## **INTELCARE EXPANDS DURESS AND EMERGENCY SERVICES WITH ALLCARE PARTNERSHIP**

InteliCare Holdings Ltd (“InteliCare” or the “Company”) (ASX: ICR), an Australian technology company that has commercialised a subscription-based Internet of Things (IoT) and Artificial Intelligence (AI) product for use in the aged care and health industries, is pleased to announce their recent partnership with Allcare.

- InteliCare has partnered with Allcare to provide critical event and duress call assistance to clients.
- The partnership reflects an expansion of services for InteliCare’s current and future clients.
- The smart home security market, which includes alert and duress services, represents an estimated \$658 million sector in Australia.

### **Expansion of services**

InteliCare creates solutions designed to penetrate profitable and expansive markets. Statista estimates the smart home security market, including alert and duress services, represents a \$658 million sector in Australia.

This expansion of InteliCare’s services is a result of a partnership with Allcare, an Australia-based integrator of security systems, medical alarms, assistive health technology, communication integration and surveillance networks for the residential, commercial, industrial, health and aged care sector.

### **Partnership with Allcare**

InteliCare’s trend data and AI platform uses sensors, wearable tech, and alert devices to provide three layers of client intelligence, insight, and protection.

The recent partnership with Allcare provides InteliCare’s aged care and disability clients with access to critical event and duress call assistance.

Allcare’s trained critical event communication teams, a grade a1 response centre based in Australia, can access and triage actions, such as alerting emergency services.

InteliCare clients can activate this service by triggering an emergency alert via wearable devices, such as a pendant, or by hitting an alerting device, such as a panic button. Having access to this service will provide valuable support to family members and care providers and assist in the management of risk.

Allcare’s critical event communication teams can also respond to potential client incidents proactively.

InteliCare's technology will inform Allcare of changes in client behaviour. Upon receiving the notification, such as a failure to arise, Allcare's trained critical event communication teams will investigate the matter and triage as required.

**Dale Lofts, Managing Director, Allcare**, says: "Since 2003 Allcare has provided dedicated security and alert responses to Australians. We are proud to continue and expand this service thanks to the recent partnership with InteliCare."

**Daniel Pilbrow, CEO InteliCare**, says: "InteliCare is committed to the continuous enhancement and expansion of our services and product. The partnership with Allcare demonstrates our proactive approach to improving client experience, while bringing us closer to our mission of keeping Australian's living independently, safely and with dignity."

**ENDS**

**Approved for release by the Board of Directors.**
