

11 April 2022

GreenTech appoints experienced mining executive Rod Webster as Non-executive Director

GreenTech Metals Ltd (ASX: GRE), ('**GreenTech**' or 'the **Company**') is pleased to announce that Roderick (Rod) Webster has joined the GreenTech Board of Directors as a Non-executive Director.

Mr Webster is a mining engineer (University of Sydney) with over 40 years of experience in the resources industry including more than 16 years as CEO of publicly listed companies.

Mr Webster's early career included management positions with Homestake Gold of Australia Ltd and BHP Minerals Ltd. Between 2001 and 2005 Mr Webster was a senior executive with First Quantum Minerals Ltd, a Canadian listed company developing copper mines in Zambia and Mauritania. Mr Webster was also the founding Director and CEO of Western Metals Ltd, a major Australian base metals producer during which time he served on the executive committee of the International Zinc Association. He was a founding Director and CEO of Weatherly, a company engaged in copper mining and smelting in Namibia.

Mr Webster is a Fellow of both the Australian Institute of Mining and Metallurgy and the Australian Institute of Company Directors.

Thomas Reddicliffe, Executive Director, commented:

"We welcome Rod Webster to the Board of GreenTech Metals. Rod brings with him a wealth of technical and commercial experience which will assist the Company in assessing the commercial potential of the Whundo Project but also in unlocking value across our highly prospective copper, nickel and gold focussed project portfolio".

As a term of his appointment, Mr Webster has been issued with 250,000 options exercisable at \$0.30 each on or before 11 April 2024. These options have been issued prior to Mr Webster being appointed as a director, and using the Company's capacity under Listing Rule 7.1.

This announcement is approved for release by the Board of Directors

About GreenTech Metals Limited

The Company is an exploration and development company primarily established to discover, develop, and acquire Australian and overseas projects containing minerals and metals that are used in the battery storage and electric vehicle sectors. The Company's founding projects are focused on the underexplored nickel, copper and cobalt in the West Pilbara and Fraser Range Provinces.

The green energy transition that is currently underway will require a substantial increase in the supply of these minerals and metals for the electrification of the global vehicle fleet and for the massive investment in the electrical grid, renewable energy infrastructure and storage.
