

Delay in Lodgement of 2022 Financial Statements

Advanced Human Imaging Limited (ASX: **AHI**) (“NASDAQ: **AHI**”) (“the **Company**”) refers to its announcement dated 30 September 2022 and advises that the Company will not be lodging its 2022 Financial Statements until 12 October 2022.

This further delay has been necessary to ensure that all new and existing audit requirements have been completed and will form the basis for the required reporting in the United States of America, following the Company’s successful listing on NASDAQ.

Trading in the Company’s shares will continue to be suspended until the Company can lodge its audited 2022 Financial Statements with the ASX.

This announcement has been approved for release by the Board of Directors of the Company.

About Advanced Human Imaging Ltd:

AHI has developed and patented a proprietary dimensioning technology that enables our partners and their users to check, track, and assess their vital signs and dimensions using only a smartphone both privately and accurately.

Our goal is to assist our partners by empowering their consumers with this capability. This in return gives our partners the ability to assess, assist, and communicate outcomes with their consumers when navigating day-to-day life and the ongoing fight against chronic disease which accounts for 86% of global healthcare costs.

Whether this is a personal journey to better health, understanding the risk associated with physical condition, tracking the changes they are experiencing through training, dieting, or under medical regimes, or simply wanting to be correctly sized for a garment when shopping online. The AHI technology delivers this seamlessly, privately, and cost-effectively in only a few minutes.

Our partner benefits from our software as a service pricing solution, that reduces with scale. Integration is made easy with the AHI modular system, based on multiple software development kits (SDKs), allowing a partner to select the functions, measurements, and displays to suit their individual needs.

AHI has developed this capability by leveraging the power of Computer Vision, Machine Learning, and patented algorithms, to process these images on secure, enterprise-level infrastructure, delivering an end-to-end experience that is unrivalled in the industry. AHI simplifies the collection of measurements and removes the human error present in traditional methods.
