Quarterly Activities Report

for the period ending 30 June 2022

West Cobar Metals Limited (ASX: WC1) (“West Cobar”, “the Company”) is pleased to present its Activities Report for the three-month period ended June 30, 2022.

Summary

- Bulla Park Prospect reinterpreted and drill core relogged, with additional prospect identified at Coomeratta South
- Focus is now turning to upcoming exploration at Cawkers Well and Nantilla
- Continued evaluation of additional battery metals projects in Australia and in other tier one jurisdictions worldwide, with a view to adding to asset portfolio

Bulla Park Project ELs 8642, 9195, 9260 and 9281

Bulla Park Prospect

Drilling results to date on the Bulla Park Prospect, 110km west of Cobar in central NSW show that the Company has been unable to replicate or improve the discovery hole (hole 19CA002). The Company has continued work to relog and reinterpret existing diamond drill core in order to identify further drill targets. This work is continuing into the September quarter.

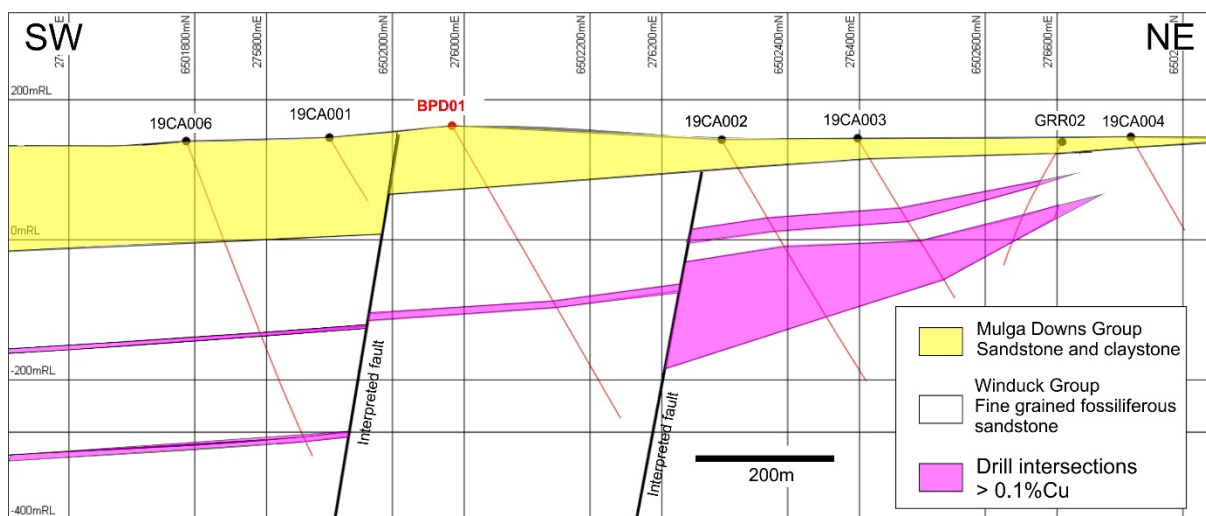

Figure 1: Reinterpretation following drilling of BPD01 (WC1) and relogging of 19CA002 (historical drillhole).

Coomeratta South prospect

The Coomeratta South prospect, 40km south of the Bulla Park prospect within the broader Bulla Park Project, contains anomalous lead and antimony values¹ in stream sediments over an area of 5km by 3km. Recent mapping has delineated an area with anomalous lead (200ppm Pb to 0.15% Pb) in rock chips (non-quantitative portable XRF values) indicated in Figure 2, within an area of Winduck Group fossiliferous sandstone.

Further detailed work to establish drill targets is planned for the following quarter.

Cawkers Well ELs 9197 and 9278

Negotiations with landholders for access to the Cawkers Well prospect, ahead of a planned exploration program, are ongoing. The Company expects to spend the exploration funds at the Cawkers Well project as previously stated¹ notwithstanding the delay.

The Cawkers Well tenement area includes several potentially gold mineralised magnetic linear structures defined by aeromagnetic data, and which correspond to gold in soil sampling results, surface gold occurrences and previous drilling (the extremely sparse historical drilling includes intersections of 8m at 0.84g/t Au in historical RC hole CW003, and 18m at 0.22g/t Au in CW009).¹

Ground surveys and an RC drill program are planned to focus directly on the interpreted mineralised magnetic structures.

Nantilla EL 9179

The base metal/gold targets at the Nantilla Project comprise a gravity high under sedimentary cover which lies west of and adjacent to an interpreted intrusive, and the magnetic rim of the intrusive, containing potential skarn mineralisation.¹

Contact with the relevant landholders is being established with a view to concluding land access agreements before commencing ground geophysics and drilling as planned and as per the IPO Prospectus.

New Projects

During the quarter, West Cobar continued to evaluate battery metals (including lithium, nickel and rare earth element (REE)) projects in Australia and other tier one jurisdictions worldwide, with a view to adding to the Company's asset portfolio.

The projects that have been reviewed to date are at varying stages of maturity, from early-stage exploration to more advanced. The process is ongoing, and the Company will keep the market informed if there is a material development with one or more of the assets.

Corporate

Financial & Related Party Payments

West Cobar had a cash position of approximately \$3.2 million at the end of the quarter.

ASX Listing Rule 5.3.5: Payments to related parties of the Company and their associates during the Quarter totalled \$57k. The Company advises that this relates to non-executive directors' fees, consulting fees and statutory superannuation.

Use of funds

In line with obligations under ASX Listing Rule 5.3.4, the Company provides the following information with respect to its Use of Funds Statement set out in its Prospectus dated 6 August 2021 and its actual expenditure since ASX admission on 1 October 2021.

Expenditure	Funds allocated under Prospectus	Actual 1 Oct 2021 to 30 Jun 2022	Variance	Note
Exploration ¹	\$3,211,000	\$1,383,766	-\$1,827,234	1
Corporate Administration	\$1,327,900	\$527,350	-\$800,550	1
Working Capital	\$371,381	-	-\$371,381	1
Costs of offer	\$589,719	\$462,840	-\$126,879	2
Total	\$5,500,000	\$2,373,956	-\$3,126,044	

¹ For the purposes of the Use of Funds the Company has grouped Exploration

Notes:

- 1 Third quarter of operations as an ASX-listed entity, with a focus on drilling at its Bulla Park and Mount Jack Projects. Exploration was \$250k under spent due to delays on the Cawkers Well prospect due to ongoing negotiations with landholders for access, the Company expects to spend the exploration funds as per the prospectus notwithstanding the delay. The Administration spend was materially as expected.
- 2 Expenses of the Offer paid prior to 1 October 2021 were \$153k giving a total of \$616k. Actual expenses of the Offer are materially consistent with the use of funds budget.
