## **RINCON 2,000TPA Li<sub>2</sub>CO<sub>3</sub> OPERATIONAL UPDATE**

### **HIGHLIGHTS**

- **71% of total construction works now complete - first production of battery quality Li<sub>2</sub>CO<sub>3</sub> product targeted during next quarter**
- **2,000tpa lithium carbonate process plant development works progressing on schedule and budget**

Argosy Minerals Limited (ASX: **AGY**) ("**Argosy**" or "**Company**") is pleased to advise further progress at the Rincon Lithium Project, located in Salta Province, Argentina, with 71% of the total works now completed for the development of the modular 2,000tpa lithium carbonate production operation.

The Company remains on schedule to achieve first production of >99.5% battery quality lithium carbonate product during the next quarter.

The 2,000tpa production operation major works comprise three main phases of works, comprising design, construction and commissioning.

- The design phase works (including engineering layout) are fully complete (100%);
- The construction phase works are 74% complete;
- Plant commissioning works (comprising raw materials acquisition and workforce/team development) are 13% complete.

The construction phase comprises the process plant, equipment and associated installations, earthworks and site facilities (including additional camp development and associated site infrastructure), and expansion of the brine system (pumping station, plant settling ponds), with all works progressing on budget and schedule, with;

- 99% of earthworks/land movements completed;
- 94% of site works completed (comprising site camp/accommodation, laboratory, office, and other works);
- the brine system works are fully complete (100%) (comprising pumping station and plant settling ponds works);
- 72% of the process plant completed (comprising plant equipment acquisition and plant warehouse works); and
- 64% of utilities and associated services (comprising vapour system, communication system and ancillary services works).

The Company is progressing toward successfully developing the modular 2,000tpa operation and become a commercial battery quality lithium carbonate producer.

Argosy Managing Director, Jerko Zuvela said "**The Company's Puna operations team continues with construction and development works progress at our Rincon Lithium Project, as we move closer to commencing the 2,000tpa lithium carbonate production operations.**"

## ASX ANNOUNCEMENT

***The Company's priority is to ensure the final construction completion works are executed to the highest possible standards, to ensure commissioning works are conducted smoothly and seamlessly. With such works, we are focussed on completing these correctly and diligently, given the outside matters affecting all projects currently.***

***The lithium market remains very positive and lithium carbonate prices may allow very lucrative product sales revenues. This is providing strong and additional interest from major groups in our project and especially our product, noting our Rincon Lithium Project will become the next commercial scale operation. Argosy's transformation into a cashflow generator is nearing, whilst also progressing toward the next stage 12,000tpa scale operations. We look forward to a significant near-term growth phase from our operations this year and beyond."***

**Figure 1. Rincon Lithium Project – 2,000tpa Operation Site Layout (schematic)**

Current and recent construction works have concentrated on completion works of the on-site office and laboratory, equipment procurement, delivery and installation, building the smaller industrial sheds, and additional camp accommodation facilities.

Furthermore, additional process tanks and reactors, and back-up generators have been delivered to site, whilst the industrial water treatment system is ready for installation, only awaiting overseas parts (due to shipping delays) for the additional camp facility installation. The electrical, communication, and fire emergency systems are all undergoing development works, whilst other upcoming works are focused on plant and equipment delivery and installation, utilities and associated services supply and installation, and auxiliary systems installation, with significant progress to be made over coming months.

Furthermore, the Company continues its recruitment process, is procuring the raw materials (chemical reagents, etc) in preparation for production operations, and conducting training programs for the production/operations team, including utilising the industrial scale pilot plant for production operations, where the lithium carbonate product produced will be sold to Argentina domestic customers to supply the local market.

Upon completion of the construction phase works, the plant commissioning and production test-works, and ramp-up to 2,000tpa operations will proceed immediately thereafter, with first product expected during the next quarter.

**Forward Looking Statements:** Statements regarding plans with respect to the Company's mineral properties are forward looking statements. There can be no assurance that the Company's plans for development of its mineral properties will proceed as expected. There can be no assurance that the Company will be able to confirm the presence of mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.

Argosy confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Argosy confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

**ASX Listing Rules Compliance**

Argosy advises references to the Company's current target of producing 2,000tpa of high purity battery quality lithium carbonate product at the Rincon Lithium Project should be read subject to and clarified by

## ASX ANNOUNCEMENT

the Company's current intention that the 2,000tpa production target does not extend beyond a two-year period from the Clarifying Announcement (lodged 10<sup>th</sup> February 2021, available at [www.argosyminerals.com.au](http://www.argosyminerals.com.au) and [www.asx.com](http://www.asx.com)).

At the conclusion of the two-year period, it is the Company's current intention that, subject to feasibility, finance, market conditions and completion of development works at the Rincon Lithium Project, the Company's 10,000tpa production target will apply. The current 2,000tpa production target is intended to form a modular part of the 10,000tpa operation from its commencement.

Argosy further advises that references in this ASX release in relation to the 10,000tpa production target are extracted from the report entitled "Argosy delivers exceptional PEA results for Rincon Project" dated 28 November 2018, available at [www.argosyminerals.com.au](http://www.argosyminerals.com.au) and [www.asx.com](http://www.asx.com). Argosy confirms that it is not aware of any new information or data that materially affects the information included in the Announcement and, in the case of the Production Target, Mineral Resources or Ore Reserves contained in the Announcement, that all material assumptions and technical parameters underpinning the estimates in the PEA announcement continue to apply and have not materially changed. Argosy confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the PEA announcement.

## ABOUT ARGOSY MINERALS LIMITED

Argosy Minerals Limited (ASX: AGY) is an Australian company with a current 77.5% (and ultimate 90%) interest in the Rincon Lithium Project in Salta Province, Argentina and a 100% interest in the Tonopah Lithium Project in Nevada, USA.

The Company is focused on its flagship Rincon Lithium Project – potentially a game-changing proposition given its location within the world renowned "Lithium Triangle" – host to the world's largest lithium resources, and its fast-track development strategy toward production of LCE product.

Argosy is committed to building a sustainable lithium production company, highly leveraged to the forecast growth in the lithium-ion battery sector.
