Capital Management

The Board continues to review appropriate ways to change the structure of the issued capital of Beacon Minerals. The structure will be reviewed if there is a material change in the Company's affairs.

Outlook

The Company continues to monitor its cash costs and notes that the past cash costs have been in line with the estimated cash costs reported in the Company's PFS.

It is widely known cost pressures are affecting the mining sector. Beacon is currently reviewing its costs aiming to maintain its previously estimated cash costs but increases in areas such as wages, fuel, reagents, grinding media and steel will impact on the Company's ability to continue to keep costs at PFS levels.

The Company will provide further information in the March 2022 Quarterly Production Update.

MD/Chairman Graham McGarry commented:

"The payment of a fully franked interim dividend for year ended 2022 brings our total dividend payments to \$0.0095 per share, with \$0.0025 per share being fully franked.

"To date the Company has returned approximately \$34.02 million to shareholders.

"The Company is pleased to advise that exploration drilling has commenced at the MacPhersons Reward Project. The MacPhersons Reward Project, only 45km southeast of Jaurdi Gold Project, was acquired recently as a strategic opportunity for Beacon to optimise the value of its existing infrastructure and capture operational synergies.

“The Company advises that processing of the stockpiled Panther Ore will be completed in March 2022.

“The Board is pleased with the operations of the Company at the Jaurdi Minesite and the announcement of today’s dividend is a testament to the operations staff and employees who make it possible.”

The Company would like to advise that all shareholders should check and update, if required, your banking details. You can visit the registry’s online Investor Portal – www.investor.automic.com.au/#/home.
