

23 February 2022

New Ontario Lithium Projects Secured near High Grade Resource

Critical Resources Limited (ASX:CRR) (“**Critical Resources**” or the “**Company**”), is pleased to advise that it has staked 4,500 Ha of highly prospective lithium claims, now known as the “Plaid Project” and “Whiteloan Lake Project”, (collectively “**the Projects**”), in the exciting and emerging, Electric Avenue region of northwest Ontario, Canada.

Highlights

- **Critical continues to expand its footprint in the emerging Ontario Lithium region by adding new highly prospective and well-located ground to its portfolio**
- **4,500 Ha of claims has been staked within 5.5km of Frontier Lithium’s (“TSX.V: FL”) PAK, Spark and Bolt deposits**
- **Pegmatite mineralisation observed across both the Plaid and Whiteloan Lake projects¹**
- **Frontier Lithium’s Pak project is one of North Americas highest-grade, high tonnage hard rock lithium Resources²**
- **Underexplored claims within an emerging lithium province compliment the Company’s existing Ontario located projects, Mavis Lake and Graphic Lake**
- **Work program to identify drill targets to begin immediately**

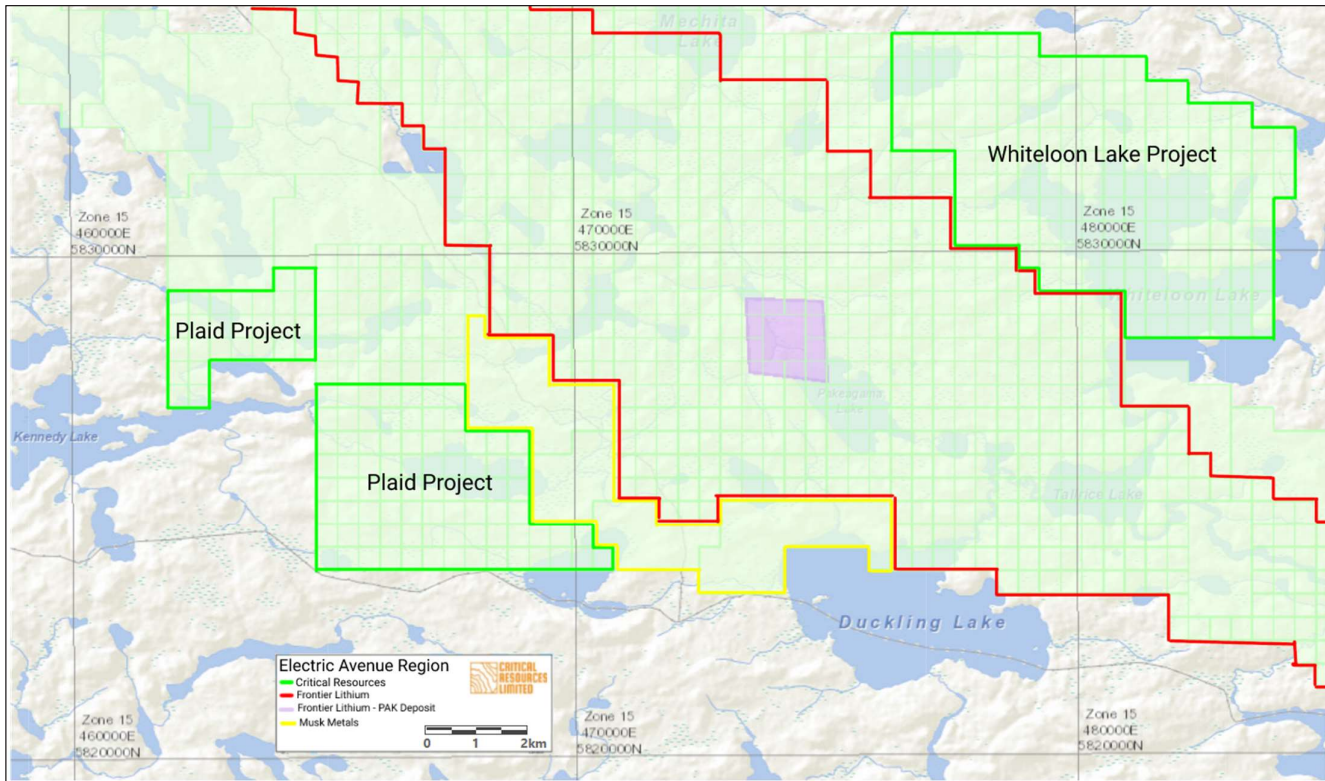

A total of 4,500 Ha of claims have been staked within the highly prospective Electric Avenue region of Ontario, Canada, seen in Figure 1. Continued growth of the Company’s land holding in prospective lithium regions, is key in a longer term strategy to develop a lithium hub within Ontario. Mapping conducted in 1993¹ displays evidence of pegmatite outcrops within the recently acquired claims. Both projects have a natural synergy with the Company’s recently acquired Mavis Lake and Graphic Lake projects in Ontario.

Critical Resources Managing Director Alex Biggs said: “Securing these claims is part of the Company’s aggressive approach to lithium exploration in Ontario. The Electric Avenue region is a highly prospective area hosting large and high grade hard rock lithium projects, so to be able to acquire land in this area is a very exciting development for the Company. Once again, we demonstrate our strategy to consolidate our land holding and move towards building a lithium hub in Ontario, providing excellent exploration opportunities”.

²Frontier Lithium TSX.V announcement 16 February 2022

Figure 1: Electric Avenue Region

Project Overview

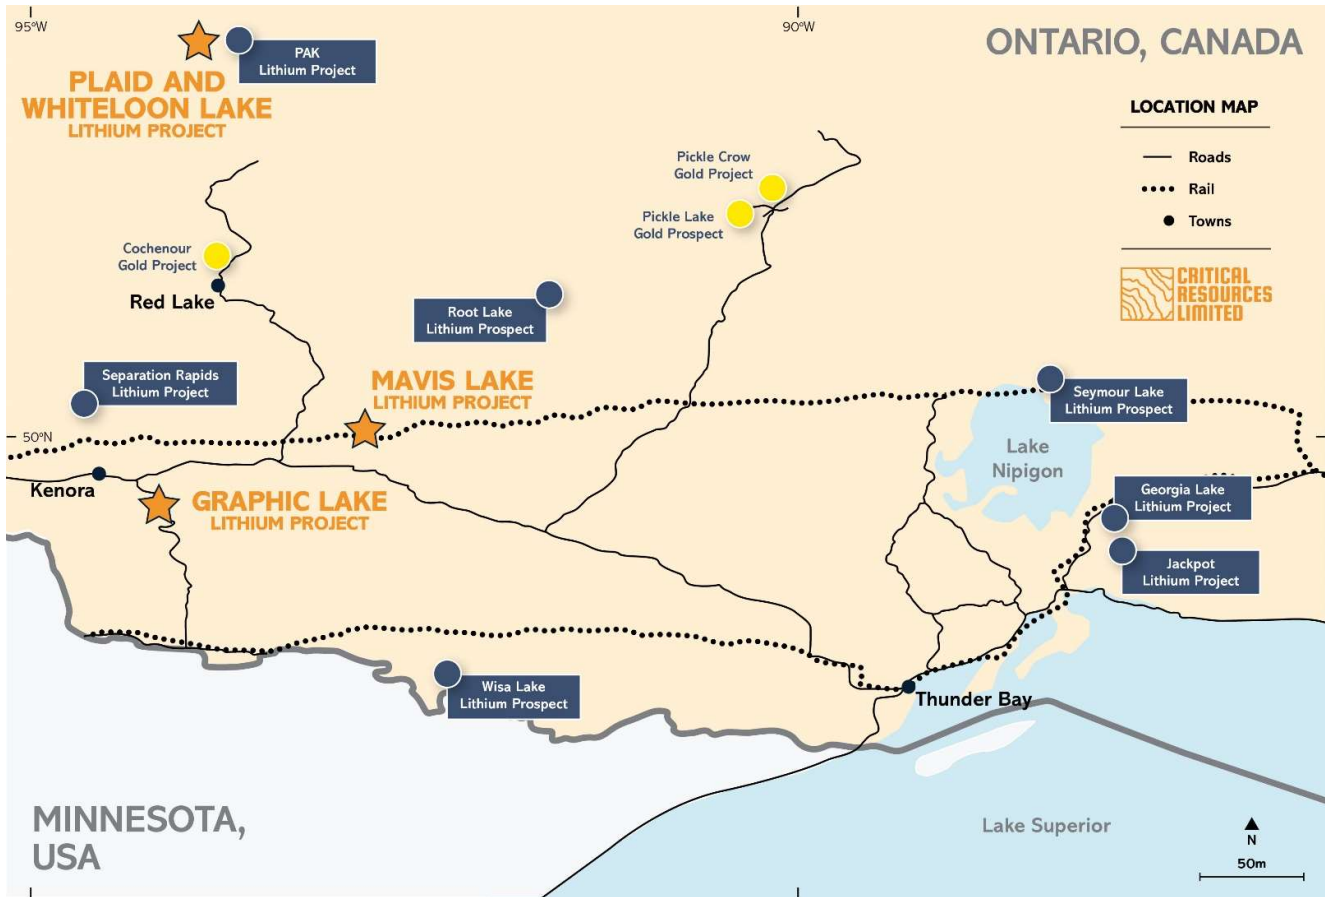

The Plaid and Whiteloon Lake projects are located 165km north of Red Lake, Ontario, Canada in the highly prospective Electric Avenue region. Both Projects are approximately 5.5km from Frontier Lithium’s (TSX.V: FL) Pak project, one of North America’s highest-grade, high tonnage hard rock lithium Resources², with

- ² Measured and Indicated Resource of 10.49 million tonnes averaging 1.78% Li₂O and
- ² Inferred resource of 18.48 million tonnes averaging 1.45% Li₂O.

Project location is shown in Figure 2.

Figure 2: Projects location

Work Program

The following work program has been determined as a stage 1 approach with a view to identifying appropriate drill targets.

Surface Mapping and Sampling

Surface mapping and sampling of outcrops will assist in identifying drill targets in conjunction with the planned airborne survey data. Further surface mapping may identify new pegmatites not previously documented.

Airborne Survey

An airborne survey is to be completed as soon as possible to help identify targets for a drill program.

Channel Sampling

Channel sampling is to be conducted on areas of interest previously identified by outcrop mapping and sampling. This sampling may require the stripping of outcrops, as a precaution.

Drill Program Design

Based on the activities outlined above, it is expected a preliminary drill program will be designed to target areas of interest.

Permitting

Enquiries regarding permitting and approvals are underway with a view to begin exploration activities as soon as possible.

Exploration Drilling and Resource Delineation

The Company plans to complete a diamond drilling program once drill targets are defined across both projects' tenements. The strategy is to develop synergies with the Company's 100% owned Mavis Lake and Graphic Lake projects.

Mavis Lake Project Overview

The Mavis Lake Lithium Project is 19 kilometres east of the town of Dryden, Ontario. The Project is in close vicinity to the Trans-Canada highway and railway major transportation arteries linking larger cities such as Thunder Bay, Ontario, to the southeast and Winnipeg, Manitoba, to the west. The region boasts excellent infrastructure with hydro-power located a few kilometres to the south-west of the project. The region is a well-established lithium province with multiple projects located within the vicinity.

Previous drill programs have yielded high-grade Li₂O intercepts including:

- 55.25m at 1.04% Li₂O from 80.75m (MF18-53) and
- 26.30m at 1.70% Li₂O from 111.9m
 - inc. 7.70m at 2.97% Li₂O from 130.5m (MF17-491),

presenting significant exploration potential (ASX Announcement 25 October 2021). A future work program has been determined and is discussed in detail in ASX announcement 13 Dec 2021.

Graphic Lake Project Overview

The Graphic Lake Project is 55km south-east of Kenora, Ontario. The Project is dissected by the Trans-Canadian Highway, providing key links to larger cities such as Thunder Bay, Ontario to the southwest and Winnipeg, Manitoba, to the west. The region is an emerging lithium province with multiple projects across the region.

The Project is situated in the Sioux Lookout Domain of the Wabigoon Terrane in north-west Ontario. The claim's comprise a pegmatite swarm trending NE/SW with a width of 300m and estimated strike of 5.5km. These pegmatites are observed to follow the foliation of the Royal Island group metasedimentary host rocks.

The Lithium Industry in Ontario – Tesla Battery Gear Manufacturing Plant Opens

Tesla has recently announced the opening of a battery gear manufacturing plant in Markham, Ontario demonstrating the significant opportunity for Ontario to become one of the world's leading lithium provinces. The facility will be the first branded Tesla Canada manufacturing facility in Canada.

A significant amount of activity in the lithium exploration sector is currently occurring in Ontario. Due to the quality of lithium assets in the region, the fundamental drivers behind the lithium market and the intent of North American manufacturers to source lithium for battery manufacturing from localised supply-chains, it is an excellent time to be gaining a foothold in Ontario.

This announcement has been approved for release by the Board of Directors.

FORWARD LOOKING STATEMENTS

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

NO NEW INFORMATION

Except where explicitly stated, this announcement contains references to prior exploration results, all of which have been cross-referenced to previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements.

ABOUT CRITICAL RESOURCES LIMITED

Critical Resources is a base metals and lithium exploration and development focused company headquartered in Perth, Western Australia and is listed on the Australian Securities Exchange (ASX:CRR). The Company has recently been undergoing a structured process of change at the Director and Executive level. These changes mark the commencement of a renewed focus by the Company on providing shareholder value through the exploration, development and advancement of the Company’s long held NSW assets, newly acquired Lithium assets in Canada and Copper assets in Oman.
