

Quarterly Activities and Cash Flow Report for the Quarter Ended 30 June 2022

CORPORATE

Strategy and Business Model

Cyclone Metals Limited (**ASX: CLE**) (**Cyclone Metals** or the **Company**) is an Australian domiciled mineral development and investment company. Cyclone Metals has interests in several exploration and mining projects and companies, providing exposure to copper, gold, iron ore, lithium, rare earths, uranium and lead-silver-zinc assets in Australia, Europe, Africa and South America (refer Figure 1).

Cyclone Metals' strategy is to acquire and invest in undervalued and/or distressed mineral assets and companies (**Projects**) and:

- improve the value of these Projects, through a hands-on approach to management, exploration, evaluation and development; and
- retain long-term exposure to these Projects through a production royalty and/or equity interest.

Cyclone Metals aims to deliver Shareholder value by adding value to these undeveloped Projects. If Projects are converted into cash, the Company intends to follow a policy of distributing surplus cash to Shareholders.

Board and Joint Company Secretary Appointment

During the quarter, the Company announced the appointment of Mr Stirling Ross as Non-Executive Director of the Company with effect from 13 April 2022.

On 24 June 2022, the Company announced the appointment of Ms Catherine Grant-Edwards as Joint Company Secretary with effect from 24 June 2022.

Unmarketable Parcels Sale Facility

On 10 May 2022, the Company announced that it had established an Unmarketable Parcel Sale Facility (**Facility**) for shareholders who hold less than A\$500 worth of fully paid ordinary shares (**Unmarketable Parcel**) in the Company. The Company established the Facility to enable shareholders who hold an Unmarketable Parcel to sell their shares without having to act through a broker or pay brokerage or handing fees. Shareholders with an Unmarketable Parcel were instructed to return the Share Retention Form (**Retention Form**) by the closing date of Friday 1 July 2022 if they wished to retain their shareholding.

Subsequent to the quarter end on 6 July 2022, the Company confirmed that following receipt of Retention Forms, the final number of shares eligible to be sold under the Facility was 43,064,049 shares from a total of 2,588 shareholdings. The Company has completed the sale of these shares with proceeds from the sale being distributed to participating shareholders.

Shareholder Meeting

On 20 May 2022, the Company held a general meeting (**GM**) of shareholders. All resolutions were carried.

On 24 February 2022, the Company announced that it would undertake a placement to raise up to \$500,000 (before expenses) at an issue price of \$0.005 per fully paid ordinary shares (**Placement Shares**) with one free attaching unlisted option for every four shares applied for at an exercise price of \$0.006 expiring 12 months from the date of issue (**Placement Options**) (**Placement**). The Placement included a firm commitment from Cyclone Metals Director Will Scott to subscribe for 10,000,000 Placement Shares with 2,500,000 Placement Options on the same terms as the Placement (**Director Shares and Options**). On 23 May 2022, the Director Shares and Options were issued to Will Scott (or nominee) following receipt of shareholder approval at the GM.

On 23 May 2022, the Company issued 50,000,000 performance rights to Tony Sage as resolved at the GM.

Appendix 5B Quarterly Report and Statement of Cash Flows

The ASX Appendix 5B quarterly report is attached to and lodged with this report. The Company's Appendix 5B Quarterly Report covers the 3-month period from 1 April 2022 to 30 June 2022.

During the quarter, exploration and evaluation expenditure was \$263k, predominantly associated with work undertaken on the Grand Port Project, Nickol River Project and tenement compliance costs. Administration and corporate expenditure during the quarter was \$382k which included Director, employee, and consultant costs. In addition, a payment of \$260k was made to the ATO in respect to the tax amount payable. Investing activity inflows during the quarter totalled \$123k from the sale of investments. Financing activity inflows during the quarter was \$50k (before expenses) in relation to the Director Shares and Options issued pursuant to the Placement and \$500k from the advancement of a short-term loan from European Lithium Ltd (ASX: EUR). The Company also received funds of \$50,000 in respect to shares not yet issued at 30 June 2022.

As at 30 June 2022, the Company had approximately A\$314k.

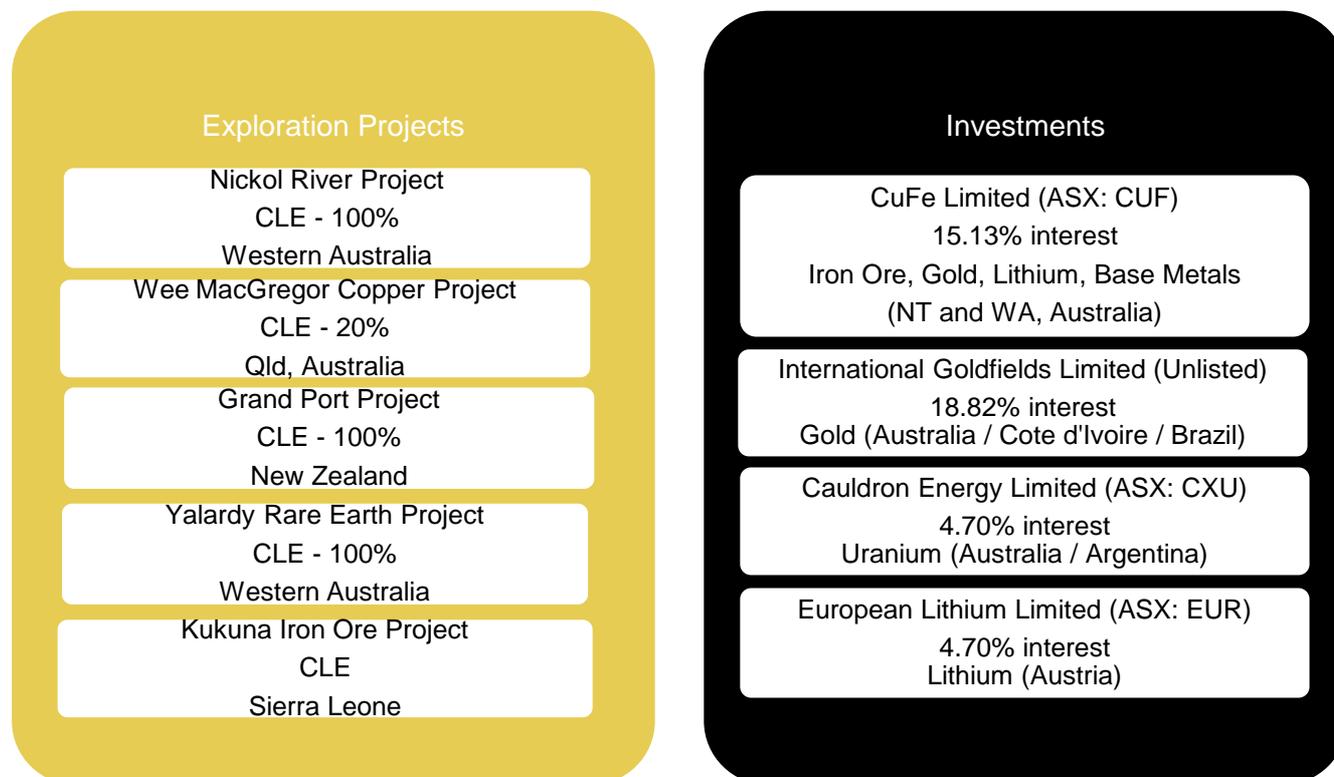

Payments to Related Parties and their Associates

In accordance with ASX Listing Rule 5.3.5, payments to related parties of the Company and their associates during the quarter totalled \$193k relating to the Executive Directors salary and Non-Executive Director fees (\$111k) and payments to Director related entity (\$82k). These amounts are included at item 6.1 and item 6.2 of the Appendix 5B.

On 20 June 2022, the Company entered into a loan agreement and received funds of \$500,000 from European Lithium Ltd (ASX: EUR). The loan is repayable on 30 November 2022 and accrues interest of 5% per annum. On the same day, the Company entered into a deed of variation in respect to the short terms loan entered into with EUR on 14 December 2021 to extend the repayment date to 30 November 2022. Mr Tony Sage is a director of EUR.

Refer to the Remuneration Report in the Annual Report for further details on director remuneration and related party transactions.

Figure 1: Group Structure

PROJECTS

Grand Port Acquisition

On 24 February 2022 and 17 March 2022, the Company announced that it had entered into a binding term sheet with Grand Port Resources Pty Ltd (**Grand Port**) to acquire 100% of the issued share capital of Grand Port which owns and has applications over a diversified portfolio of gold, copper, nickel and PGE assets in New Zealand, with locations show in Figure 2 (together, the **Acquisition**).

Pursuant to the Acquisition, Cyclone agreed to issue a total of 900,000,000 fully paid ordinary shares in the Company (**Consideration Shares**) of which the first tranche of the Consideration Shares of 500,000,000 Consideration Shares (**Tranche 1 Consideration Shares**) were issued on 23 March 2022, and the second tranche of the Consideration Shares satisfied by the issue of 400,000,000 Consideration Shares subject to Cyclone obtaining shareholder approval (**Tranche 2 Consideration Shares**). The Company issued the Tranche 2 Consideration Shares on 23 May 2022 following receipt of shareholder approval at the general meeting of shareholders held on 20 May 2022.

Figure 2: Location of Grand Port Projects

South Island - Longwood

Longwood Range Gold Copper PGE Project (application pending) (**Longwood Project**) is situated 40km west of Invercargill, New Zealand and covers 424km². Historic production includes: ~88koz Au and 1,500oz of platinum. Previous drilling intersected a PGE reef with no follow up work and the project area has been identified as being fertile for copper and nickel by Otago University. There has been only 4 historic drill holes to date on the Longwood Project. On-ground work will kick off with a geochemical sampling program that will generate the maiden drill program.

South Island – Mareburn and Macraes South

The Mareburn Gold Project (**Mareburn Project**) and Macraes South Gold Project (both granted) (**Macraes Project**) (figure 3) covers 464km² within the Otago Goldfield of the South Island, which has 10Moz of proven historical gold production. The Mareburn Project sits 8km north of the producing Macraes Gold Mine and processing plant, New Zealand’s largest producing gold mine, and ~2km from the Coronation open pit. The Macraes Project is contiguous to the south of the Macraes Gold Mine and processing plant.

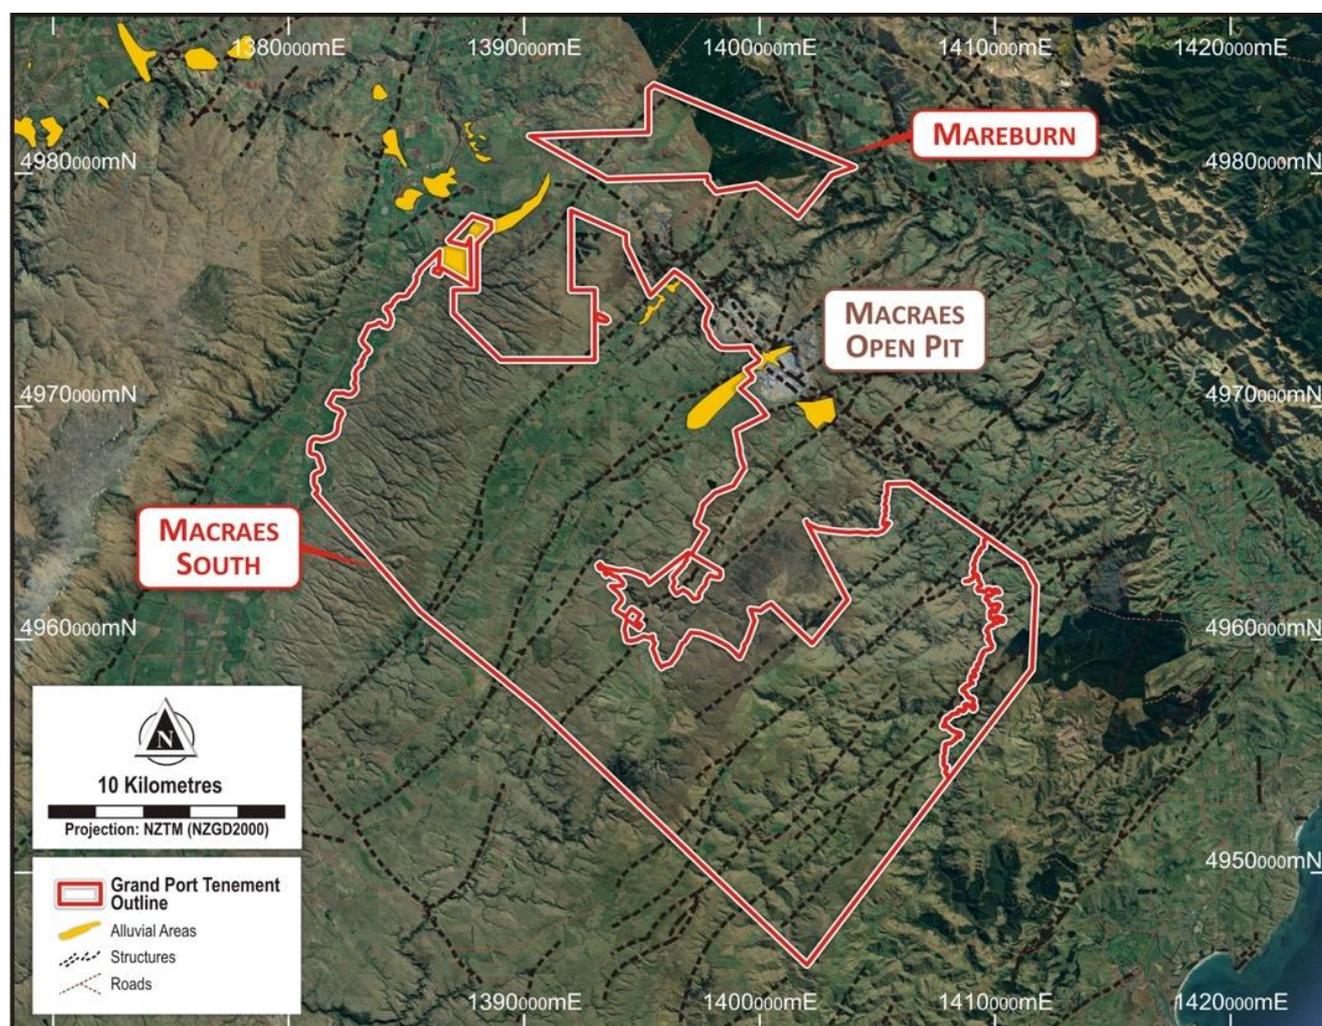

Figure 3: Macraes South and Mareburn Project locations, contiguous to the Macraes Gold Mine.

During the quarter, as announced to the ASX on 3 May 2022, the maiden Cyclone exploration program of geochemical sampling started at the Macraes Project. 54 geochemical samples were collected at the Mareburn Gold Project for Ionic Leach and Supertrace analytical techniques, and 182 geochemical samples were collected for Ionic Leach at Macraes South Gold Project.

The sampling program targeted known occurrences of gold mineralisation and cross-cutting structures which are of primary interest to Cyclone.

South Island – Drybread and Waikerikeri

The Drybread – Waikerikeri Gold Project (granted during the quarter) (**Drybread Project**) (Figure 4) covers ~198km² and crosses over Santana Minerals Limited's (ASX: SMI) Bendigo-Ophir Project in Central Otago and contains historical alluvial workings contiguous to the Drybread Project. The area has been underexplored for hard rock potential with no primary gold exploration undertaken.

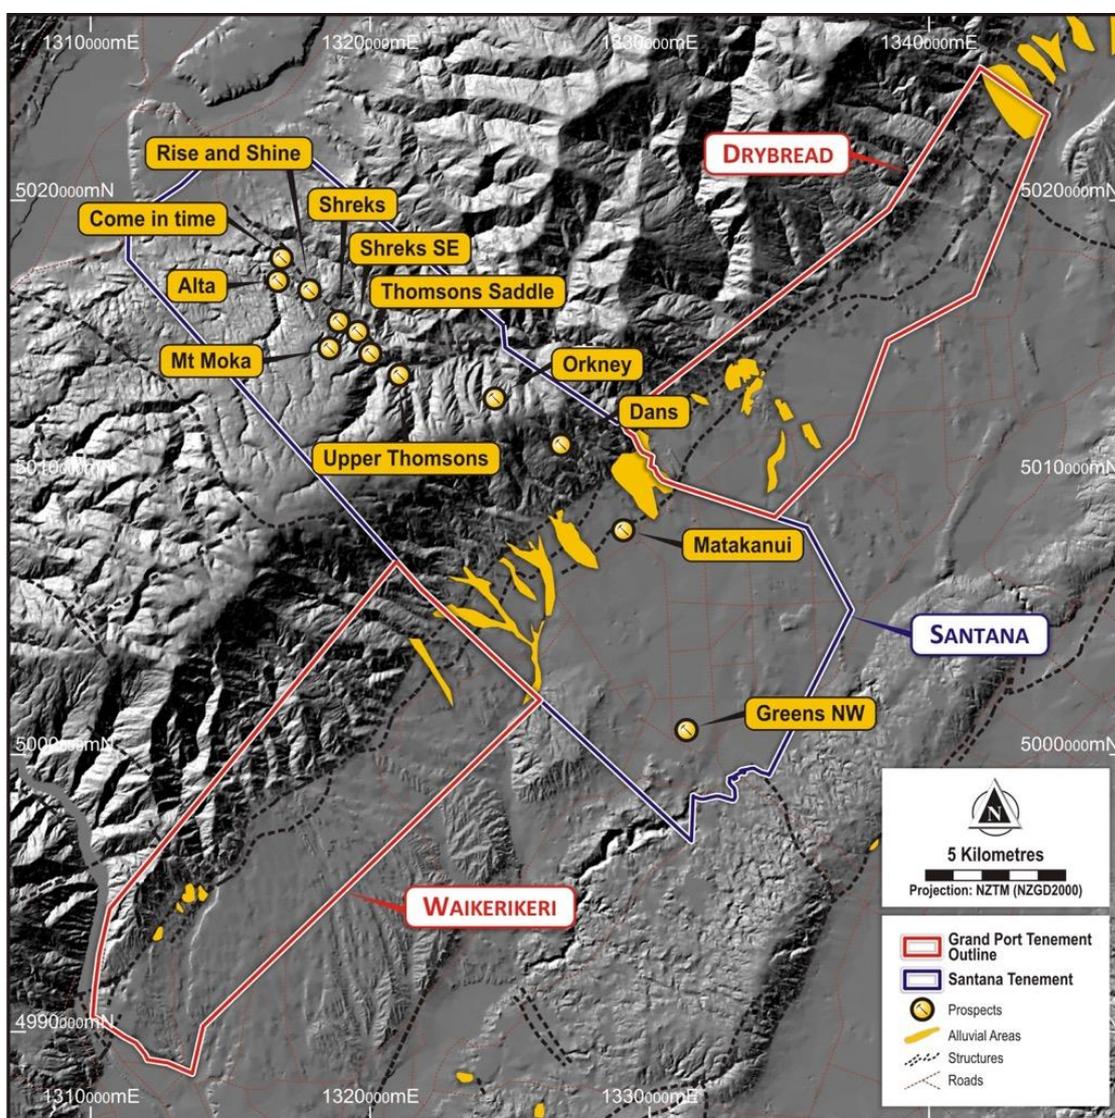

Figure 4: Drybread and Waikerikeri projects contiguous to Santana Minerals project

North Island - Muirs

Muir's Reef Gold Project (granted in March 2022) (**Muir's Project**) covers 52.6km² and is close to Oceania's Hauraki Gold Field with 45Moz proven historical gold production.

During the Quarter the original Muir's Reef underground mine plans were sourced and scanned. These will be digitised and incorporated into a maiden JORC 2012 Mineral Resource Estimate (**MRE**) planned for later this year.

The Muir's Project remains underexplored. The proposed work program on the Muir's Project is as follows:

- Stage 1 – Detailed structural mapping from existing gradient array resistivity survey and high-resolution magnetic survey, and field checking, in association with Ionic LeachTM geochemistry sampling as a first pass. Collection of LiDar (ultra-detailed DEM) may substantially improve understanding of the mineralisation. Petrographic studies on existing diamond core focusing on fluid inclusion temperature studies would assist in defining potential gold deposition levels.
- Stage 2 – Infill and step out drilling is recommended using diamond core drilling at both Massey Reef and Muir's Reef (Muir's Projects) to expand the resource, and test targets identified in Stage 1 work and convert the non JORC estimate to JORC (2012).

Cameroon

On 3 June 2022, Cyclone announced that it entered into a binding exclusivity agreement with Ewaah Cameroon Ltd (**Ewaah**) to secure the right to purchase 100% of the issued capital of Camdu Corporation Ltd (**Camdu**) (a company incorporated in Cameroon), which in turn has applied for the mining permit that covers the area of a world class cobalt deposit in southeastern Cameroon, the Nkamouna-Mada Project (**Project**).

The exclusivity agreement has been entered into between Cyclone and Ewaah to secure Cyclone's exclusive right to acquire the mining permit once it is granted to Camdu by the relevant mining authority in Cameroon. The mining permit covers an area of 1,645km² and the Nkamouna and Mada deposits are located within that area.

Under the terms of the agreement, Cyclone will issue 50,000,000 fully paid ordinary shares in the capital of CLE at a deemed issue price of \$0.005 per share and 50,000,000 unlisted options (\$0.01 expiring 12 months from the date of issue) to Ewaah to secure exclusivity which will be issued within 5 days of the mining permit being granted. Upon grant, and subject to Cyclone being satisfied with the findings of due diligence it undertakes during the exclusivity period, the parties will negotiate the consideration payable for the acquisition of the Project.

Wee MacGregor

Mining International Pty Ltd, a wholly owned subsidiary of Cyclone Metals, holds tenure to 4 mining leases located 40 km southeast of Mt Isa in Queensland (**Wee MacGregor Project**) (refer Figure 5).

The tenements are located within in the Eastern Fold Belt of the Mt Isa inlier. The tenements are located in the Mary Kathleen Zone/Wonga Subprovince. This area is prospective for a variety of deposit types, most notably structurally controlled epigenetic copper and gold deposits. Cohiba Minerals Limited (**Cohiba**), through wholly owned subsidiary Cobalt X Pty Ltd, has earned an 80% interest in mining licences ML 2504, ML 2773 and ML 90098 under a Farm-in agreement with Cyclone Metals. The Company retains a 20% interest in the mining licences and a pre-emptive right over the remaining 80%.

The Lady Ethleen tenement (ML 2771) has been 100% retained by Cyclone Metals (**Lady Ethleen**).

The Lady Ethleen tenement is currently being utilized for a trial mining and processing exercise using a newly developed green leach process known as GlyLeach™ (refer ASX announcement 4 October 2020). A successful trial will mean a significant shift in future processing technology and will in turn facilitate possible development of the part owned, nearby Wee Macgregor Project as well as many other potential small assets in the district, that may be economic with access to appropriate processing technology.

The process to be used, known as GlyLeach™, was originally developed and patented by Curtin University and is being commercialised globally by Perth based Mining and Process Solutions (**MPS**). The GlyLeach™ process involves the use of Glycine as a lixiviant under alkaline conditions. This process has a number of significant benefits over traditional acid leaching including its environmentally friendly state which is non-toxic to humans and wildlife, the ability to selectively leach valuable metals whilst leaving gangue minerals such as iron, manganese, silicates and carbonates in the leach residue, the ability to leach ores of different oxidation states (depending on process type, temperature, residence time, particle size, etc) and all the while being recyclable as the glycine is not chemically consumed in the overall process.

Results are expected to demonstrate the best process to use for material types found in the Mount Isa / Cloncurry district. A positive project outcome could unlock the possibility for development of Lady Ethleen and a centralised processing hub in the district.

Within a 10 km radius of Lady Ethleen, there are numerous stranded projects that may all be suitable candidates to supply feed to a future operation including Lady Jenny (1 km), Wee MacGregor (3 km), Rosebud (10 km) and Inkerman (7.5 km) as well as several more in the wider district.

A final report on the testwork was received during the quarter. Conclusions are as listed below:

- The use of acid while effective in recovery of base metals, GlyLeach™ extracted more value.
- The amount of acid required would make acid leaching cost prohibitive.
- Grinding and the method of leaching greatly affects the leaching performance across all three composites.
- The oxide composite proved to yield the highest metal recovered of the three composite tested.
- Accountability between the tests were acceptable and shown in the close agreement between the two techniques used to determine the extraction reported.
- There were some difficulties with filtration and adsorption where a hot wash was shown to significantly improve leaching.
- The use of an acid pre-treatment in liberating metals particularly Cu proved necessary.
- The tests demonstrated that the GlyCat™ technology can extract the base and precious metals in a single stage.
- The tests show that the GlyLeach™ process followed by the GlyCat™ process can be utilised in a heap leach situation.
- If left in “as received” sizing, the oxide composite should be treated in agitated leach tanks while the transition and sulphide composite would leach best in a column although would need to evaluate if percolation is an issue on uncrushed material.
- Overall grinding and leaching in the presence of resin would yield the most metal recovered from all three composites.

A series of recommendations were also provided involving additional testwork using larger scale equipment. The Company continues to consider the results and its next steps.

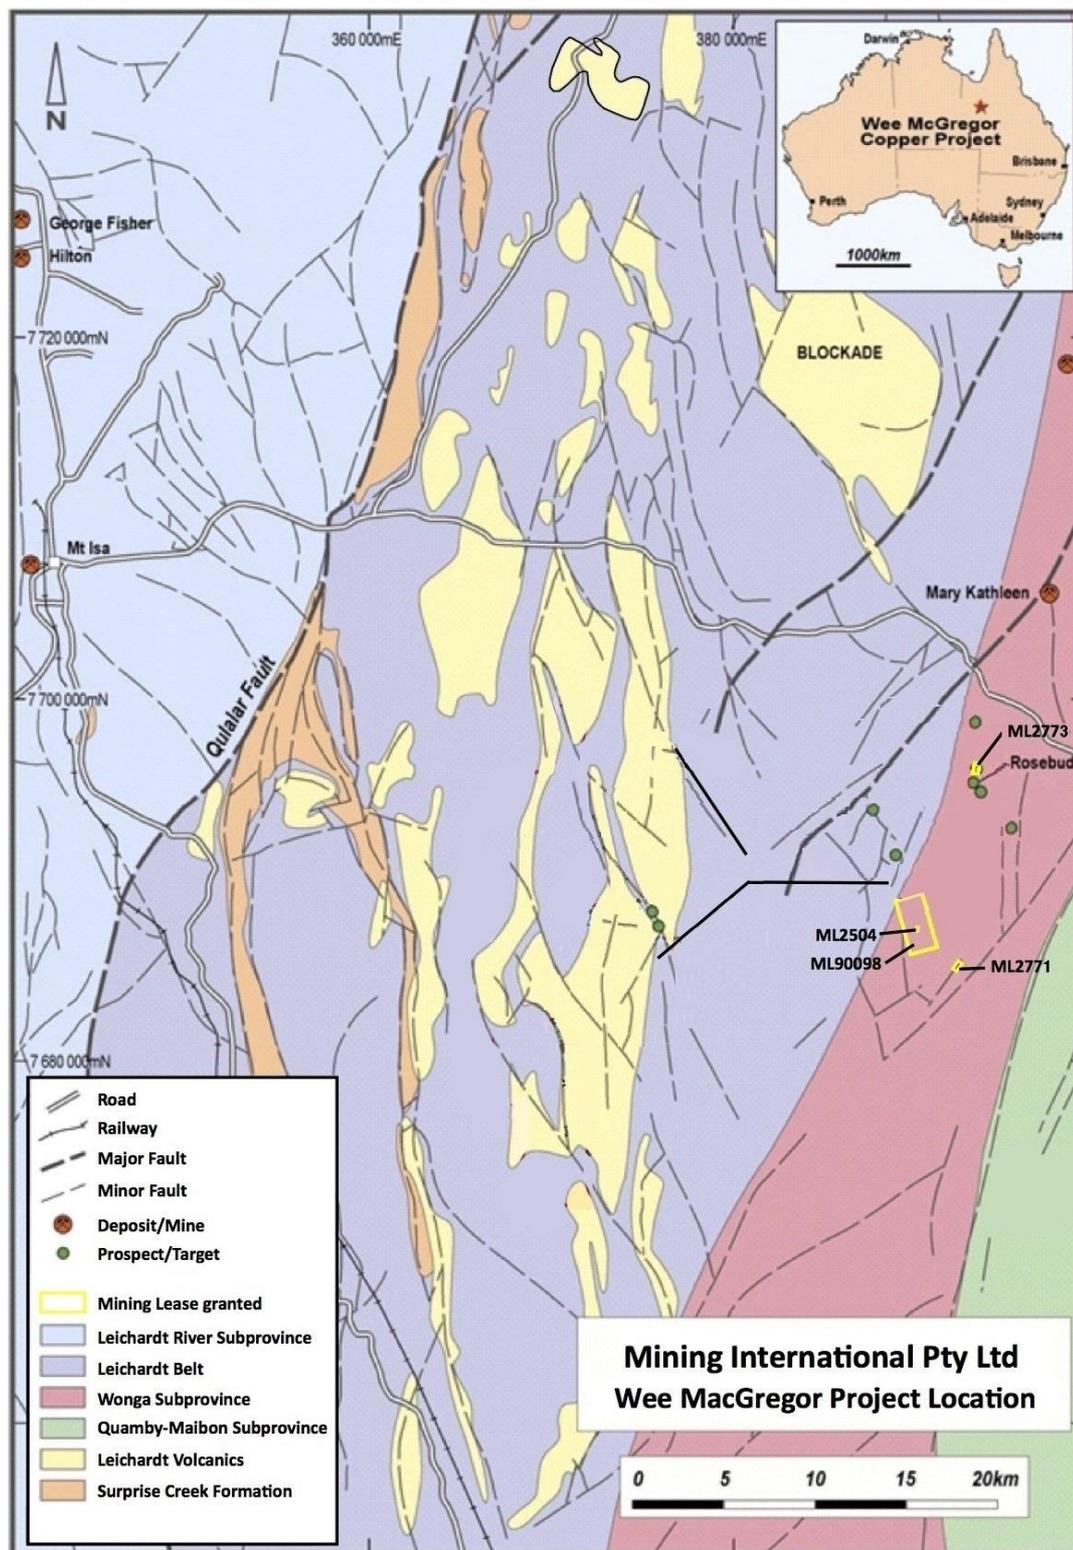

Figure 5 – Wee McGregor Project Location

Yalardy

The Yalardy tenements (E 09/2441 and E 09/2442) cover a combined 297 graticular blocks or a total of 914.5 square kilometers starting approximately 33km east of the Overlander roadhouse near the turnoff to Shark Bay.

No exploration was undertaken during the quarter, with the company assessing the best way to advance the project.

Nickol River Gold Project

The Nickol River Project (**NRP**) (see Figure 6) comprises seven granted Mining Leases (M47/87, M47/127, M47/401, M47/421, M47/435, M47/455, M47/577) and five Miscellaneous Licences (L47/686, L47/687, L47/688, L47/689, and L47/565 (application)) and a Water Licence 177790.

A Program of Work (**PoW**) was approved on 19 January 2022, for the NRP for 18 test pits 20m x 10m by 1m deep over tenements M47/87, M47/401, M47/127, M47/421 and M47/577. Gold nuggets during the quarter were recovered from test pits within M47/577, up to 20.5 grams in weight, refer photo 1 (ASX Release 11 April 2022), for a total of 76 grams.

A SAM survey completed in November 2021, and the subsequent interpretation by Southern Geoscience Consultants (**SGC**) completed early this year, has formed the basis for the location of the test pits. Work on the pit program continued during the quarter on leases M47/421, M47/577 and M47/401. This work has exposed many quartz reefs that were under one to two metres of cover and were previously unmapped. Mapping of these structures will further define the proposed drill program. The structures the test pits were located on appear to be validated and will form the basis for a maiden drill program, to be undertaken later this year.

Cyclone will also continue to assess opportunities to further consolidate the NRP area.

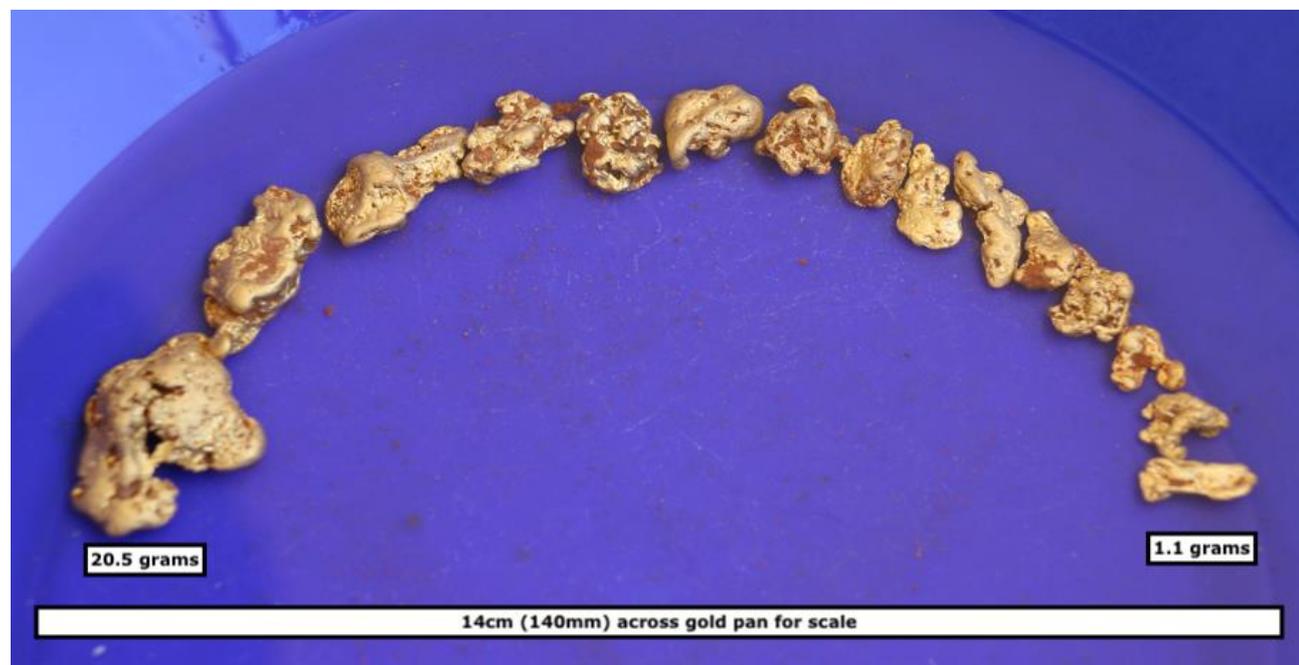

Photo 1: Nickol River Project, gold nuggets recovered and owned by Cyclone, see Table 1 in ASX Release 11 April 2022 for locations.

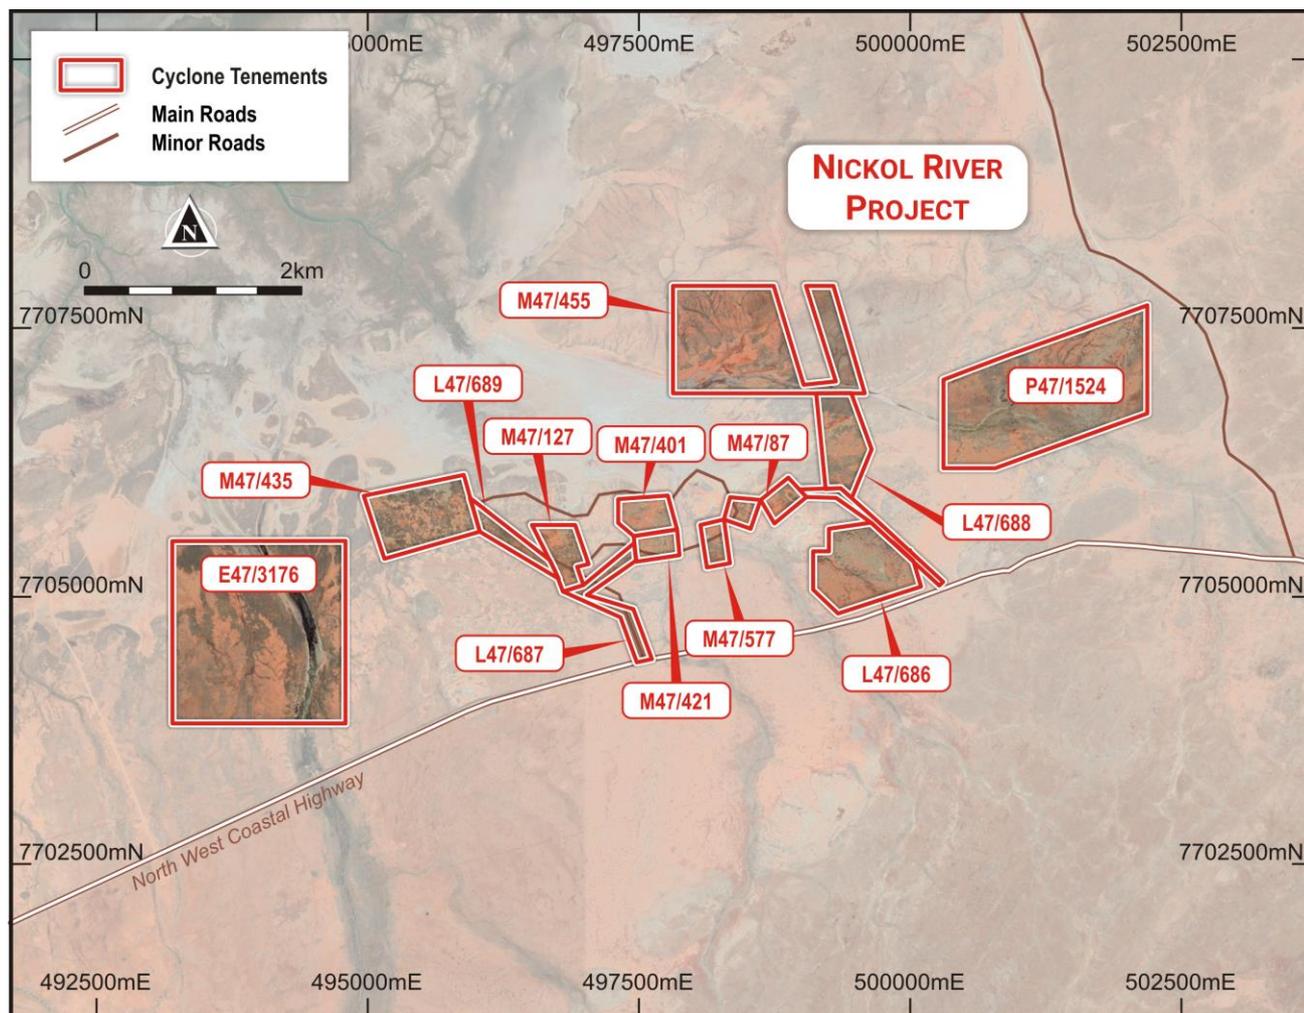

Figure 6 - Nickol River Project location and tenements, located 10km east of Karratha in the West Pilbara of Western Australia

Marampa

Marampa is an iron ore project at the development stage, located 90km northeast of Freetown, Sierra Leone, West Africa (**Marampa** or **Marampa Project**). The Marampa Project includes one mining licence (ML05/2014) comprising 97.40km² and one exploration licence (EL46A/2011) comprising 145.86km².

ML05/2014

In 2014, Marampa Iron Ore (SL) Limited (**Marampa SL**), a wholly owned subsidiary of Cyclone Metals was granted the mining and environmental licences for ML05/2014 (together the **Mining Licence**). The Company has spent circa US\$62.7m on exploration and development to date on the Marampa Project.

In September 2018, Marampa SL received a letter from the Sierra Leone Ministry of Mines (**SLMOM**) cancelling the Mining Licence. In 2018, Marampa SL commenced legal action in Sierra Leone to

challenge SLMOM's decision to cancel the Mining Licence, however, the Board has agreed to place legal action against the SLMOM on hold.

The Company confirms that it does not currently have tenure over ML05/2014. Whilst no formal application has been made to date, the Company has started in Q1/2021, and will continue to be, engaged in dialogue with the relevant Sierra Leonean authorities to have the Mining Licence reinstated or reissued by mutual agreement. Although this dialogue has been restricted significantly during the period by the impacts of COVID-19 on travel and government operations.

However, since Q3/2021 management continued to actively engage with relevant stakeholders at the SL government to fast-track the process for reissuance of the Mining Licence. In January 2021 the Company met with high level company and public officials from Sierra Leone at the Minister of Mines office in Freetown to discuss and propose an investment case for the Marampa Project supported by the attractive iron ore market price and outlook. A formal response regarding the proposal lodged on 14 January 2021 is still pending, despite the Company's consistent follow up. Some ongoing political turmoil makes it difficult to predict when the government will assign the licence.

Whilst there can be no guarantee that the SLMOM will agree to reinstate or reissue a Mining Licence, if Marampa SL were to successfully recover the Mining Licence, the Board is committed to working with the relevant parties to secure access to the necessary plant and equipment and infrastructure to enable the ramp up of the Marampa Project upon the reissuance of the Mining Licence for the benefit of our shareholders as well as, importantly, the Government and People of Sierra Leone.

EL46A/2011

In 2014, Marampa SL was granted exploration license EL46A/2011. In June 2014 the SLMOM extended EL46A/2011 for a further 2-year term from 31 July 2015 until 31 July 2017. Marampa SL has not paid renewal fees to the SLMOM in respect of EL46A/2011 since 31 July 2017. However, Marampa SL has not received any termination documentation or request for information from the SLMOM, therefore is of the view that EL46A/2011 remains a valid license. Marampa SL has contacted the SLMOM asking them to confirm the status of EL46A/2011 however no response has been received to date therefore tenure over EL46A/2011 remains uncertain. Marampa SL will continue to follow up with the SLMOM to determine the status of EL46A/2011. The management of Marampa SL has continued to be active in discussions with SLMOM to fast-track the process getting the EL46A/2011 to be issued again.

The Board confirms that given the inherent uncertainties relating to the future of the Marampa Project, the carrying value of the Marampa Project in Cyclone Metal's audited accounts was fully impaired as at 30 June 2016 and remains fully impaired.

The Company is currently committing minimum expenditure on the Marampa Project and no exploration activities are currently underway at the Marampa Project.

Kukuna

Dempsey Resources Bermuda Limited holds the Kukuna Iron Ore Project located in Sierra Leone (**Kukuna or Kukuna Project**).

The Kukuna Project is located 120 km northeast of Freetown in the northwest of Sierra Leone and consists of one exploration licence (EL22/2012) covering 68km². The licence comprises rocks known to host specular hematite mineralisation. Dempsey has not paid renewal fees to the SLMOM in respect

of Kukuna. However Dempsey has not received any termination documentation or request for information from the SLMOM, therefore is of the view that Kukuna remains a valid license.

The Kukuna Project remains under care and maintenance.

All exploration results for above Mining and Exploration Licenses are kept within the Company.

Announcement authorised for release by the Board of Cyclone Metals.

Competent Person Statement

The information in this report that relates to Wee MacGregor is compiled and collected by Mr Olaf Frederickson, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Frederickson has sufficient experience that is relevant to the style of mineralisation, and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration, Results, Mineral Resource and Ore Reserves (JORC Code 2012). Mr Frederickson consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

The Information in this report that relates to Nickol River Project for exploration results, mineral resources or ore reserves is based on information compiled by Mr Edward Mead, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Mead is a consultant to the company and employed by Doraleda Pty Ltd. Mr Mead has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the 'Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves' (the JORC Code). Mr Mead consents to the inclusion of this information in the form and context in which it appears in this report.

The Information in this report that relates to the Grand Port, New Zealand exploration results, mineral resources or ore reserves is based on information compiled by Mr Allan Younger, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Younger is an employee of the company. Mr Younger has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the 'Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves' (the JORC Code). Mr Younger consents to the inclusion of this information in the form and context in which it appears in this report.

APPENDIX 1 : TENEMENT STATUS

The mining tenements held at the end of each quarter, acquired and disposed of during the quarter and their location:

Tenement reference	Project & Location	Acquired interest during the quarter	Disposed interest during the quarter	Interest at the end of quarter
Kukuna Project - EL 22/2012	Kukuna – Sierra Leone	-	-	100%

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	15,000	1,200
7.4 Total financing facilities	15,000	1,200
7.5 Unused financing facilities available at quarter end		
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	
<p>On 31 July 2019, the Company entered into a Convertible Note Agreement with Winance Investment LLC (Winance) of which A\$1.2m (1,200 convertible notes of which 720 were subject to shareholder approval, which was subsequently received on 11 February 2020) was drawn down on 8 August 2019.</p> <p>The face value of each convertible note is AU\$1,000 and are non-interest bearing. The notes are convertible to a variable number of ordinary shares at the option of the holder of the notes any time after issue. If not converted the notes mature and are repayable twenty-four (24) months after the issue date. The conversion price for each convertible note is the lower of an 10% discount from the lowest VWAP over twelve (12) days prior to the conversion date rounded down to the nearest 100th, provided that the conversion price shall not in any case be lower than \$0.005 (floor price).</p> <p>Further drawdowns of drawdowns of A\$13.8m are at the Company's election available in tranches of A\$500k each upon full conversion of the notes from the previous drawdown, subject to a cooling off period calculated based on the value of the tranche and average trading volumes during the preceding 60-day period and prior approval by CLE's shareholders.</p> <p>Refer to ASX announcement dated 31 July 2019 for material terms and conditions.</p> <p>As at 30 June 2022, Winance had nil convertible notes remaining.</p>		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(908)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(908)
8.4 Cash and cash equivalents at quarter end (item 4.6)	314
8.5 Unused finance facilities available at quarter end (item 7.5)	-*
8.6 Total available funding (item 8.4 + item 8.5)	314
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	0.35
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
* Refer to section 7 for details on further drawdowns on the Winance facility.	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Yes.

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Yes. The Company continues to seek funding options including the raising of additional funds and the realisation of certain of the Company's unencumbered financial assets through the sale of its listed shares (if required).

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Yes. The Directors believe that it is reasonably foreseeable that the Company will continue as a going concern based on the following factors:

- Raising additional funds (as outlined above)
- Realisation of certain of the Company's unencumbered financial assets through the sale of its listed shares (if required)

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 27 July 2022

Authorised by: Board of Directors
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
