## Permitting Granted and Airborne Survey Engaged

### Highlights:

- **Program of Work for the Kookynie Gold Project approved by DMIRS**
- **Airborne Geophysical Survey contract awarded**
- **Survey work anticipated to be undertaken over coming weeks**

Regener8 Resources NL (ASX: R8R) (**Regener8** or the **Company**) is pleased to announce that Program of Work (PoW) applications have been lodged and approved by the Department of Mines, Industry Regulation and Safety (DMIRS) for the Kookynie Gold Project tenements. The approved PoWs provide scope to carry out comprehensive auger soil geochemical surveys and targeted reverse circulation percussion (RCP) drill testing of key target areas.

Regener8 has awarded the airborne geophysical survey contract for an aeromagnetic and radiometric survey over the Kookynie Gold Project – Niagara West and Niagara North tenements to MAGSPEC Airborne Surveys. Together with previous surveys, this survey will ensure a complete, high resolution airborne geophysical dataset is created across all the Project's tenements. The survey is anticipated to be undertaken over the coming weeks, subject to weather conditions and other factors.

**Figure 1: Example Airborne Survey Aircraft**

Managing Director, Stephen Foley, commented: *"We're pleased to work with our key stakeholders, regulators, contractors, and landowners to obtain the relevant approvals, and move to advance Regener8's maiden exploration activities within the first week post listing. I thank them and our team for their ongoing efforts."*

*The airborne survey will enable the creation of a holistic geophysical dataset, and when combined with the upcoming terrestrial exploration activities, will provide substantial new information to further target generation and prioritisation. We are eager to commence various exploration activities as per our prospectus over the coming months."*

Regener8 wishes to thank DMIRS, CSA Global and MAGSPEC Airborne Surveys for their support.

This ASX Announcement has been authorised for release by the Board.

## About Regener8 Resources NL

Regener8 Resources NL (ASX:R8R) listed on the Australian Securities Exchange Friday 8 June 2022 and acquired the Kookynie Gold Project from GTI Energy (ASX:GTR).

Regener8 Resources Kookynie Project is located in the Kookynie district of Western Australia, approximately 150km north of Kalgoorlie and 55km south of Leonora. This historically productive region has produced over 500,000oz\* and has undergone a revival of activity in recent years, with encouraging resource growth and exploration results by neighbours such as Genesis Minerals, Iris Metals, Carnavale Resources and Metallicity.

Regener8 intends to investigate its underexplored tenements located in the heart of this district, with a view to adding value, whilst traversing lightly on country and in a climate sensitive manner.
