---

**OUR ESG FOCUS AREAS  
FY22 HIGHLIGHTS AND FY23 TARGETS**

---

**SUMMARY**

---

**A genuine commitment to decarbonisation is being driven from all corners of our global economy.**

## **Decarbonisation and net zero goals Reaching a tipping point**

### **CONSUMER BEHAVIOUR**

Consumers are increasingly demanding sustainable choices and are allocating household spending accordingly

### **GOVERNMENT POLICY**

Governments are mandating change through clear commitments on emissions, transportation and investment in R&D

### **SUPPLY CHAIN EVOLUTION**

Customers, such as motor vehicle OEMs are increasingly securing continuity of supply for critical metals through direct off-take agreements

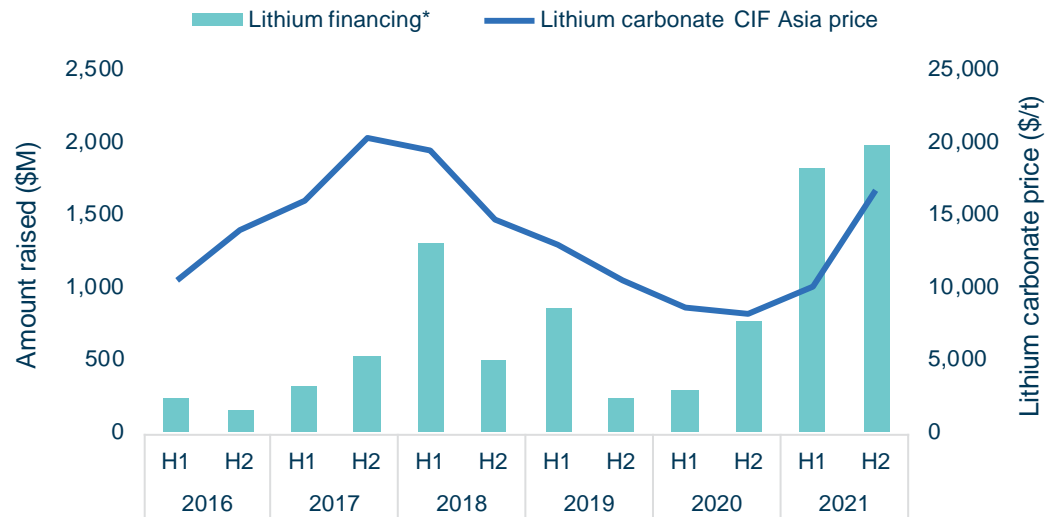

### **FINANCE INDUSTRY**

Investors and lending institutions have clear pricing and policies both, to support sustainability objectives

# Industry Opportunity

## INCREASING DEMAND FOR MINERALS USED IN CLEAN ENERGY TECHNOLOGY

### Lithium financing up 256.7% YOY in 2021

Data as of Jan. 24, 2022

Financing raised by junior and intermediate mining companies. Historical lithium prices refer to Benchmark Mineral Intelligence assessment, min 99.2% Li2CO3; historical cobalt prices refer to the London Metal Exchange cobalt cash price for min 99.8% Co. Sources: S&P Global Market Intelligence; Benchmark Mineral Intelligence; London Metal Exchange

“...S&P expects copper demand will jump from 25 million tonnes in 2021 to 50 million tonnes in 2035; this can be largely attributed to the fact that renewable power and electric vehicle application will need to be in place by 2035 to meet net-zero targets in 2050.”

– JAMES THOMSON AFR, 12 SEPTEMBER 2022

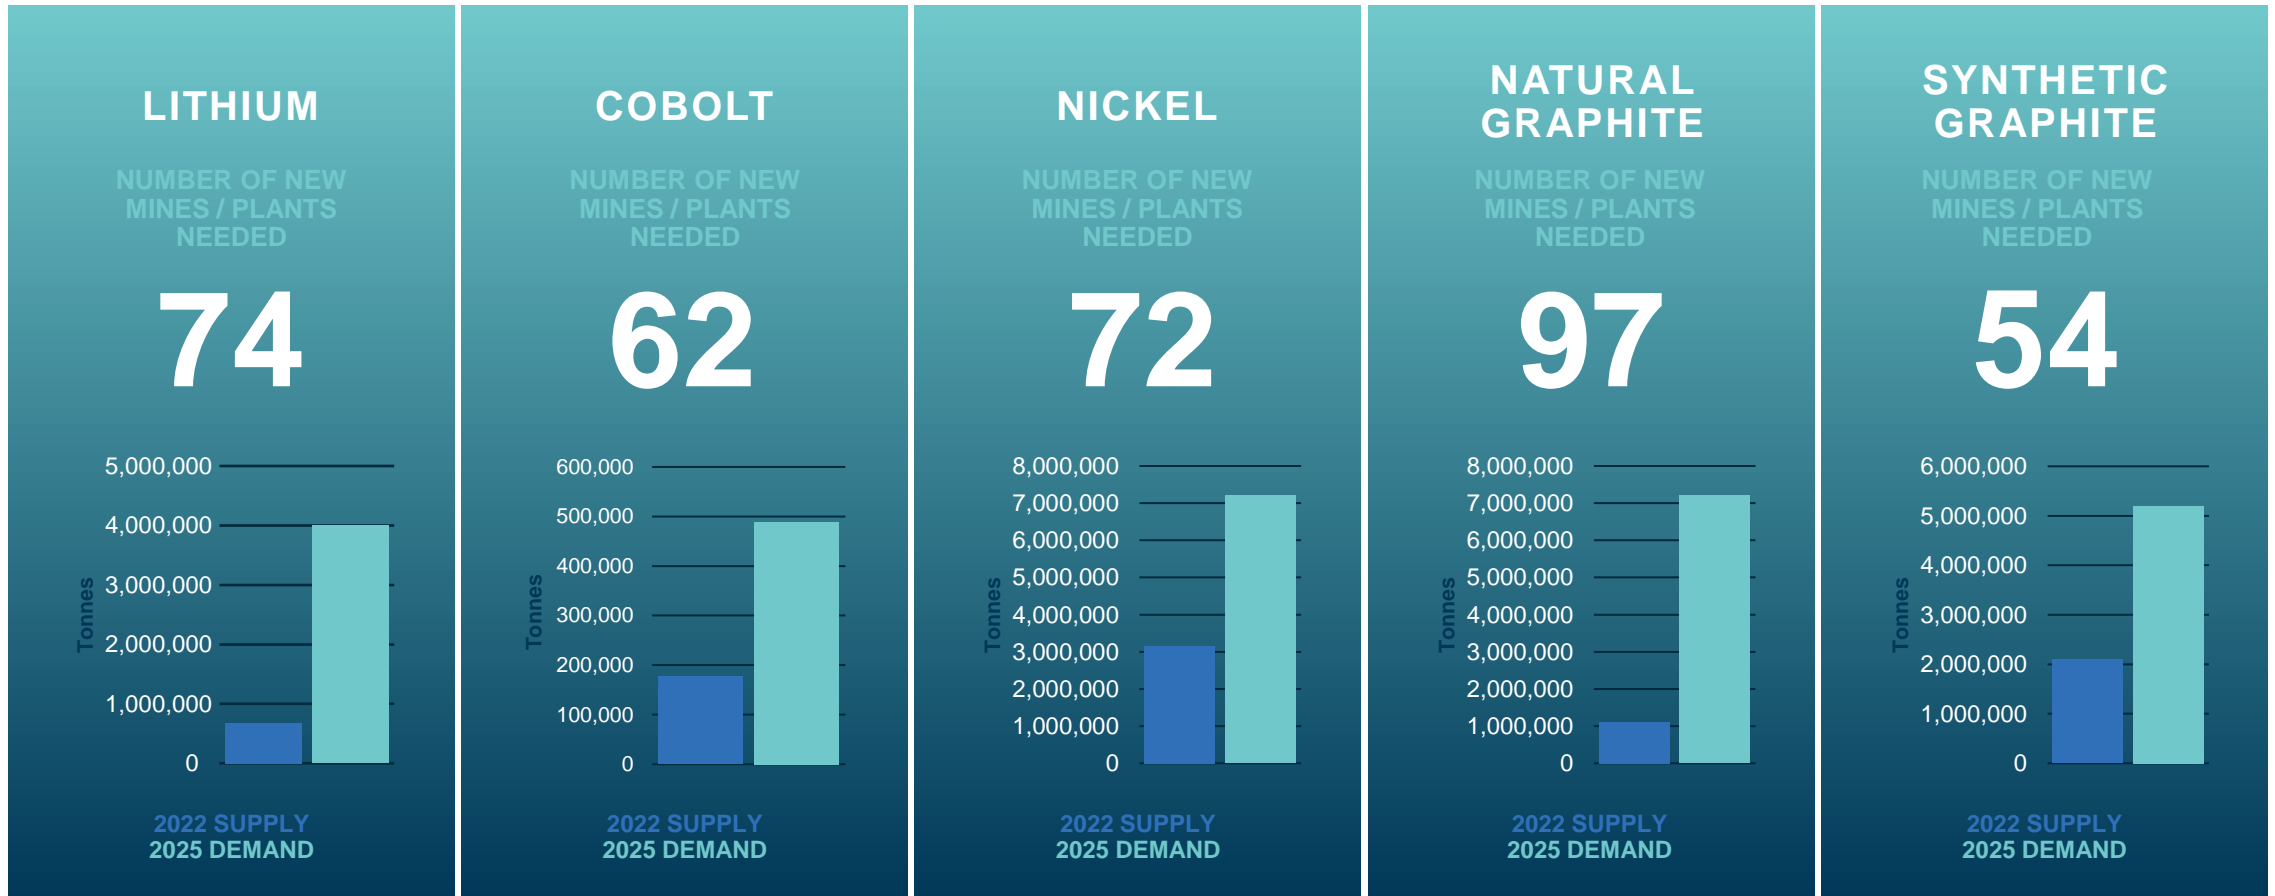

“The resources sector was often considered to be the problem not the solution. Increasingly it is now recognised for supplying the critical ingredients for the transition to cleaner energy. The sector is transforming to meet society’s demand for minerals obtained in a sustainable manner, investing in technology that delivers safety, autonomy and low emission operations.”

– ADRIAN BEER, CEO METS IGNITED, 12 SEPTEMBER 2022

# More Mines Needed

TO DELIVER LONG-TERM DEMAND FOR CRITICAL MINERALS

# Mining Industry Challenge

MINING IN A WAY THAT MINIMISES EMISSIONS

IN ADDITION TO THE CHALLENGE OF ADDRESSING OVERALL SUPPLY FROM NEW OPERATIONS, MINING ALSO HAS THE TWIN CHALLENGES OF MAKING ITS EXISTING OPERATIONS MORE EFFICIENT AND SUSTAINABLE IN THEIR OWN RIGHT

“The mining sector is currently responsible for 4% – 7% greenhouse-gas emissions globally\* and is a major target for governments”

Sources: Anglo American Future Smart Mining Presentation  
\*McKinsey: Climate risk and decarbonization - January 28, 2020

“A plan is not a guarantee. A timely transition to a net-zero future is no sure thing...

With the right tools and technology, with precision-honed policies, and most of all with science on our side, we still have a fighting chance.”

– JOHN DOERR 2021 (Speed & Scale)

# Our Purpose and ESG Approach

“We believe mining is essential  
to every aspect of modern life.  
Our opportunity, indeed our responsibility,  
is to change the global minerals  
industry forever.”

– PAUL HOUSE, IMDEX CEO
