

A PROGRAMME OF WORK APPROVED AND SITE PREPARATION SET TO COMMENCE AT TRIGG HILL PROJECT

Highlights

- **A Programme of Work (PoW) has been approved**
- **A heritage survey has been completed**
- **Site preparation expected to commence in the second half of August**

Eastern Resources Limited (“Eastern Resources” or the “Company”) is pleased to announce that a heritage survey at Trigg Hill Lithium-Tantalum Project (“Project”) has been completed and a PoW for the Project has been approved, providing clearance for drilling to be undertaken.

Based on mapping and sampling to date, two areas will be the focus of initial drilling:

- The Curlew East LCT pegmatite swarm within an area 1.8km by 0.4km
- The Trigg Hill LCT pegmatites within an area at least 300m by 140m

Earthmoving contractor has been secured to undertake site preparation for the planned initial drilling program at the Project. Site preparation works are scheduled for the second half of August, and drilling activities are expected to commence as soon as a driller is available.

Trigg Hill Lithium-Tantalum Project

The Trigg Hill Lithium-Tantalum Project is located in East Pilbara, Western Australia, approximately 75km SE of Pilbara Minerals Ltd’s Pilgangoora Lithium mine.

The Trigg Hill mine is an old tantalum and tin mine operated during the 1960s and early 1980s. A significant number of pegmatite outcrops were mapped over an area of 3km strike by up to 1.2km in the Project area, including the Curlew East Lithium-caesium-tantalum (“LCT”) pegmatite, which extends for at least 1,800m.

The Company executed a binding Heads of Agreement to acquire 100% interest in the Trigg Hill Project (refer ASX Announcement 4 August 2021).
