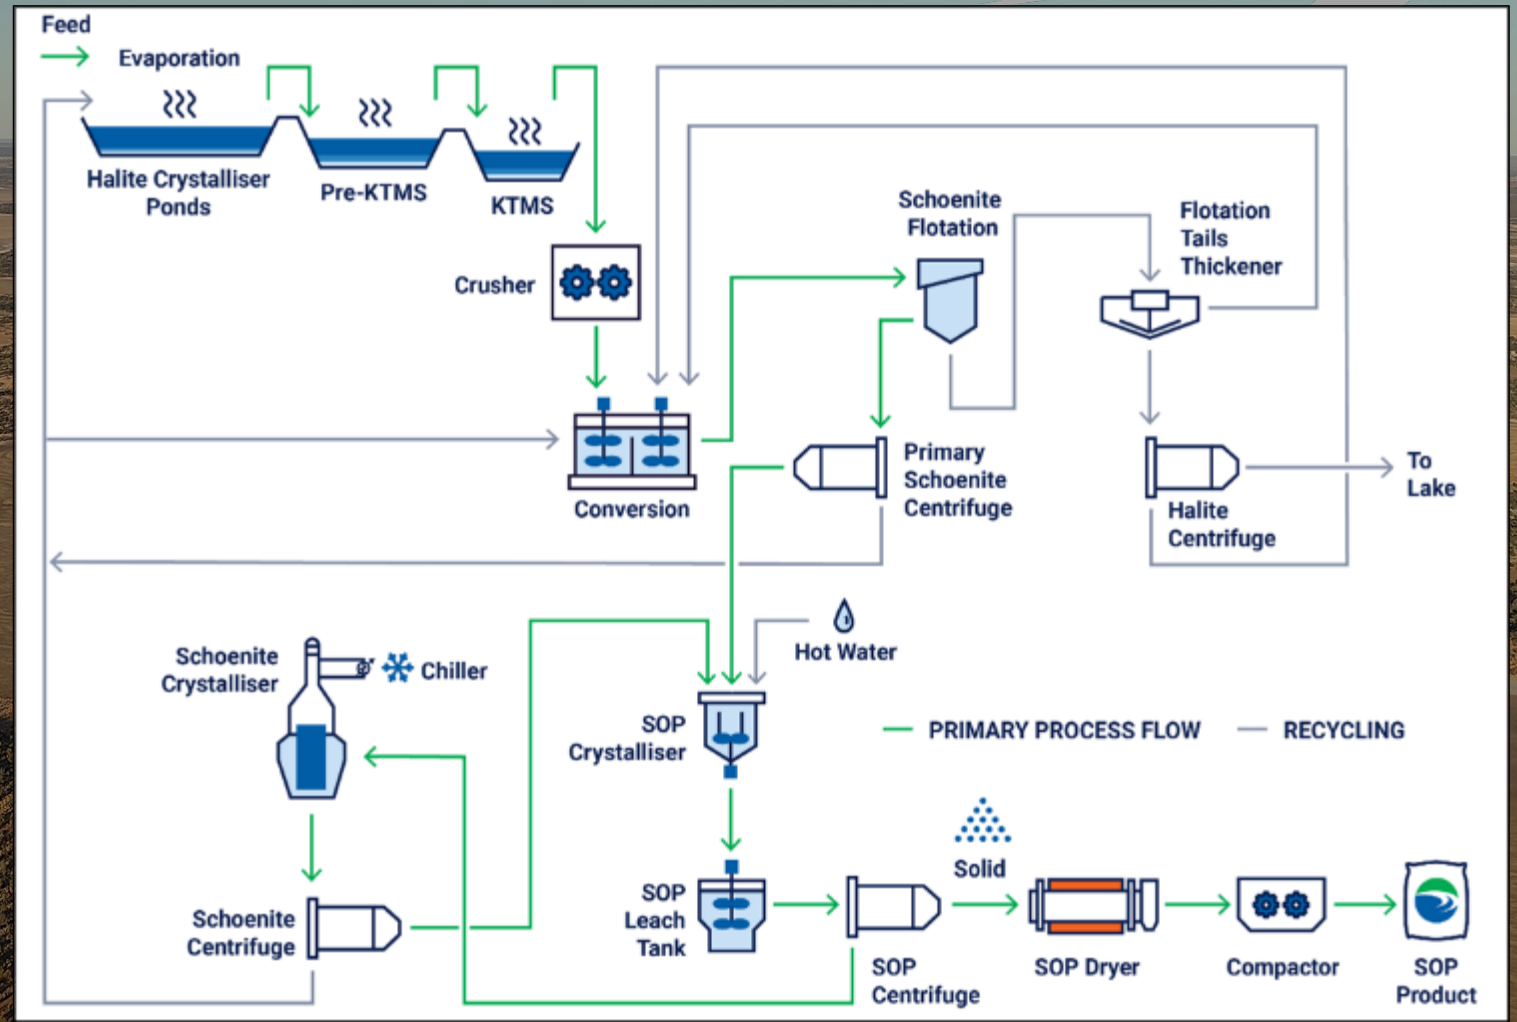

- On and off-lake evaporation ponds minimise environmental footprint

# PROCESS FLOWSHEET

USING COMMERCIALLY PROVEN TECHNOLOGY

# BENCHMARKED CAPITAL COSTS

## LEARNING FROM THE PEERS

5. USD capital costs and operating costs amounts were converted to AUD using the FX rate quoted in the respective study. If no FX rate was provided, a spot rate of 0.76 was used as per June 2021.

See Appendix C for a list of sources. Kalium Lakes Limited's FEED, Project Update and Feasibility Study Opex figures have not been quoted in their respective ASX announcements (only AISC) and therefore are not included in the above figure.

# BENCHMARKED OPERATING COSTS

LEARNING FROM THE PEERS

6. USD capital costs and operating costs amounts were converted to AUD using the FX rate quoted in the respective study. If no FX rate was provided, a spot rate of 0.76 was used as per June 2021.

See Appendix C for a list of sources. Kalium Lakes Limited's FEED, Project Update and Feasibility Study Opex figures have not been quoted in their respective ASX announcements (only AISC) and therefore are not included in the above figure.

# LAKE THROSSELL EXPLORATION

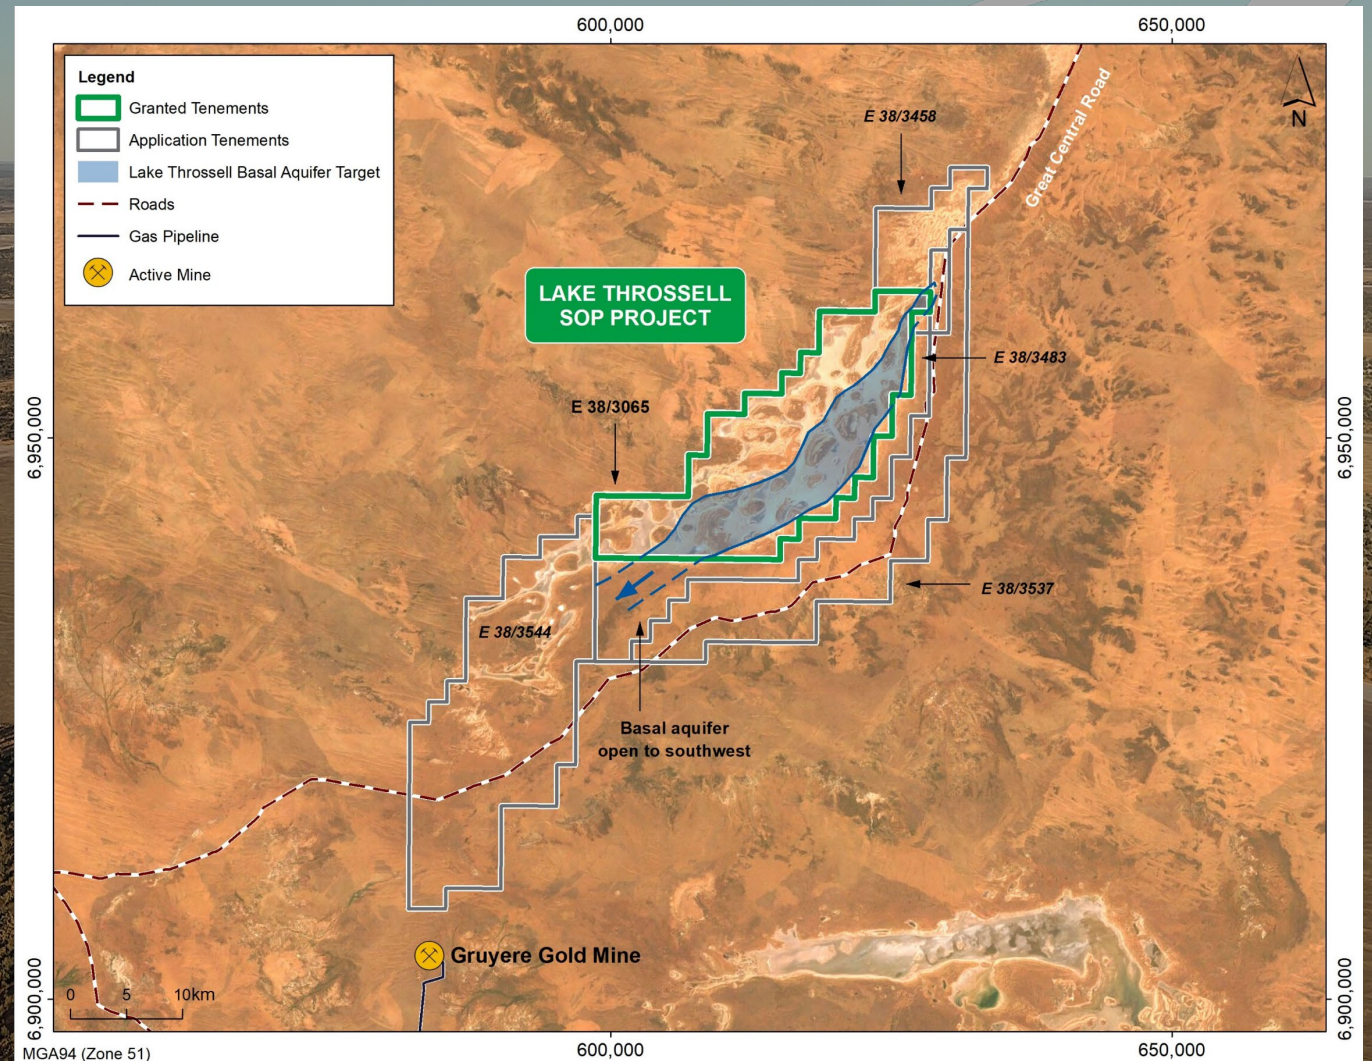

## UPSIDE

Total Drainable Mineral Resource  
Estimate<sup>7</sup> OF 14.4Mt @ 10.4kg/m<sup>3</sup> K<sub>2</sub>SO<sub>4</sub>  
(or SOP)

Plus an Exploration Target of  
2.6 – 9.4Mt @ 9.5 – 10.0kg/m<sup>3</sup> K<sub>2</sub>SO<sub>4</sub>.

The potential quantity and grade of the Exploration Target is conceptual in nature. There has been insufficient exploration in these areas to estimate a Mineral Resource. It is uncertain if further exploration will result in the estimation of a Mineral Resource.

<sup>7</sup> See Appendix A

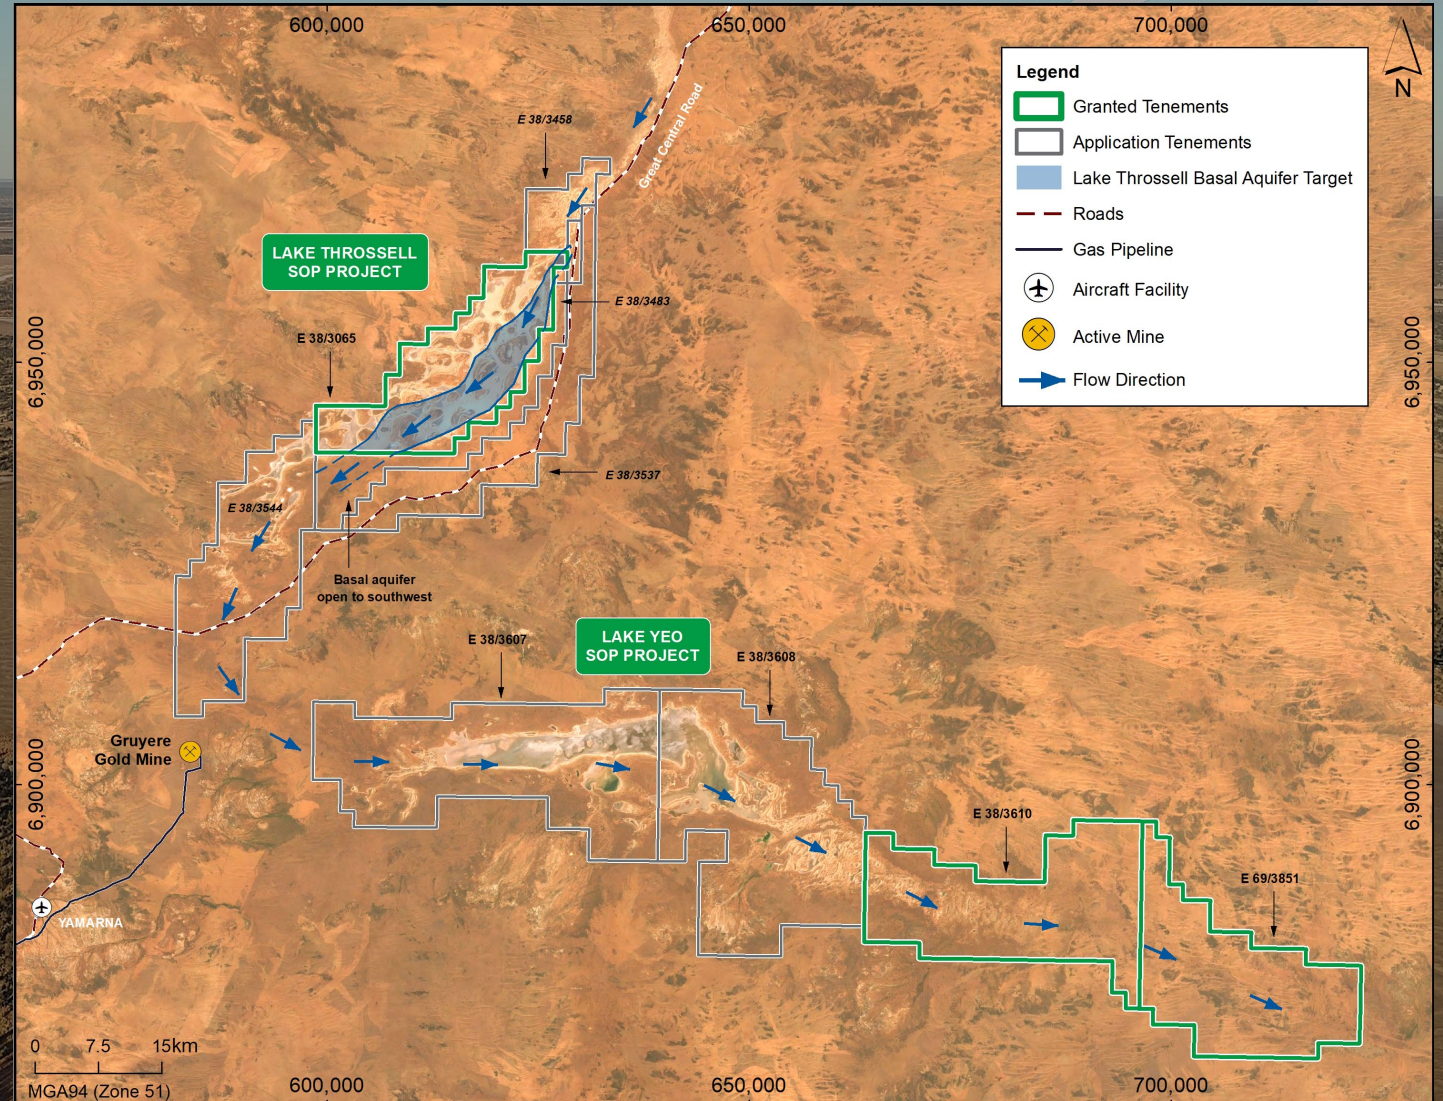

# LAKE YEO EXPLORATION

## POTENTIAL LAKE THROSSSELL REPEAT

- From 35km to the south of Lake Throssell in the same interpreted palaeovalley
- Project covers 1,915km<sup>2</sup> including more than 200km<sup>2</sup> of playa lake and almost 130km of strike
- Radiometric potassium<sup>8</sup> is elevated at the lake surface compared to surrounding regolith and to a greater extent than Lake Throssell
- The Aster Gypsum Index<sup>8</sup> (SO<sub>4</sub>) also shows elevated levels at surface
- Maiden gravity survey – fieldwork completed, awaiting interpretation of results

8. Department of Mines, Industry Regulation and Safety Imagery Web Map Service, accessed 22/04/21

# WHY SULPHATE OF POTASH?

SOP (Potassium Sulphate,  $K_2SO_4$ ) is an essential fertiliser for high-value, chloride sensitive crops such as fruit, vegetables, avocados, coffee beans, grapes, tree nuts, cocoa, anything grown under glass and in arid and acidic soils.

## **Vs. MURIATE OF POTASH (MOP)**

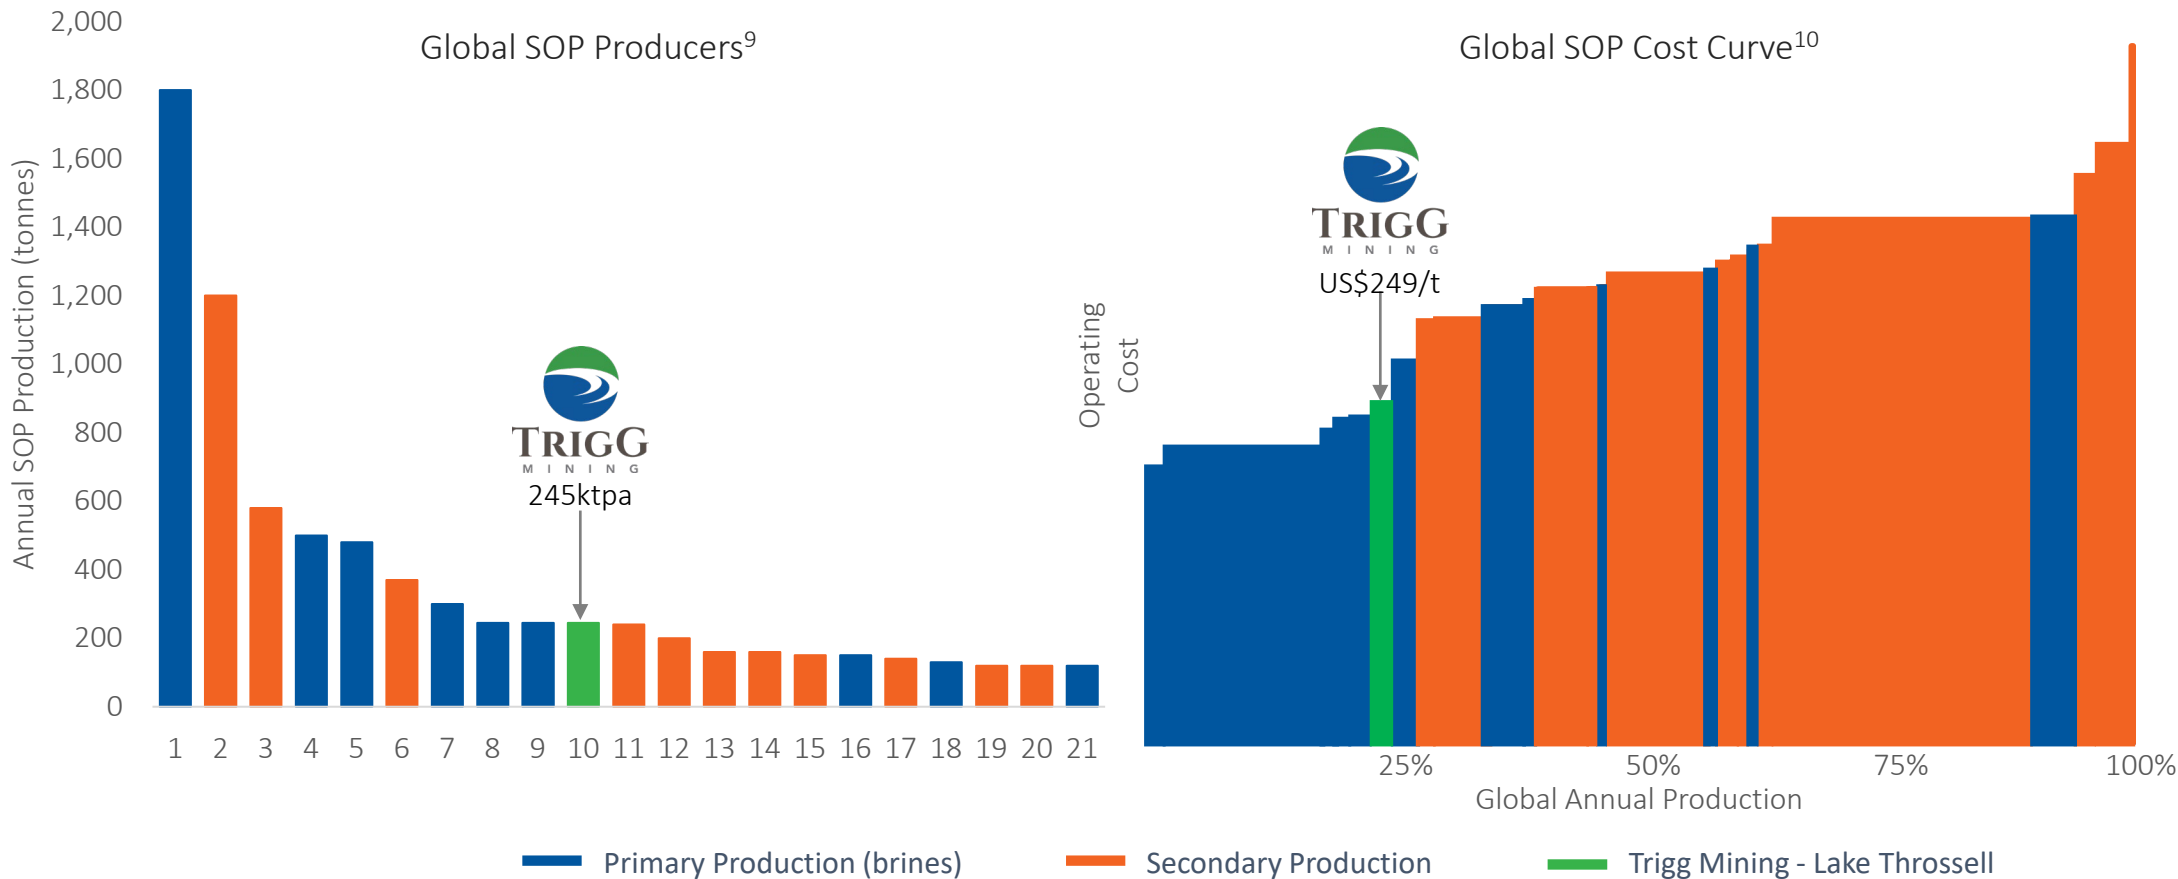

Muriate of Potash (Potassium Chloride) is a cheaper, more abundant source of potash, BUT it contains almost 50% chloride which is detrimental to chloride-sensitive crops and arid soils. MOP also contains no sulphur: another important mineral for crops.

# LAKE THROSSELL, A WORLD-CLASS ASSET

POTENTIAL TOP-10 PRODUCER, AND LOWEST-COST QUARTILE

Secondary production: Mannheim process – MOP (KCl) + sulphuric acid ( $H_2SO_4$ ), heated to  $\sim 800^{\circ}C$ . Produces Hydrochloric acid (HCl) + SOP ( $K_2SO_4$ ). Mannheim product is needed to meet global demand, creating an industry price floor well-above the cost of brine sources.

9. Global 2025 forecast production rates, showing Lake Throssell SOP Project (Source: CRU July 2021, Trigg analysis)

10. Global 2024 SOP Industry FOB cost curve (Source: CRU July 2021, Trigg analysis)

# FERTILISERS AND AGRICULTURE COMMODITY PRICES ARE BOOMING

12-month Change in Commodity Prices

As at 17 January 2022, for sources see Appendix B

# LAKE THROSELL - A TRULY SUSTAINABLE MINE

A project of local, national and global significance

## ENVIRONMENT

### Mining

- ✓ Harvesting naturally occurring potassium-rich brine (drainable resource only)
- ✓ No large open pit or rock waste dumps
- ✓ Harvesting solar energy through evaporation and 15-20% solar electricity generation
- ✓ Low greenhouse gas emissions - 0.17t CO<sub>2</sub>equiv/t SOP with pre-feasibility to investigate further minimisation

### Agriculture

- ✓ Producing a high-quality, highly efficient potassium fertiliser, improving:
  - Carbon farming outcomes
  - Soil and water-way health
  - Drought tolerance of crops
  - Frost resistance of crops
  - Quality of produce
  - Nutritional benefit

## SOCIAL

- ✓ Creating employment opportunities for >21 years
  - 250 construction jobs
  - 125 permanent roles (114 site-base)
- ✓ State & Federal taxes, Native Title and State royalty payments
- ✓ Potential for sustained community programs to deliver real and meaningful outcomes for Traditional Owners
- ✓ Mine closure planning – from the beginning
- ✓ 40% of Board and senior leadership team are women

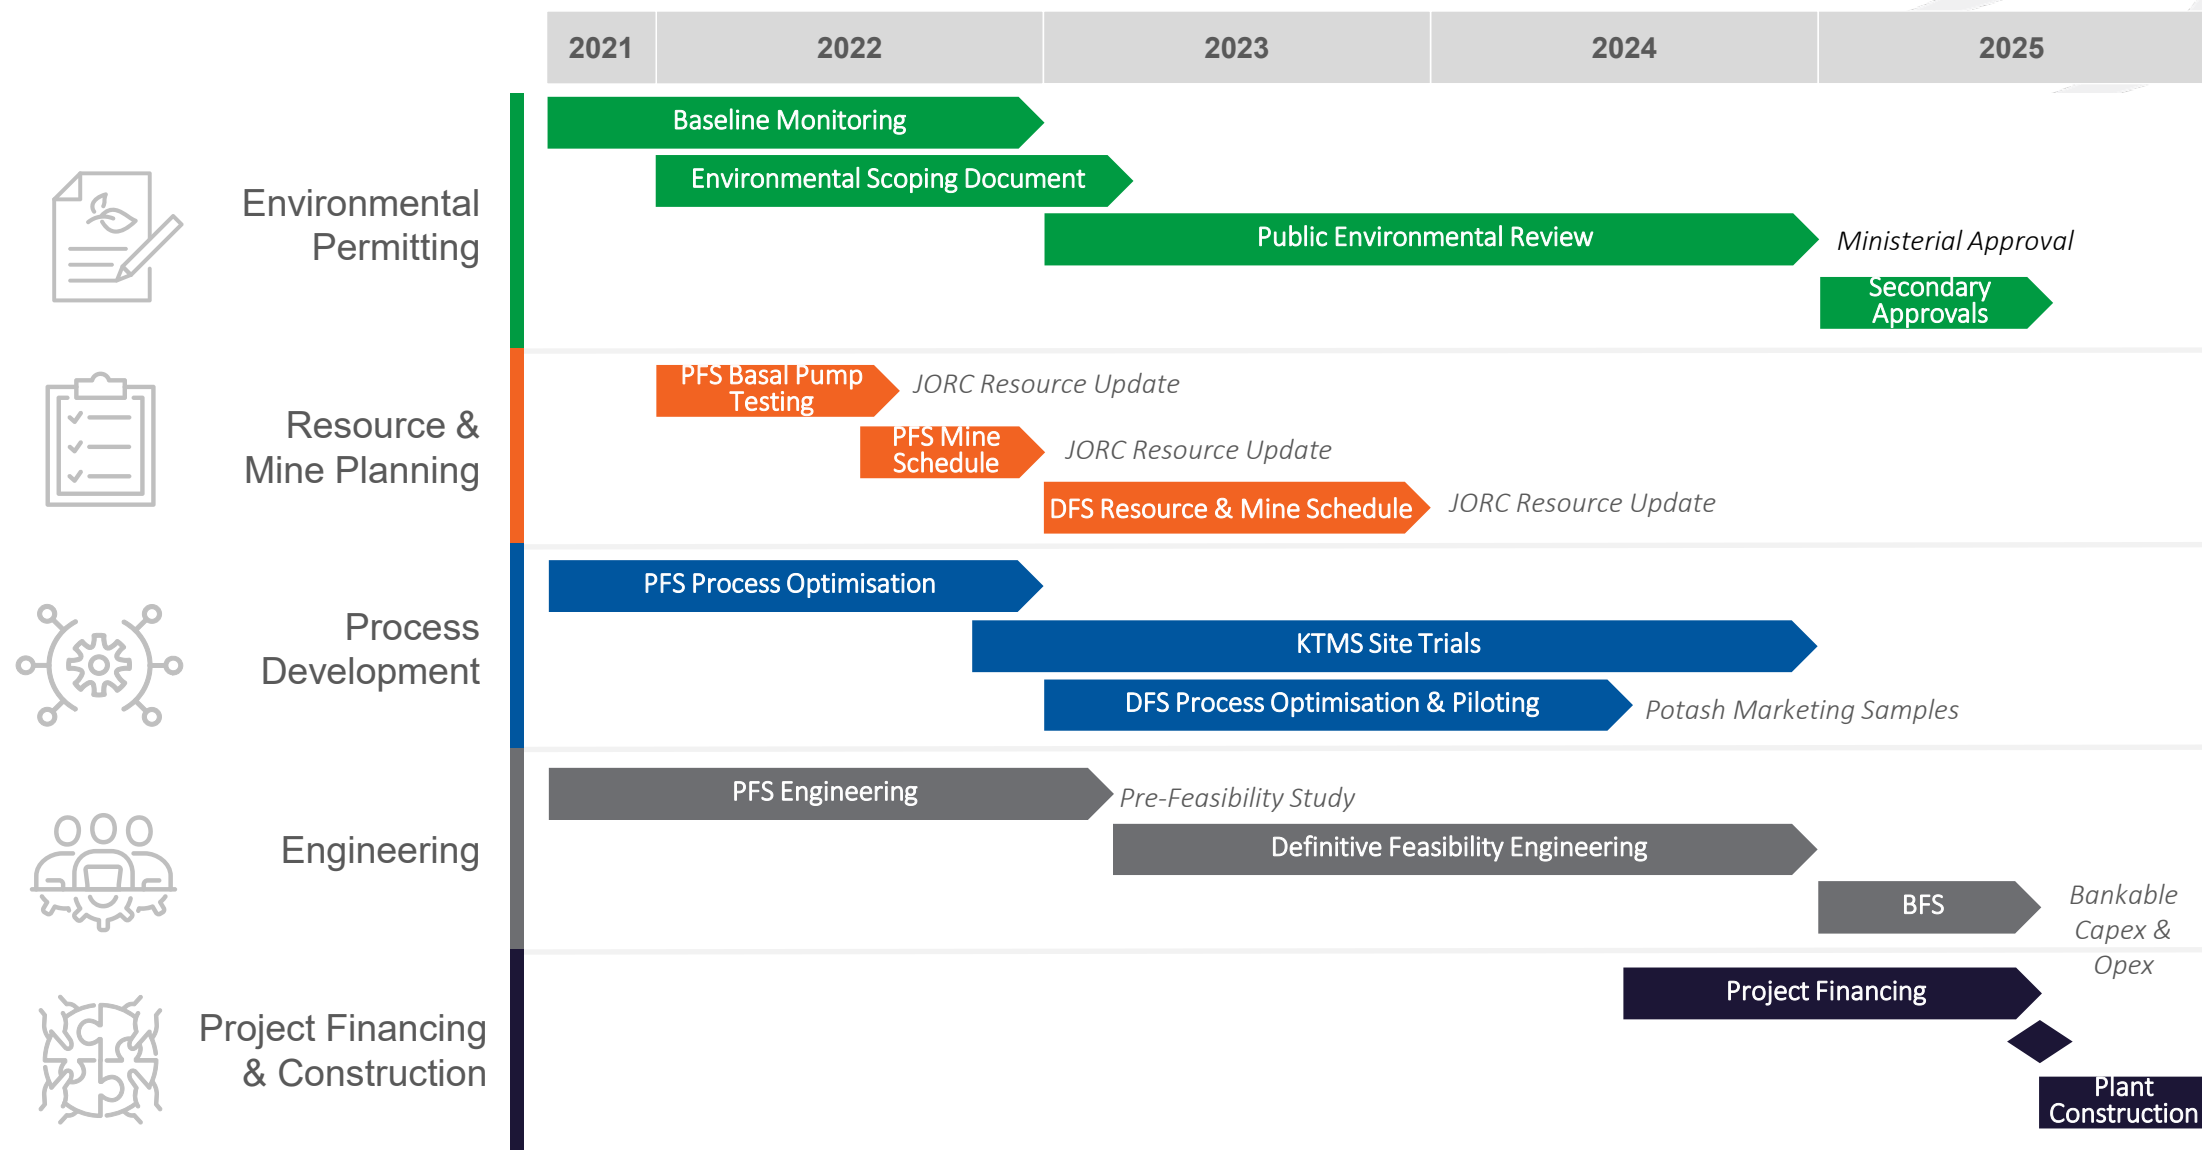

## GOVERNANCE

- ✓ Transparent public reporting through ASX
- ✓ Contemporary corporate policies and risk management frameworks

**Trigg mining, delivering on our Purpose**  
*To build mines communities can be proud of*

# DEVELOPMENT TIMELINE

# THE TRIGG MINING INVESTMENT CASE

Lake Throssell set to become a Top 10 Global, lowest-cost quartile SOP producer

Outstanding economics for a multi-decade operation (initial mine life of 21 years) with significant exploration potential to extend mine life

Located in a world class mining jurisdiction

Australian-made premium, natural potassium fertiliser with low green house gas emissions suitable for all agriculture

Global mega-trends driving demand growth for nutritious food and carbon farming in addressing climate change

Pre-Feasibility study and offtake discussions underway

Level 1, Office E, 1139 Hay Street  
West Perth, WA 6005  
(08) 6114 5685

<b>Total</b>		<b>21,400</b>		<b>4,990</b>		<b>1,160</b>	<b>2,280</b>	<b>2.65</b>	<b>21,400</b>	<b>24.89</b>	<b>5.08</b>	<b>5.91</b>	<b>25.2</b>
<b>TOTAL MINERAL RESOURCE</b>		<b>38,950</b>		<b>12,386</b>		<b>2,545</b>	<b>3,579</b>	<b>9.1</b>	<b>22,213</b>	<b>56.7</b>	<b>8.0</b>	<b>20.3</b>	<b>101.7</b>
<b>LAKE THROSSELL EXPLORATION TARGET (in addition)</b>													
Lower Estimate		5,807				288	4,081	1.2			9.1	2.6	
Upper Estimate		10,925				945	4,466	4.2			10.0	9.4	

**Note:** Errors may be present due to rounding, approximately 1.2Mt of Drainable SOP Mass is present in Exploration Licence Application E38/3437. Approximately 2.86Mt of the Drainable SOP Mass is present in Exploration Licence Applications E38/3544, E38/3483, E38/3458, and E38/3537. Total porosity and total brine SOP mass is provided to compare the total SOP tonnes with the drainable Resources. As can be seen, the total brine volume of 102.53Mt is significantly higher than reported drainable brine volume of 20.2Mt. The drainable brine volume represents the amount of SOP that can be abstracted from the deposit under normal pumping conditions. For economic production, the drainable brine volume is the most important volume because only a proportion of the total brine present can be typically abstracted from the deposit. The potential quantity and grade of the Exploration Target is conceptual in nature. There has been insufficient exploration in these areas to estimate a Mineral Resource. It is uncertain if further exploration will result in the estimation of a Mineral Resource.

The Mineral Resource Estimate was first announced, together with a Competent Person's Statement from Mr Adam Lloyd of Aquifer Resources Pty Ltd, on 05 October 2021 in the announcement titled "Positive Scoping Study for Lake Throssell Sulphate of Potash Project following Mineral Resource Upgrade".
