## Airborne Survey Completed

### Highlights:

- **Airborne Geophysical Survey completed within 3 weeks after listing on the ASX**
- **Data processing and results interpretation over coming weeks**

Regener8 Resources NL (ASX: R8R) (**Regener8** or the **Company**) is pleased to announce the airborne geophysical survey over the Kookynie Gold Project (Niagara West and North tenements) has been successfully completed. Work will now focus on data processing and results interpretation over the coming weeks including planning and targeting for on ground fieldwork.

Managing Director, Stephen Foley, commented: *“We’re pleased the airborne survey has been safely and efficiently completed within 3 weeks from listing on the ASX. This is a key milestone of our initial exploration strategy and will provide critical data to further understand the geology and target generation. We are looking forward to obtaining the final deliverables and deep diving into interpretation and analysis, while we plan for on ground activities over the coming months.*”

*Regener8 is appreciative of the support received from MAGSPEC Airborne Surveys, local station owners on which our tenements are located, and associated stakeholders in achieving this milestone.”*

### Relevant ASX Announcements:

- 15.07.2022 “Permitting Granted and Airborne Survey Engaged”
- 13.07.2022 “Successful listing on ASX and Corporate Presentation”

This ASX Announcement has been authorised for release by the Board.

## About Regener8 Resources NL

Regener8 Resources NL (ASX:R8R) listed on the Australian Securities Exchange Friday, 8 July 2022 and acquired the Kookynie Gold Project from GTI Energy (Ltd ASX:GTR).

Regener8 Resources Kookynie Project is located in the Kookynie district of Western Australia, approximately 150km north of Kalgoorlie and 55km south of Leonora. This historically productive region has produced over 500,000oz\* and has undergone a revival of activity in recent years, with encouraging resource growth and exploration results by neighbours such as Genesis Minerals, Iris Metals, Carnavale Resources and Metallicity.

Regener8 intends to investigate its underexplored tenements located in the heart of this district, with a view to adding value, whilst traversing lightly on country and in a climate sensitive manner.
