1. HIGHLIGHTS

- The Company and MRL continued advancement of the Marillana and Ophthalmia Projects in accordance with the agreed Indicative Development Proposal for the projects.
- Significant advancement on an infrastructure solution for the Marillana and Ophthalmia Projects, with MRL entering into an agreement with Hancock and Roy Hill to jointly investigate the development of a new berth at South-West Creek at Port Hedland. Under the agreement, Roy Hill is to provide rail haulage and port services.
- Studies and preparation (including miscellaneous licence application) for the haul road corridor from Marillana to the Roy Hill rail system are progressing.
- The Joint Venture commenced a bulk sample drilling programme and carried out updated baseline environmental surveys during the quarter.

2. PROJECT ACTIVITIES

Exploration Activities

Marillana

Brockman Iron Pty Ltd ("Brockman Iron") and Polaris Metals Pty Ltd ("Polaris") entered into a farm-in and joint venture agreement ("FJV Agreement") pursuant to which subject to the terms and conditions therein, Polaris may farm-in by satisfying the farm-in obligations and earn a 50% interest in the Marillana Project. For details of the transaction please refer to the Company's announcement dated 26 July 2018.

The FJV Agreement became Unconditional on 21 January 2019, marking the commencement of the Farm-in Period.

On the 22 April 2021, Brockman Iron and Polaris signed an Amended and Restated FJV Agreement and Deed of Amendment and Restatement (collectively the "Agreement"). Both Brockman Iron and Polaris conclude that the Farm-in Obligations under the Agreement have been satisfied and the parties shall form the Joint Venture immediately. As such, 50% interest in Marillana Project ("the Farm-in interest") will be transferred to Polaris.

MRL has submitted indicative Development Proposals, which include the following:

1. Development of the Marillana and Ophthalmia Projects into an iron ore mining hub capable of producing a minimum of 25Mtpa of final product for export.
2. Following the establishment of the Joint Venture, MRL (or its Related Party) agrees to provide the Joint Venturers with funding by way of a project loan sufficient to allow the Joint Venturers to fund the forecast project capital costs for each development.
3. A build own and operate arrangement between the Joint Venturers and MRL for certain non-processing infrastructure at Marillana.
4. A build own and operate arrangement for the crushing plant at Ophthalmia.

5. A proposed logistics system to transport the ore from the mines to the port stockyard at Port Hedland. This logistics system is to be constructed and operated by MRL (or a subsidiary).
6. Construction of a berth at a dedicated location in Port Hedland subject to the approval from the State Government of Western Australia.
7. A current market based estimate for project capital and operating costs, including the logistics services cost for transporting the ore from mine to ship.

Initial Development Works

During the quarter, work commenced on a Bauer drilling programme for the purpose of obtaining bulk samples to support pilot plant test-work and, provide samples of tailings to support co-disposal (dry-stacking) testwork and approvals. The testwork will also support process review and flow sheet design.

Ophthalmia

During the quarter, Brockman received notification from Polaris that the farm-in obligations have been satisfied, and that the Ophthalmia Joint Venture is now operational.

Polaris have commenced a programme of works including mine planning studies, transport corridor studies, environmental surveys and approvals, in order to expedite development of the project.

Infrastructure

On 29 November 2021 MRL entered into an agreement with Hancock Prospecting Pty Limited ("Hancock") and Roy Hill Holdings Pty Limited ("Roy Hill") ("the Agreement") in which MRL and Hancock will jointly investigate the development of a new iron ore export facility at the Port of Port Hedland's Stanley Point Berth 3 in South West Creek, where Roy Hill would provide services to both MRL and Hancock for development and operation of their projects, including rail haulage and port services.

For the Agreement to be effective the following are needed: (i) a grant by the Pilbara Ports Authority ("PPA") of a capacity allocation and all necessary approvals and agreements to develop and operate berth 3 in South West Creek and the other associated supporting port infrastructure; and (ii) MRL and Hancock each electing to take a positive final investment decision to proceed.

Under the FJV Agreement, MRL is to provide the infrastructure solution to transport the ore from the Marillana and Ophthalmia projects to a port stockyard at Port Hedland and loading on to ships for export. The Agreement will facilitate this solution.

MRL are progressing with studies and preparation (including miscellaneous licence application) for the haul road corridor from Marillana to the Roy Hill rail system.

Regional development

There was no field work carried out on the other regional exploration projects.

Mining Production and Development Activities

No mining production and development activities, including expenditure has been undertaken or recognised for the quarter.
