Mining

Raleigh

Production that commenced in December 2004 at the Raleigh Underground Mine was halted in April 2020 when Raleigh was placed on care and maintenance due to seismic activity. A full review of the mine plan was initiated by the JV Manager and will result in rescheduling the mining of remaining reserves to a later date.

There was no capital or operating development for the half year. The depth of the decline is approximately 743 metres (“m”) below the surface. The top of the Sadler incline remains at 356 m below the surface and the bottom of the Sadler Decline is approximately 401 m below the surface.

There was no mine production from Raleigh during the period.

Rubicon/Hornet/Pegasus

Production at the Rubicon Underground Mine that commenced in August 2011 continues.

Rubicon, Pegasus and Hornet Ore Bodies

Capital development for the half year totalled 516 m including 88 m of decline development. Operating development for the half year totalled 1,256 m, including 323 m in waste, 757 m in ore and 176 m through paste fill.

Mine production during the half year totalled 226,003 tonnes (“t”) grading 4.0 grams per tonne (“g/t”) containing 29,056 ounces (“oz”) of gold based on grade control estimates. Rand’s entitlement to mined ore tonnes in the half year was 27,685 t for 3,559 oz.

Processing

During the half year, treatment campaigns at the Kanowna Belle Plant processed 19,550 t of EKJV ore. Treatment campaigns at the Lakewood Mill processed 138,761 t of R&T ore and a campaign at the Mungari Processing plant treated 29,495 t of ore. All processed ore was from the Rubicon mine.

A 31,198 tonne low grade parcel of Rand and Tribune ore was sold and treated through Evolution Mining’s Mungari mill during the half, with Rand’s share equating to 7,750 tonnes.

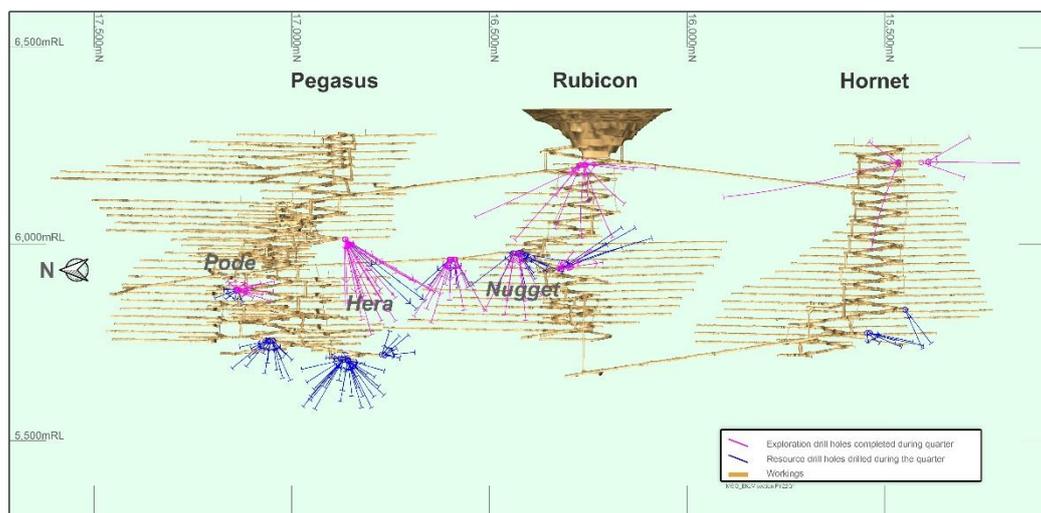

A total of 21,032 oz of gold was credited to the Rand and Tribune Bullion Accounts at Perth Mint. Rand’s share of gold bullion was 5,258oz.

Exploration

EKJV

Drilling activity at EKJV was undertaken by two underground diamond drill rigs for a total of 171 completed holes with 25,896 m of drilling. Drilling focused on confirming grade continuity on the main mineralised K2 structure below current development at Rubicon and between the declines in the area connecting Rubicon and Pegasus. Drilling continued to define ore body continuity and delineate extensions of mineralisation at Pode, Nugget and Hera which are each situated in the hanging wall of the K2 structure. Several holes intercepted mineralisation outside the Pode and Hera wireframes keeping open the possibility of modest resource expansion downdip on both structures.

Details of all EKJV exploration activities are contained in the September and December Quarterly EKJV Exploration Reports released to the market on 27 October 2021 and 25 January 2022.

Seven Mile Hill (Rand's Interest 50%)

A drilling program was conducted at Seven Mile Hill during the period including RC and diamond drill holes. A total of 60 RC holes for 6,426 m were completed. Many of these were pre-collars for the diamond holes. A diamond drilling program was conducted with a single hole drilled at White Lake, and 7 holes completed at Kopai Ridge. The total diamond drill meters drilled during the period was 828.5 m.

Corporate

Dividends Paid

A fully franked dividend of 10 cents per ordinary share was paid to the shareholder on 5 November 2021.

Share Buy-Back Programme

During the half year, the Company extended the current on market share buy-back to 9 January 2023. No shares were bought back during the quarter.

Proceedings against Northern Star Resources Ltd

The EKJV litigation, as previously announced by the Company, remains ongoing. The matter was heard in the Supreme Court in mid-October 2020. The Company is awaiting the court's decision.

Significant changes in the state of affairs

The impact of the Coronavirus (COVID-19) pandemic is ongoing and while it has not significantly impacted the Group up to date, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

On 18 August 2021, the Group welcomed Evolution Mining Ltd as partner (51%) and operator of the EKJV.

Matters subsequent to the end of the financial year

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with the Australian Accounting Standards and the Corporations Act 2001 and for such internal controls as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

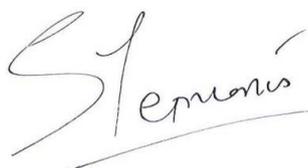

Auditor's Responsibilities for the Review of the Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the Corporations Act 2001 including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2021 and its performance for the half year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporation Regulations 2001.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
