

Resignation of Non-Executive Director – Gabriel Chiappini

Tanzanian graphite developer Black Rock Mining Limited (BKT: ASX) (Black Rock or the Company) advises that Non-Executive Director, Mr Gabriel Chiappini, will retire from the Board, effective at the close of business today, 30 September 2022. Mr Chiappini is a founding Director and has been an integral member of the Board since the Company's inception in 2012, having served in both an executive and non-executive capacity during this period.

Mr Chiappini's retirement from the Board comes at a time when the Company is focused on its transition to become a significant graphite producer into rapidly growing clean energy storage and decarbonisation markets. The move is part of the Company's strategic plan and follows recent appointments to transition Mr Chiappini's corporate and commercial responsibilities as he focuses on other business interests.

Black Rock Chairman, Mr Richard Crookes, said:

"On behalf of the Board, I would like to extend our gratitude to Mr Chiappini for his hard work and valuable contribution to the Company over the past decade, where he has played a pivotal role in Black Rock's successful journey from explorer to developer.

We thank Mr Chiappini for his service and wish him well for the future."

The Board has commenced a process to select a suitable replacement for Mr Chiappini, with a focus on complementing existing Board capability with respect to project execution, financing, operations and compliance.

This ASX release was authorised on behalf of the Black Rock Board by:

Richard Crookes, Chairman

About Black Rock

Black Rock Mining Limited is an Australian based company listed on the Australian Securities Exchange (ASX: **BKT**). The Company has an 84% interest in the world-class Mahenge Graphite Project (**Mahenge**) located in Tanzania. Mahenge has a JORC compliant Mineral Resource Estimate of 213m tonnes at 7.8% TGC. It also has Ore Reserves of 70m tonnes at 8.5% TGC. The Ore Reserves support a mine life of up to 350k tonnes of graphite per annum for a reserve life of 16 years. Since the release of the Mineral Resource Estimate, the Company confirms that it is not aware of any new information or data that materially affects the Mineral Resource Estimate.

In October 2018, the Company released a Definitive Feasibility Study (**DFS**) for Mahenge, which was based on strong customer demand. This was enhanced (**eDFS**) in July 2019 (ASX Announcement 25 July 2019), and demonstrates exceptional financial metrics including:

- *Low Capex*: Lowest peak capital expenditure of US\$116M for phase one¹;
- *High Margin*: AISC margin of 63.1%;
- *Low Technical Risk*: Substantial pilot plant operations run of 600 tonnes; and
- *Superior Economics*: IRR of 44.8% with NPV_{10 nominal} of US\$1.5bn (A\$2.1bn²)

Black Rock is completing a Front End Engineering Design (**FEED**) process and re-estimating the capital and operating costs at Mahenge as part of financing process. The costs, process constraints and ESG are currently subject to peer review from an Independent Technical Expert (**ITE**) as part of this process. Black Rock will update the market once the ITE review is complete and updated estimates are finalised.

Black Rock has obtained all Environmental approvals, Mining Licences and its Resettlement Action Plan with clear title to the eDFS project area.

In June 2020, the Company announced a Strategic Alliance with POSCO Group for the development of Mahenge. This included an equity investment of US\$7.5M, signed in February 2021, followed by an offtake agreement, with a US\$10M prepayment facility. In December 2021, Black Rock signed a Framework Agreement with the Government of Tanzania confirming their 16% Free Carried Interest shareholding, agreed to consolidate its Mining Licenses into a Special Mining Licence (**SML**) and committed to jointly develop Mahenge. The SML for Mahenge was awarded in September 2022. The Company is construction-ready subject to financing.

The estimated Ore Reserves and Mineral Resources underpinning the production target has been prepared by competent persons in accordance with the requirements in Appendix 5A (JORC Code).

JORC Compliant Mineral Resource Estimate and Ore Reserve³

Ore Reserves	Tonnes (Mt)	Grade (% TGC)	Contained Graphite (Mt)
- Proven	0	0.0	0.0
- Probable	70.5	8.5	6.0
Total Ore Reserves	70.5	8.5	6.0
Mineral Resources			
- Measured	31.8	8.6	2.7
- Indicated	84.6	7.8	6.6
Total M&I	116.4	8.0	9.3
- Inferred	96.7	7.4	7.2
Total M, I&I	213.1	7.8	16.6

Location of Black Rock's Mahenge Graphite Project in Tanzania
