About Theta Gold

Theta Gold Mines Limited controls and dominates the Eastern Transvaal Gold Fields, where South Africa's gold mining industry began almost 130 years ago. And we're bringing this large forgotten historical shallow goldfield back to life.

The Transvaal Gold System sits geological on the eastern side of Bushveld Complex the largest igneous intrusion on earth. We have already generated and delivered one of the largest gold resources on the ASX not controlled by major mining houses.

The gold plant is near the towns of Pilgrim's Rest and Sabie in Mpumalanga Province, 370km northeast of Johannesburg. The TGME Project has more than 43 historical mines identified across the vast prospective goldfield of 620 square km (or 62,000 hectares).
