This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

## **2.9 Shortfall Offer**

Any New Listed Options which are not allocated to Applicants pursuant to the Offer will form the Shortfall Offer (**Shortfall Options**) and potentially be allocated to other Eligible Shareholders or third parties. The Shortfall Offer will only be available where there is a Shortfall between applications received from Registered Holders and the number of New Listed Options proposed to be issued under the Offer.

The issue price for each New Listed Option to be issued under the Shortfall Offer shall be \$0.0002 being the price at which the New Listed Options have been offered under the Offer.

Registered Holders, Eligible Shareholders or third parties, including new shareholders, who wish to subscribe for the Shortfall Options above their holding of Expired Options are invited to apply for the Shortfall Options by completing

the appropriate section of the Application Form and making payment for such Shortfall Options in accordance with Section 2.6 and 2.7 of this Prospectus.

No Related Party (as that term is defined in section 228 of the Corporations Act) will be issued any New Listed Options under the Shortfall Offer, or the Offer except as set out in Section 6.5 of this Prospectus.

Allocation of the Shortfall Options will be at the discretion of the Board. All decisions regarding the allocation of Shortfall Options will be made by the Directors and will be final and binding on all applicants under the Shortfall Offer. Electronic sub-registers also mean ownership of Securities can be transferred without having to rely upon paper documentation. Further, monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month. Shareholders may request a holding statement at any other time, however a charge may be made for such additional statements.

The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of

## 5. RISK FACTORS

### 5.1 Introduction

The New Listed Options offered under this Prospectus are considered speculative and an investment in the Company is not risk free.

The Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for New Listed Options pursuant to this Prospectus.

The future performance of the Company and the value of the New Listed Options may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks identified in this Section 5, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

This following is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

### 5.2 Company specific

Risk Category	Risk
<b>Potential for dilution</b>	<p>Upon implementation of the Offer, assuming all New Listed Options are issued, the number of Options in the Company will increase by up to 968,710,000.</p> <p>If the Options are subsequently exercised and Shares are issued on exercise of those Options, each Share will represent a significantly lower proportion of the ownership of the Company.</p> <p>It is not possible to predict what the value of the Company, a Share or an Option will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.</p> <p>In the future, the Company may elect to issue Securities in connection with fundraisings, including to raise proceeds, to fund further exploration of its projects. While the Company will be subject to the constraints of the ASX Listing Rules regarding the percentage of its capital it is able to issue within a 12-month period (other than where exceptions apply), Shareholders may be diluted as a result of such issues</p>

Risk Category	Risk
<p><b>Going Concern</b></p>	<p>of Securities and fundraisings.</p> <p>The Company's Annual Financial Report for the year ending 30 June 2021 (<b>Financial Report</b>) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.</p> <p>The ability of the Company to continue as a going concern is dependent upon the ability of the Company to secure funds by raising capital from equity markets and managing cash flow in line with available funds. If the Company is unable to secure the necessary funding, it may cast significant doubt about the Company's ability to continue as a going concern and therefore the Company may be unable to realise its assets and discharge its liabilities in the normal course of business at amounts stated in the financial report.</p>
<p><b>Additional requirements for capital</b></p>	<p>The Company's ongoing activities will require ongoing expenditures. There can be no guarantee that the funds raised by the Company under the Offer and other capital raisings will be sufficient to successfully achieve all the objectives of the Company's overall business strategy.</p> <p>If the Company is unable to continue to use equity to fund expansion after the substantial exhaustion of the Company's existing funds, there can be no assurances that the Company will have sufficient capital resources for that purpose, or other purposes, or that it will be able to obtain additional funds on terms acceptable to the Company or at all.</p> <p>The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.</p>
<p><b>Climate Risk</b></p>	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <p>(a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit</p>

Risk Category	Risk
	<p>any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and</p> <p>(b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.</p>
<b>Environmental risks</b>	<p>Environmental risks are inherent in mining operations. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.</p> <p>The Board is strongly committed to conducting operations in an environmentally responsible manner. Surface disturbance is kept to a minimum, but where it is necessary, full cognisance is given to the environmental impact of the work to be carried out. Relevant government approvals are obtained and measures are taken to minimise the environmental impact and to ensure that following the activities involved, the land is restored and rehabilitated to as close as possible to its original condition.</p> <p>The Board is not aware of any complaints about the Company's environmental practices or impacts of its activities from owners of land on which the Company has operated or from any relevant Government officers or agencies with regulatory responsibility.</p>
<b>Coronavirus (COVID-19) – Outbreak risk</b>	<p>The outbreak of the coronavirus disease (COVID-19) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In</p>

Risk Category	Risk
	<p>compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on its revenue channels and any adverse impact on the Company. If any of these impacts appear material prior to close of the Offer, the Company will notify investors under a supplementary prospectus.</p>
<p><b>Negative publicity may adversely affect the Share price</b></p>	<p>Any negative publicity or announcement relating to any of the Company's substantial Shareholders, key personnel or activities may adversely affect the stock performance of the Company, whether or not this is justifiable. Examples of such negative publicity or announcements may include involvement in legal or insolvency proceedings, failed attempts in takeovers, joint ventures or other business transactions.</p> <p>No such issues are currently known to affect the Company.</p>
<p><b>Exploration Risk</b></p>	<p>The mineral exploration licences comprising the Company's projects are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.</p> <p>There can be no assurance that future exploration of these licences, or any other mineral licences that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.</p>
<p><b>Tenure and Title Risk</b></p>	<p>Mining and exploration tenements are subject to periodic renewal. There is no guarantee that current or future tenements or future applications for tenements will be approved in full or at all.</p> <p>In addition, interests in tenements in Australia are governed by the respective State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance.</p> <p>Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments. The Tenements currently also comprise a number of pending tenement applications.</p> <p>Whilst the Company's view is that the risk pending applications are not granted is low, if those applications were not to be granted, then there is a risk that the Company cannot commence its operations in respect of the Project area that is covered by the relevant application, and that the value of the Project is correspondingly diminished.</p>

Risk Category	Risk
	If/once granted, the pending applications will be covered by the relevant access agreements.
<b>New projects</b>	To achieve the Company's objectives, the Company may acquire or invest in new projects from time to time. However, there is always risk that the Company may not be successful in negotiating for an acquisition of a new project. Any new projects will also be subject to their own inherent and specific risks.
<b>Development Risk/Profitability</b>	<p>The Company's commercial viability will be dependent upon the successful development and operation of the Company's projects.</p> <p>No assurances can be given that the Company will be able to initiate or sustain successful mining operations at any of the Company's current tenements or that operations will achieve commercial viability. Equally, no representation as to future profitability or dividends can be given.</p>
<b>Production and cost estimates</b>	By their very nature, production and cost estimates and assumptions are inherently subject to significant uncertainties. Actual results may materially differ from the Company's estimates and assumptions and may materially and adversely affect the Company's commercial viability and future results.
<b>Access and infrastructure risk</b>	Access on and to tenements may be subject to the availability of appropriate infrastructure or the consent of third parties. There is no guarantee that agreement can be reached with interested third parties or that the necessary infrastructure required to access or develop the tenements will be available or viable.
<b>Reliance on key personnel</b>	The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.
<b>Commodity and Currency Volatility Price</b>	<p>Commodity prices are subject to influencing factors beyond the control of the Company and can be subject to significant fluctuations. Some of these influencing factors include:</p> <ul style="list-style-type: none"> <li>(a) the COVID-19 pandemic;</li> <li>(b) world demand for particular commodities;</li> <li>(c) the level of production costs in major commodity producing regions; and</li> <li>(d) expectations regarding inflation, interest rates and US dollar exchange rates. Any significant and/or sustained fluctuation in exchange rates or commodity prices could have a materially adverse effect on the Company's</li> </ul>

Risk Category	Risk
	<p>operations and financial position.</p> <p>Factors affecting commodity prices include:</p> <ul style="list-style-type: none"> <li>(a) supply and demand fluctuations for specific commodities;</li> <li>(b) changes in investor sentiment toward specific commodities;</li> <li>(c) speculative trading;</li> <li>(d) forward selling activities; and</li> </ul> <p>macro-economic factors such as inflation and interest rates.</p>
<p><b>Ore Reserves and Mineral Resources Estimates</b></p>	<p>Should the Company define an ore reserve and/or mineral resource on any of its projects, they will be estimates that are expressions of judgment based on knowledge, experience and industry practice, and may require revision on actual production experience.</p>

### 5.3 Industry specific

Risk Category	Risk
<p><b>Environmental Regulation</b></p>	<p>The Company's operations are subject to national and international laws and regulations due to those operations involving environmentally hazardous activities. These laws and regulations set various standards regulating certain aspects of health and environmental quality and provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to remediate current and former facilities and locations where operations are or were conducted.</p> <p>Significant liability could be imposed on the Company for environmental damage caused by the Company or previous owners of the Tenements, including damages, clean-up costs and penalties for non-compliance with environmental laws or regulations. The Company proposes to minimise these risks by conducting its activities in an environmentally responsible manner, in accordance with applicable laws and regulations and where possible, by carrying appropriate insurance coverage. No assurance can however be given that environmental damage will not occur from time to time through the Company's operations.</p>
<p><b>Occupational health and safety</b></p>	<p>There is an inherent risk of workplace accidents occurring during the conduct of mining activity. The Company is committed to providing a safe and healthy workplace for the Company's employees and contractors, where engaged from time to time. Hazardous activities are avoided wherever possible, but when necessary, all employees and contractors are required to conduct themselves in accordance</p>

Risk Category	Risk
	with all applicable laws and policies in force from time to time in respect of occupational health and safety.
<b>Mining risks</b>	<p>Mining is subject to inherent risks and is dependent upon a number of conditions beyond the control of the Company that can affect the costs and production schedules at particular mines. These risks and conditions include, but are not limited to:</p> <ul style="list-style-type: none"> <li>(a) variations in geological conditions, such as the grade and thickness of the mineralisation and variations in rock and other natural materials overlying the mineral deposit;</li> <li>(b) mining, process and equipment or mechanical failures and unexpected maintenance problems;</li> <li>(c) adverse weather and natural disasters, such as heavy rains, flooding and other natural events affecting the operations, transportation or customers;</li> <li>(d) environmental hazards, such as subsidence and excess water ingress;</li> <li>(e) delays and difficulties in acquiring, maintaining or renewing necessary permits or mining rights;</li> <li>(f) availability of adequate skilled employees and other labor relations matters;</li> <li>(g) unexpected mine accidents, including rock-falls and explosions caused by natural gas or other explosive sources at our mine sites or fires caused by similar mining accidents; and</li> <li>(h) competition and/or conflicts with other natural resource extraction activities and production within our operating areas.</li> </ul> <p>These risks and conditions could result in damage to or the destruction of the Company mineral properties or production facilities, personal injury or death, environmental damage, delays in mining, monetary losses and legal liability. The Company's insurance coverage may not be available or sufficient to fully cover claims that may arise from these risks and conditions.</p>
<b>Operational Risks</b>	<p>The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, insufficient or unreliable infrastructure such as power, water and transport, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents,</p>

Risk Category	Risk
	<p>industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.</p> <p>Consequently, and while the Directors will make every effort to reduce the above risks through their experience in the exploration and mining industry, there can be no assurance that the Company will be able to develop and commercialise mineral extraction from its tenements and generate positive cashflow to sustain the Company's financial viability. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.</p>
<b>Native Title Risk</b>	<p>It is possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If/where native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant native title claimant), or to progress from the exploration phase to the development and mining phases of operations may be affected</p>
<b>Uninsured Loss and Liability</b>	<p>Exploration for and development of minerals involves hazards and risks that could result in the Company incurring losses and liabilities to third parties. There is a risk that the Company may not be insured against all losses or liabilities that could arise from the Company's operations. If the Company incurs losses or liabilities which are not covered by the Company's insurance policies, the funds available for exploration and development will be reduced and the value and/or tenure of the Company's assets may be at risk.</p>
<b>Insurance</b>	<p>The Company intends to insure its operations are in accordance with industry practice. However, in certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition, and results of the Company.</p> <p>Insurance of all risks associated with mineral exploration and production is not always available and where available the costs can be prohibitive.</p>

## 5.4 General risks

Risk Category	Risk
<b>Economic</b>	<p>General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p>
<b>Market conditions</b>	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> <li>(a) general economic outlook;</li> <li>(b) introduction of tax reform or other new legislation;</li> <li>(c) interest rates and inflation rates;</li> <li>(d) changes in investor sentiment toward particular market sectors;</li> <li>(e) the demand for, and supply of, capital; and</li> <li>(f) terrorism or other hostilities.</li> </ul> <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p> <p>In addition, the extent of the effects of COVID-19 is at this stage uncertain and continuing to evolve. The COVID-19 pandemic is having, and is expected to continue to have, a significant influence on the volatility of equity markets generally and may continue to impact and influence the value of the Company's quoted securities.</p>
<b>Litigation risks</b>	<p>The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. All industries, including the mining industry, are subject to legal claims, with and without merit. Further, the Company may be involved in disputes with other parties in the future which may result in litigation.</p> <p>Defence and settlement costs of legal claims can be substantial, even with respect to claims that have no merit. Due to the inherent uncertainty of the litigation process, the resolution of any particular legal proceeding to which the Company is or may become subject to, could have a material effect on the Company's operations, financial position, and the value of the Company's securities.</p>

Risk Category	Risk
	The Company is not currently engaged in any litigation.
<b>Dividends</b>	Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.
<b>Commodity price volatility</b>	<p>Should the Company enter production, substantially all the Company's revenues and cash flows will be derived from the sale of Copper and Gold concentrates. Therefore, the financial performance of the Company would be exposed to fluctuations in the price of these commodities. Historically, the price of these commodities has fluctuated widely and has experienced periods of significant decline. The price of these commodities is affected by numerous factors and events that are beyond the control of the Company.</p> <p>These factors and events include general economic activity, world demand, forward selling activity as well as general global economic conditions and political trends.</p>
<b>Taxation Risks</b>	<p>The Company is subject to Australian tax legislation, practice and interpretation. Any change in the Company's tax status or the tax applicable to the Company's securities through taxation legislation or its interpretation, could affect the value of the investments held by the Company, its ability to provide returns to Shareholders, or alter the post-tax returns to Shareholders.</p> <p>Information relating to the taxation of the Company and its investors is based upon current tax law and practice which is subject to legislative change. Furthermore, the taxation of an investment in the Company depends on the individual circumstances of investors. Changes in the tax laws of Australia could have a material adverse effect on the Company.</p> <p>There can be no assurance that the Company will be able to make returns for Shareholders in a tax-efficient manner.</p> <p>The Company has made certain assumptions regarding taxation in establishing its corporate structure, the ongoing management of its taxation affairs and compliance with taxation legislation within the jurisdictions in which the Company operates. If these assumptions are not correct, taxes may be imposed with respect to the Company's assets, or the Company may be subject to tax on its income, profits, gains or distributions (including on a liquidation and dissolution or otherwise) in a particular jurisdiction or jurisdictions in</p>

Risk Category	Risk
	<p>excess of taxes that were anticipated.</p> <p>This could alter the level of returns and/or adversely affect the quantum of post-tax returns for Shareholders (or Shareholders in certain jurisdictions). Any change in laws or tax authority practices could also adversely affect any post-tax returns of capital to Shareholders or payments of dividends. In addition, the Company may incur costs in taking steps to mitigate any such adverse effects on the returns for Shareholders.</p>
<b>Regulatory</b>	<p>The Company's activities will require compliance with various laws relating to the protection and rehabilitation of the environment, health and safety, culture and heritage and other matters. In addition, the Company is required to obtain numerous government permits, leases, licences and approvals in respect of our exploration and mining operations. There is a risk that the Company may not obtain or may lose permits, leases, licences or approvals, essential to its operations.</p> <p>The Company cannot predict how existing, or future laws and regulations may be interpreted by enforcement agencies or court rulings, whether additional laws and regulations will be adopted, or the effect such changes may have on the Company's business or financial condition.</p>
<b>Ukraine conflict</b>	<p>The current conflict between Ukraine and Russia (Ukraine Conflict) is impacting global economies and financial markets. The nature and extent of the effect the Ukraine Conflict may have on the Company's operations remains uncertain at this time. In the short to medium term, the Company's Share price may be adversely affected by the economic uncertainty caused by the Ukraine Conflict and the wider effect the conflict has on global economies and financial markets.</p> <p>The Company is monitoring the situation closely and considers the impact of the Ukraine Conflict on the Company's business and financial performance to, at this stage, be limited. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain.</p>
<b>Unforeseen Expenses</b>	<p>The proposed expenditure on the Company's projects may be adversely affected by any unforeseen expenses which arise in the future and which have not been considered in this Prospectus. While the Company is not aware of any expenses that may need to be incurred that have not been taken into account, if such expenses were incurred, the expenditure proposals of the Company may be adversely affected.</p>

## 5.5 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and

others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Listed Options offered under this Prospectus

Therefore, the New Listed Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Listed Options.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for New Listed Options pursuant to this Prospectus.
