

CROWN PRINCE & LYDIA GOLD PROJECTS MINING LEASES GRANTED

Ora Gold Limited (ASX: OAU) (Company) is pleased to advise that Mining Leases have been granted by the Department of Mines, Industry, Regulation and Safety for the Company’s 100% owned Crown Prince (M51/886) and Lydia (M51/889) Gold Projects.

The granting of the Mining Leases for a period of 21 years until 2043 is a very important milestone in the Company’s proposed development of the Crown Prince Gold Project located in the Murchison region of Western Australia.

The Crown Prince deposit is located about 18 kilometres north-west of Meekatharra in Western Australia on the Mt Clere Road. A Mineral Resource update and positive scoping study have been completed.

Location of Crown Prince & Lydia Mining Leases

Historical production was 29,400 tonnes for 20,178oz at a recovered grade of 21.7g/t Au to a depth of 90 metres. The unmined supergene halo and other zones provide a Mineral Resource Estimate (Table 1) for the Crown Prince deposit, which was announced on 21 October 2019.

TABLE 1. Crown Prince 2019 Mineral Resource Estimate

Indicated Resource			Inferred Resource			Total Resource		
Tonnes	Grade g/t Au	Ounces Au	Tonnes	Grade g/t Au	Ounces Au	Tonnes	Grade g/t Au	Ounces Au
218,000	4.3	30,000	261,000	3.1	26,000	479,000	3.6	56,000

Figures are rounded to reflect relative uncertainty of the estimates

The estimate is only to a depth of 270m and used block modelling with Ordinary Kriging interpolation, a block cut-off grade of 1.2g/t Au and top cut of 30g/t Au. It is a combination of Indicated and Inferred Resources to 100m depth and Inferred Resources for deeper mineralisation. Further drilling and development of deeper high-grade mineralisation (cf. deepest hole TGGRCDD110 of 8m at 22.3g/t Au from 259m) and newly identified parallel zones may increase the Mineral Resource estimate.

An oxide open pit design was the basis for the positive scoping study as summarised in Table 2, with details available in the 11 December 2019 announcement of the study results.

TABLE 2. Crown Prince Gold Project Scoping Study Estimates*

Production Target	177,472 tonnes
Grade	4.14g/t Au
Stripping Ratio (tonnes)	10.1
Gold Recovery	95%
Gold Produced (97% Indicated Resource)	22,444 ounces
Pre-development (including mobilisation)	\$1.4M
Operating Cash Cost	\$891/ounce
All-In-Sustaining-Cost per ounce	\$1,006/ounce
Gold Price	\$2,000/ounce
Net distributable surplus before tax (+/-30%)	\$21.1M

*OAU confirms that all material assumptions underpinning the production target and forecast financial information derived from it as reported 11 December 2019 continue to apply and have not materially changed, except the Gold Price which has increased to approx. \$2,650/ounce (22 February 2022).

The scoping study pre-tax financial forecast is the 100% site surplus after direct costs of pre-development, mine establishment, operating, sustaining capital and mine closure and the payment of state and private royalties. The estimate basis is of a small mine and a large offsite processing plant and does not include any cost or revenue sharing arrangement with a processing party. Ora Gold has sufficient accrued tax losses to offset all income tax liabilities for the proposed project.

The Company is continuing its discussions with gold mining companies with existing infrastructure in the Murchison Region for off-site treatment of the proposed Crown Prince oxide open pit and underground operations.

The announcement has been authorised for release to the market by the Board.

Competent Person Statement – Ora Gold information

The details contained in this report that pertain to Exploration Results, Mineral Resources or Ore Reserves, are based upon, and fairly represent, information and supporting documentation compiled by Mr Costica Vieru, a Member of the Australian Institute of Geoscientists and a full-time employee of the Company. Mr Vieru has sufficient experience which is relevant to the style(s) of mineralisation and type(s) of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves” (JORC Code). Mr Vieru consents to the inclusion in this report of the matters based upon the information in the form and context in which it appears.

Competent Person Statement – Crown Prince Gold Project

The details contained in this report that pertain to Crown Prince Exploration Results, Mineral Resources or Ore Reserves are based upon, and fairly represent, information and supporting documentation compiled by Mr Philip Mattinson, Mr Costica Vieru, Mr Philip Bruce and Mr Brian Fitzpatrick. Mr Mattinson and Mr Vieru are Members of the Australian Institute of Geoscientists. Mr Mattinson is a consultant to the Company, Mr Vieru is a full-time employee of the Company and Mr Bruce is a Fellow of the Australasian Institute of Mining and Metallurgy and a Director of the Company. Mr Fitzpatrick is a Principal Geologist with Cube Consulting Pty Ltd and a Member of the Australasian Institute of Mining and Metallurgy, who has undertaken check validation and geo/statistical assessment of the data, then block modelled and estimated the tonnage and grade of the mineralisation, which was assessed by Mr Vieru and Mr Bruce for appropriate cut-off grade and to confirm resource categorisation. The Competent Persons have sufficient experience which is relevant to the style(s) of mineralisation and type(s) of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the 2012 edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves” (JORC Code). All consent to the inclusion in this report of the matters based upon their input into the information in the form and context in which it appears.
