

Company Overview

Elixir's main asset is its 100% owned Nomgon IX Coal Bed Methane (CBM*) Production Sharing Contract (PSC) project in the South Gobi region of Mongolia

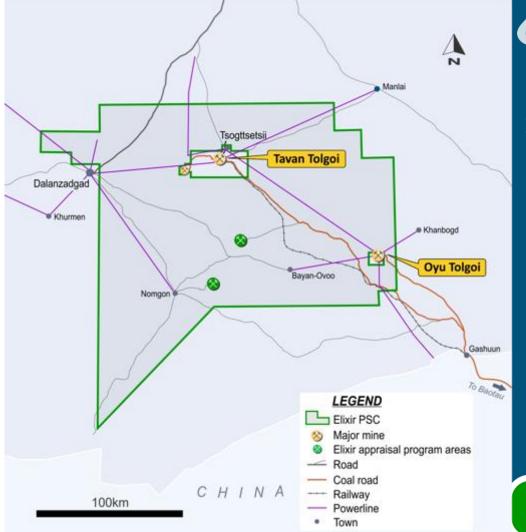

Highly experienced CSG team – first mover in taking Australia's leading skills to Mongolia

Located on Mongolian/Chinese border with excellent infrastructure, mines and planned pipelines

This location provides many market options – now including green hydrogen

Strong balance sheet funding aggressive exploration and appraisal program for years to come

^{*} Coal Seam Gas – CSG – is usually referred to as CBM outside Australia

Capital Structure / Board

Capital Structure No of Shares Performance Shares & Options Market Capitalisation (at 15c) Cash (at 31st Dec - unaudited) Enterprise Value Current (pre-raise) \$92M \$134M \$28M \$106M

Highly experienced CSG team

Richard Cottee

Non-Executive Chairman

Former Managing Director of CSG focused Queensland Gas Corporation (QGC), taking it from market cap of \$20M to \$5.7B

Other former CEO positions include CS Energy, NRG Europe & Central Petroleum

Neil YoungManaging Director

Former Business Development Manager at Santos, where he helped build Santos' CSG business Has worked in Mongolia since 2011

Stephen Kelemen Non-Executive Director

Extensive technical and commercial career at Santos, including managing its CSG business Current Non Executive Director at CSG focused Galilee Energy (GLL)

Anna Sloboda Non-Executive Director

Previous employers include Lehman Bros, Clough, Curtin University & Trans-Tasman Resources Ex-USSR background and experience of working in China

2022 Exploration/Appraisal Program

Wells

- 2 Pilot Production Wells
- 22 Exploration & Appraisal Wells
- 1 short term pilot production test

Seismic

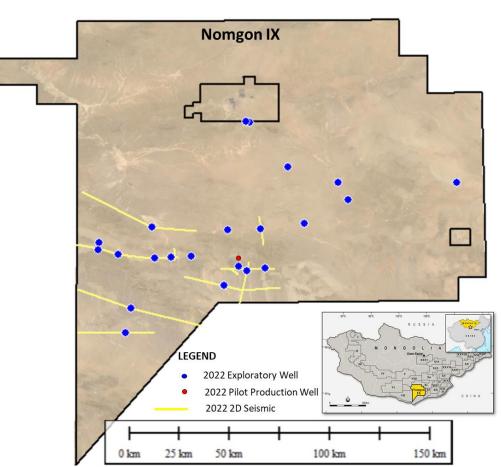

- 322 km 2D
- Seismic re-interpretation

Commercial

 Progressing gas fired generation project with Government

Field Work

3 field expeditions

Extended Pilot Production Test

Aim

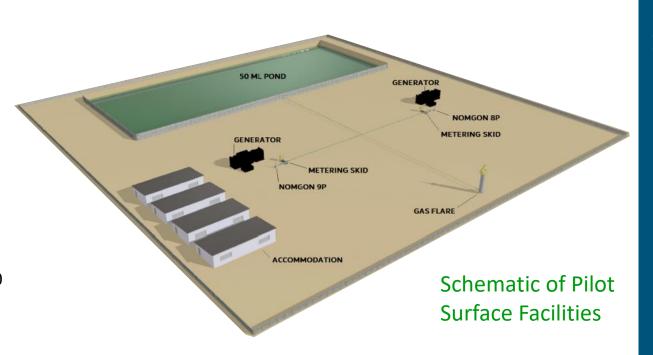

- Dewater coals and flow gas from the Nomgon CBM discovery
- Provide proof of concept for commercial development

Wells

- 2 production wells 100m apart
- Depth to coal ~450m
- Pressure monitoring wells 110 and 400m along strike

Production

 Water and gas production over a maximum 6 month period

Timetable

Activity	Q1 2022	Q2 2022	Q3 2022	Q4 2022
Regulatory & Community	• National Approvals • Local Govt Permitting	• Local Govt Permitting • Community Liaison & Investment	• Community Liaison & Investment	• Community Liaison & Investment
G&G Studies and Analysis				
Seismic Acquisition		~122 km	~200 km	
Drilling	~2 wells	~7 wells	~7 wells	~6 wells
Production Testing		• Drilling • Testing • Monitoring • Measuring	• Drilling • Testing • Monitoring • Measuring	

Work program continues to expand

Gobi H2 Project

- Mongolia combines:
 - Exceptional renewable resources
 - A H2 market that can be reached by pipeline not boat
- These advantages make *Gobi H2* a potential globally Tier
 One green hydrogen export project
- Elixir is engaging with the multiple stakeholders required for a successful project
- Support has been incredibly strong
- The primary goal for 2022 is to materially advance a 10 MW pilot project

MOU with Govt

Pilot feasibility study underway

Targeting Chinese steel mills

Project finance plans progressing

Short and long term water procurement

Banking renewable resources

An advantageous location for H2 production

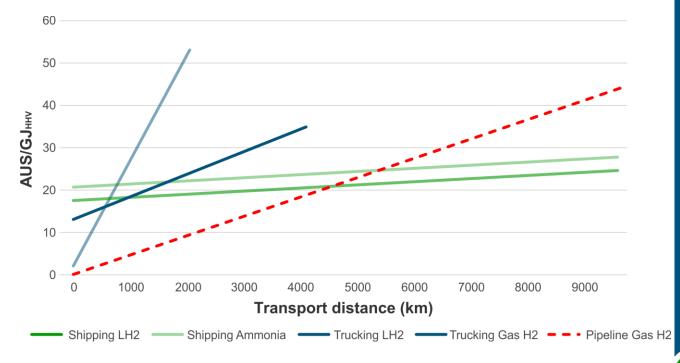

Hydrogen Delivery Costs

- Around 2/3 of the cost of producing green H2 are the cost of renewables
- Shipping H2 by boat costs multiples (~\$20/GJ) of shipping the same energy as CH4 (~\$5/GJ)
- The delivered cost of H2 is therefore all about the quality of renewable energy and the cost of delivery
- Access to markets by pipeline is massively advantaged over seaborne supplies – Mongolia can supply H2 to Chinese markets by pipeline

Cost of gas-to-gas hydrogen transportation, including conversion and reconversion - 2030s For hydrogen production of ~15PJ/year

Source: Rystad Energy research and analysis commissioned by Elixir Energy -

Pilot Project

- Gobi H2 will develop a pilot project in the medium term
- The pilot will serve to demonstrate viability and create confidence with multiple stakeholders: customers, policy makers, financiers, potential partners, local communities, etc
- A 10 MW electrolyser pilot is proposed using renewable electricity generated in the Gobi region
- A number of possible foundation customers are under consideration – in Mongolia and the PRC
- Elixir plans to drill for local water sources in 2022
- The pilot project will be project financed Elixir is working with the Mongolia Green Finance Corporation and interacting with various Ulaanbaatar based IFIs

"A Tale of Two Gases"

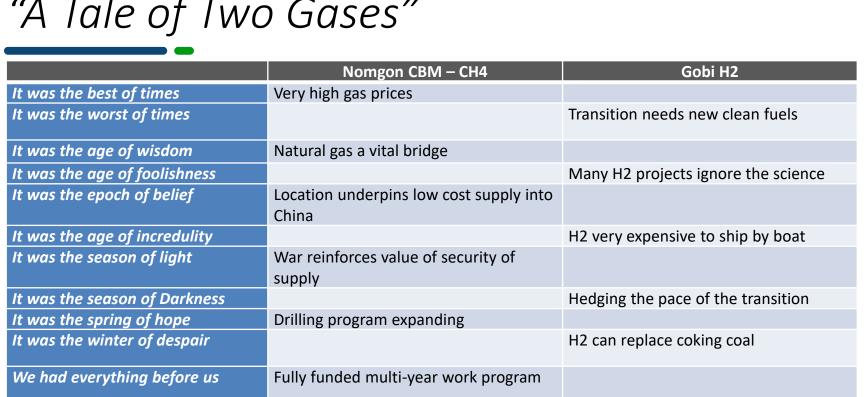

We had nothing before us

Heaven

way

We were all going direct to

We were all going direct the other

Economies rest on energy

First mover in long term project

Material carbon reduction project

Investment Highlights

First mover CSG company in Mongolia – now a growing industry attracting wider interest

Expanding program again in 2022 – growing and derisking resources through a ~24 well program

Very strong balance sheet and 100% asset ownership provides maximum strategic optionality

Exceptional in country relationships, a strong local team, supported by Australian leading technical expertise

Gas market action in recent months supports the long term need for the product and Mongolia's great East Asian location

Elixir considers its *Gobi H2*Project is emerging as a potential world class green hydrogen export project
