

ASX RELEASE | 21 July 2022 | ASX: AON

INVESTOR WEBINAR

Apollo Minerals Limited (ASX: AON) (**Apollo Minerals** or **Company**) invites shareholders to join an investor webinar on **Monday, 25 July 2022 at 1:00pm AEST**.

Managing Director, Neil Inwood, will provide a short presentation followed by a Q&A.

WEBINAR DETAILS

Date: Monday, 25 July 2022

Time: 11:00am AWST (Perth), 1:00pm AEST (Sydney/Melbourne)

Register: <https://bit.ly/3aRWsyk>

Questions: Please send questions to Dannika Warburton investors@investability.com.au or alternatively ask it on the day.

ABOUT APOLLO MINERALS

Apollo Minerals Limited (ASX: AON) is focused on the discovery and development of large scale, near surface, zinc-lead resources at the Company's 100% owned Kroussou Project in Gabon.

Kroussou is a large, province scale zinc project

Previous exploration work has validated the province-scale potential at Kroussou with the identification of 150 zinc-lead mineral occurrences over more than 80km of strike length of prospective geology to date. The potential for further discovery at Kroussou is immense; of 18 identified mineral channels, only four have been drill tested to date.

Near surface, thick mineralisation

The very shallow nature of the zinc-lead mineralization being intersected (average depth < 20m) indicates the low cost development and mining potential at the Project.

Gabon is an attractive, mining-friendly, yet underexplored jurisdiction

Gabon has an establishing mining industry (being a major exporter of manganese, uranium and oil) and of late has seen a growing influx of large Australian-listed companies in the region. The country benefits from well established infrastructure and direct access to global shipping routes (Kroussou is located 230kms from port, connected by rail and sealed roads). Gabon has a favourable Mining Convention with tax concessions for mining exploration, is politically stable and an abundance of hydropower to support low carbon mining operations.

High calibre management team, with a proven track record of discovery success and creating shareholder value

Led by a proven management team with deep African mining experience, including John Welborn (Non-Executive Chairman), Neil Inwood (Managing Director) and Ian Middlemas (Non-Executive Director).

Favourable outlook for zinc - an essential ingredient to the decarbonisation of the world

There is a looming supply shortage for zinc, driven by depleting inventories, a lack of new mines/supply entering the market and by demand growth from clean energy technologies (solar panels and zinc-bromide batteries).

Apollo Minerals is a responsible, community-minded mining company

Apollo Minerals is deeply committed to creating value for the local communities in which we operate, by providing employment opportunities, contributing to the economy by buying locally, and by operating in a low footprint manner that leaves no trace on the environment.

Compelling valuation with multiple upcoming catalysts

A strong pipeline of news flow is expected as the Company advances an aggressive exploration program to delineate the Kroussou's true scale of shallow (open-pittable), high grade zinc-lead mineralization, in order to justify the commencement of feasibility studies.

This announcement has been authorised for release by Managing Director, Mr Neil Inwood.
