PRINCIPAL ACTIVITIES

The principal activities of the Group during the half-year were:

- production of gold from the Wiluna Gold Operation; and
- gold exploration and development.

REVIEW AND RESULTS OF OPERATIONS

Highlights

- \$90.7 million net investment during the period, principally in mine development and in completing the stage 1 concentrator
- Stage 1 concentrator successfully commissioned and outperforming nameplate capacity; targeting annualised full production run rate of 100kozpa-120kozpa by end of June 2022
- Stage 2 Feasibility study continues; completion expected in March 2022
- Underground mine development meters (including rehabilitation) for the period were 5,012 meters
- Underground sulphide development on schedule; 88,731 tonnes milled to 31 December 2021
- ~139,000 tonnes of sulphide ore stockpiled and ready to process as at 31 December 2021
- 2,690 wet tonnes of gold concentrate ready for export produced: average concentrate grade of 70 g/t
- Production concurrent to mine development year to date of 16,084oz
- Construction of Wiltails continues; work is 20% complete at 31 December 2021. Expected commissioning in May 2022. Wiltails will contribute a material increase in gold production over a long life
- Mineral Resource update during the half-year; total Mineral Resource is now 5.53Moz @ 2.19g/t, including 4.51Moz @ 3.90g/t at the Wiluna Mining Centre
- Mercuria Tranche 1 debt paid off in full on 28 July 2021
- Mercuria Tranche 2 debt repayment commencement extended for 3 months, commencing April 2022
- Successful two-tranche share placement of A\$53.0m completed
- Gold hedging contracts at 31 December 2021 were for 156,500oz @ US\$1,820/oz (or ~A\$2,509/oz), with a negative mark-to-market position of A\$5.0m

EXPLANATION OF FINANCIAL RESULTS

	Half-year ended Dec-21 (\$'000)	Half-year ended Dec-20 (\$'000)	Change %
Summary financial results			
Gross profit from operations	3,561	9,167	-56%
Net (loss)/profit after tax	(16,319)	11,481	N/A
Net cash inflow from operating activities	30,219	887	N/A
Net cash used in investing activities	(90,746)	(29,346)	209%

- The Company generated a net loss for the 6 months period to 31 December 2021 of A\$16.3m. This was primarily driven by A\$13.2m of unrealised treasury losses (including marked-to-market positions on gold forward contracts and FX movements on foreign debt), non-cash net realisable value write-downs of ore stockpiles of A\$1.7m, and fees relating to the ongoing London stock exchange listing of A\$0.6m;
- Gross cash flows from operations of A\$30.2m were underpinned by gold production of 16,084oz, noting that those cash flows were temporarily improved by approximately A\$12.06m relating to extended payments terms agreed with key suppliers. That temporary improvement will be reversed over the remainder of the financial year.
- Net cash used in investing activities of A\$90.7m is mainly attributed to the Company's total investment in its long term development which includes:
 - Continued underground mine rehabilitation and development for Stage 1 and Stage 2; with underground mining costs higher than initially anticipated due to additional initial development works required, increased costs of manning (and associated costs), and additional rehabilitation activity to improve mine area access;
 - Continued resource drilling;
 - Continued upgrading of site infrastructure;
 - Construction of the Stage 1 Concentrator (completed and successfully commissioned); and
 - Stage 2 and 3 Feasibility studies.

Growth

The Company continued to advance its three-year, staged development plan during the period. The Company's development plan involves a staged upscaling of operations and the transition to mining the large sulphide resource at the Wiluna Mining Centre with treatment through a new flotation plant.

During the period several significant milestones have been achieved:

- Stage 1 concentrator successfully commissioned and outperforming nameplate capacity; targeting full production annualised run rate of 100kozpa-120kozpa by end of June 2022
- Byrnescut Australia completed 2,702 metres of Sulphide underground development and rehabilitation accessing the initial production stoping blocks in sulphide ore
- First sulphide stopes in both Happy Jack North and Bulletin mines commenced extraction with good recovery
- Significant progress made in the dewatering and rehabilitation of old workings, in order to open up new production areas and to remove perched water risk to future mining activities
- Upgrades to the primary ventilation and dewatering networks are now largely complete and support the medium-term production requirements
- Wiltails retreatment project is 20% complete with expectation that it will be completed and commissioned by May 2022

At the time of writing, the concentrator had produced over 1,408 bags of concentrate (approximately 2,690 wet tonnes) at an average concentrate grade of 70 g/t. The first load of concentrate has left site and will depart for Vladivostok on the 26 of February. This will be a significant milestone for the company.

Discovery

The Company released its annual Mineral Resource Estimate for the Wiluna Gold Operation on 17 November 2021, incorporating additional resource development drilling, updated geological interpretations, and mining depletion since the previous estimate. Key highlights of the update included:

- Mineral Resource 4.51 million ounces at 3.90 g/t at the Wiluna Mining Centre;
- Measured and Indicated (M&I) Resource increased to 2.73 million ounces at 4.46 g/t at the Wiluna Mining Centre;
- High-grade 3.11 million ounces at 5.81 g/t using a higher 3.5 g/t cut-off at the Wiluna Mining Centre;
- Large and growing gold endowment of over 15,000oz per vertical metre in upper 600m, with significant opportunities for growth; and
- New Ore Reserve statement expected March 2022.

The significant increase in Indicated Resources affirms the Company's strategy over the prior 18 months of drilling to upgrade Resources and Reserves through systematic infill drilling at initial mining areas to support near-term production.

The high-quality, higher-confidence Resource will underpin an Ore Reserve update that is currently underway as part of the Stage 2 Feasibility Study due for completion in March 2022.

Corporate

As at 31 December 2021, Wiluna Mining had A\$41.6m in cash and bullion, inclusive of the gold in the metal account (June 2021: A\$58.7m). Gold sales revenue for the half-year was based on 15,298oz sold at an achieved price of A\$2,485/oz (after realised treasury transactions).

Net debt at 31 December 2021 was A\$23.1m (June 2021: A\$1.4m). Gold hedging contracts at 31 December 2021 were for 156,500oz @ US\$1,820/oz (or ~A\$2,509/oz), with a negative mark-to-market position of A\$5.0m. Mercuria Tranche 2 debt repayment commencement was extended for 3 months now commencing April in 2022.

During the period, the Company commenced a A\$53.0 million (before costs) capital raising at a placement price of \$1.00 per share. This was completed in two tranches. Tranche 1 was completed on the 30 November 2021 for a total of A\$34.8 million, and Tranche 2 was completed for a total of A\$18.2 million on the 6 January 2022.

SIGNIFICANT CHANGES IN STATE OF AFFAIRS

There have been no significant changes in the state of affairs of the Group during the half-year.

EVENTS SUBSEQUENT TO REPORTING DATE

Share Placement

On 22 November the Company announced a share placement of \$53m at A\$1 per share to fund continued key resource drilling and underground development work programs. The share placement was completed in 2 tranches as follows:

- Tranche 1 - Share placement of \$34.8 million (before costs) completed on 30 November 2021; and
- Tranche 2 - Share placement of \$18.2 million (before costs) completed on 06 January 2022.

Approximately \$5.2 million of Tranche 2 capital raise was received in early January 2022 and is not included in the 31 December cash and bullion balance.

Mercuria

On 18 January 2022, the Company agreed with Mercuria to defer the commencement of principal repayments by 3 months to April 2022, commensurate with the ramp-up toward Stage 1 commercial production.

An additional 38,750oz was added to the hedge position, resulting in the updated hedge book at the date of this report being for 192,750oz @ US\$1,819/oz (A\$2,537/oz), maturing by end of December 2025 (previously end of May 2025).

COVID-19

The impact of the Coronavirus (COVID-19) pandemic is ongoing and it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

Apart from the above, there are no other matters or circumstances that have arisen since the end of the period which significantly affected or could significantly affect the operations of the Group, the results of those operations, or the state of affairs of the Group in future financial periods.

ROUNDING

The company is of a kind referred to in ASIC Corporations (Rounding in Financial/Directors' Report) Instrument 2016/191 and in accordance with that class order, amounts in the financial statements have been rounded off to the nearest thousand dollars, or in certain cases, to the nearest dollar.

Notes to the Consolidated Financial Statements

FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

Basis of preparation

These consolidated interim financial statements and notes represent those of Wiluna Mining Corporation Limited (the 'Company' or 'Wiluna') and its controlled entities (the 'Group').

The interim consolidated financial statements do not include all the information and disclosures required in the annual financial statements. Accordingly, these financial statements are to be read in conjunction with the annual report for the year ended 30 June 2021 and any public announcements made by the Company during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

This financial report is a general purpose financial report which:

- has been prepared in accordance with AASB 134 *Interim Financial Reporting*. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 'Interim Financial Reporting'.
- has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board ('AASB'), International Financial Reporting Standards ('IFRS') and the *Corporations Act 2001*;

The principal accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period, unless otherwise stated.

CHANGES IN ACCOUNTING POLICIES

The Group has adopted all the new, revised and amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board that are mandatory for the current reporting period.

Any new, revised or amended Accounting Standards and Interpretations that are not yet mandatory have not been early adopted by the Group.

GOING CONCERN

These financial statements have been prepared on the going concern basis, which contemplates continuity of normal business activities, and the realisation of assets and the discharge of liabilities in the normal course of business.

As disclosed in the financial statements, the Group incurred a loss of \$16.3m (inclusive of a \$13.2m unrealised loss on treasury transactions), despite having positive net cash inflows from operating activities for the half year ended 31 December 2021. Furthermore, at balance date, the Group had net current liabilities of \$4.7m, which includes the current lease liability of \$5.6m (relating to Right of Use Assets). Notwithstanding those amounts, the Group had net assets of \$249.6m.

These factors suggest a level of inherent uncertainty regarding the Group's ability to continue as a going concern and therefore whether it will realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in the financial report. The continuation of the Group as a going concern depends on the Group's ability to:

1. Fund a forecasted near-term working capital deficiency during a time of significant mine development of underground mining locations, whilst concurrently making working capital and debt repayments to its creditors and financier; and,
2. achieve its forecasted gold and gold concentrate production quantities.

Despite this, the Directors believe that the going concern basis of preparation of the financial report remains appropriate, after consideration of the following mitigating factors:

- the Company continues to progress discussions with a number of parties in relation to a variety of potential funding transactions that will facilitate Wiluna Mining's mine development to achieve targeted profitable operations;
- once the Stage 2 Feasibility Study⁴ has been delivered and released (expected in March 2022), depending on the outcome and recommendations, the Company will consider its options, the financial requirements and the timing of the development of the Wiluna Mine before advising the market of the timing and sizing of the recommended Stage 2 development; and,
- continued development expenditure for Stage 2 and beyond will be controlled dependent on having suitable funding in place. If additional funding for ongoing development is delayed, the Company will slow down its development profile and rely upon its underlying cash flows from operations (seeking additional funding as appropriate to facilitate that transition) to maintain a going concern.

Accordingly, the Directors believe that the Group will be able to continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the financial report.

The financial report does not include any adjustments relating to the amounts or classification of recorded assets or liabilities that might be necessary if the Group does not continue as a going concern.

SECURED LOANS – MERCURIA ENERGY TRADING PTE LTD (“MERCURIA”)

On 14 August 2020, Wiluna Mining announced that all documentation concerning a gold prepaid swap financing facility and gold hedging facility provided by Mercuria had been completed and executed. The \$21m prepaid swap proceeds (“Tranche 1”) were repaid in full by 29 July 2021 by way of delivering 699oz of gold per month over the 12 month term. As part of Tranche 1, Mercuria also provided the Company with a secured gold hedging facility for 34,000oz at an average price of A\$2,674/oz maturing over the term of the loan. That hedging facility was delivered in full by 29 July 2021. The Term Loan and hedging program were secured under a general security arrangement.

On 16 June 2021, the Company announced that the final conditions and documentation for a US\$42 million Term Loan agreement (“Tranche 2”) with Mercuria had been completed, and the loan was drawn down on 18 June 2021. Following a variation to the agreement made on 18 January 2022, the Term Loan has a 48-month tenor, with a grace period of 9 months (during which the Company will only pay interest) followed by equal monthly repayments thereafter. The interest rate is LIBOR + 9.5%. Tranche 2 is complimented by a gold hedging facility for 192,750oz (at the date of this report) and 156,500oz as at 31 December 2021 priced at US\$1,819/oz (at the date of this report) and US\$1,820/oz as at 31 December 2021. The Term Loan and hedging program are secured under a general security arrangement. The facility has been fully drawn down at the reporting date.

Royalties

The Company has a limited commitment to deliver and sell 1.65% of its monthly gold production to Osisko Bermuda Limited at a 70% discount to the prevailing spot gold price (but limited to a price not higher than US\$600 per ounce). As at 31 December 2021, the Company had 3,352 ounces (30 June 2021: 3,756 ounces) of gold remaining to be delivered under this arrangement.

Additionally, the Company pays an indefinite royalty to Franco Nevada, being 3.6% of revenue (net of refining costs, gold freight and the 2.5% Western Australian State Government royalty).

Contingent Assets/Liabilities

There were no material changes to contingent liabilities or assets since 30 June 2021.

11. RELATED PARTIES

Mr Milan Jerkovic, a Director of the Company, is also an officer of Xavier Group Pty Ltd, a company who provides consulting services to the Group. During the half-year, \$385,000 (30 June 2021 twelve months: \$729,182) was paid (or is payable) to Xavier Group Pty Ltd for consulting services provided to the Group. All transactions were made on normal commercial terms and conditions, and at market rates.

Ms Lisa Mitchell, a Director of the Company, whose spouse is also a Director and beneficiary of Ironbridge Capital Partners, a company who provides consulting services to the Group; during the half-year, \$58,352 (30 June 2021 twelve months: \$7,344) was paid (or is payable) to Ironbridge Capital Partners for consulting services provided to the Group. All transactions were made on normal commercial terms and conditions, and at market rates.

12. SUBSEQUENT EVENTS

Share Placement

On 22 November 2021, the Company announced a share placement of \$53m at A\$1 per share to fund continued key resource drilling and underground development work programs. The share placement was completed in 2 tranches as follows:

- Tranche 1 - Share placement of \$34.8 million (before costs) completed on 30 November 2021; and
- Tranche 2 - Share placement of \$18.2 million (before costs) completed on 06 January 2022.

Approximately \$5.2 million of Tranche 2 capital raise was received in early January 2022 and is not included in the 31 December 2021 cash and bullion balance.

Mercuria

On 18 January 2022, the Company agreed with Mercuria to defer the commencement of principal repayments by 3 months to April 2022, commensurate with the ramp-up toward Stage 1 commercial production.

An additional 38,750oz was added to the hedge position, resulting in the updated hedge book at the date of this report being for 192,750oz @ US\$1,819/oz (A\$2,537/oz), maturing by end of December 2025 (previously end of May 2025).

13. COVID-19

The impact of the Coronavirus (COVID-19) pandemic is ongoing and it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

Apart from the above, there are no other matters or circumstances that have arisen since the end of the period which significantly affected or could significantly affect the operations of the Group, the results of those operations, or the state of affairs of the Group in future financial periods.

14. GOLD HEDGING CONTRACTS

As part of the risk management policy, the Group enters into gold forward contracts to manage the gold price of a proportion of anticipated gold sales. The counterparty of the gold forward contracts is Mercuria Energy Trading Pte Ltd ('Mercuria').

The current gold hedge contracts comprise of the following:

- **Initial Tranche 2** - On 16 June 2021, as part of the US\$42 million Term Loan agreement with Mercuria ("Tranche 2") a gold hedging facility for a total of 159,000oz priced at an average price of US\$1,820/oz was put in place; and
- **Variation to Tranche 2** - On 18 January 2022, Mercuria Tranche 2 debt principal repayment was extended to April 2022. As a result an additional 38,750oz at an average price of US\$1,811/oz was added to the hedge facility. This resulted in the updated hedge book at the date of this report being for 192,750oz @ US\$1,819/oz (A\$2,537/oz), maturing by the end of December 2025 (previously end of May 2025).

The Term Loan and hedging program are secured under a general security arrangement

INDEPENDENT AUDITOR'S REVIEW REPORT TO THE MEMBERS OF WILUNA MINING CORPORATION LIMITED

Report on the half-year financial report

We have reviewed the accompanying half-year financial report of Wiluna Mining Corporation Limited, which comprises the statement of financial position as at 31 December 2021, the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the half-year end or from time to time during the half-year.

Directors' responsibility for the half-year financial report

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2021 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Wiluna Mining Corporation Limited, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of Wiluna Mining Corporation Limited, would be in the same terms if given to the directors as at the time of this auditor's review report.

Material Uncertainty Related to Going Concern

We draw attention to the going concern note in the Basis of Preparation section in the notes to the financial statements, which indicates that the consolidated entity incurred a loss of \$16,319,000 during the half-year ended 31 December 2021 and, as at that date, the consolidated entity had net current liabilities of \$4,655,000. As stated in the going concern note, these events or conditions, along with other matters as set forth in the going concern note, indicate that a material uncertainty exists that may cast significant doubt on the consolidated entity's ability to continue as a going concern. Our conclusion is not modified in respect of this matter.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Wiluna Mining Corporation Limited is not in accordance with the *Corporations Act 2001*, including:

- (a) Giving a true and fair view of the consolidated entity's financial position as at 31 December 2021 and of its performance for the half-year ended on that date; and
- (b) Complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.
