

ASX ANNOUNCEMENT

19 October 2022

ChemX Appoints Alwyn Vorster as Non-Executive Director

- **Experienced Executive Alwyn Vorster appointed as Non-Executive Director**
- **Mr Vorster was previously Managing Director of BCI Minerals Ltd and Iron Ore Holdings Ltd**
- **Experience across the total mining value chain in multiple commodities**
- **A proven track record of project development, corporate transactions and leadership**

ChemX Materials Ltd (ASX:CMX) (ChemX or the Company), a materials technology company focused on providing the critical materials required for electrification and decarbonisation, is pleased to advise that it has appointed Mr Alwyn Vorster as Non-Executive Director of the Company.

Mr Vorster has held various directorships over the past 12 years and was most recently Managing Director of ASX-listed BCI Minerals Ltd. He was also formerly Managing Director of Iron Ore Holdings Ltd and Non-Executive Director of Volt Resources Ltd and held management positions in several mining and resources companies, including Aquila Resources Pty Ltd (Head – Iron Ore and Manganese) and Rio Tinto Iron Ore (Regional Manager – China).

ChemX Chair, Kristie Young commented: “We welcome Alwyn Vorster to the ChemX Board as a Non-Executive Director. He has extensive commercial, marketing, and operational capability along with deep experience in project delivery. Mr Vorster’s skills will be invaluable as the Company seeks to accelerate the development and value add initiatives of its projects.

The appointment of Mr Vorster is an important step in our journey. ChemX welcomes Alwyn and recognises the need to continue to add experienced personnel with a track record of delivery in exploration and mining projects. Alwyn brings this, along with proven leadership and commercial acumen built up over a long career at the forefront of the minerals industry.”

Subject to shareholder approval Mr Vorster will receive 1,500,000 Performance Rights on the same terms as those proposed for fellow Non-Executive Directors Ms Kristie Young and Mr Warrick Hazeldine at the forthcoming Annual General Meeting. An addendum to the Notice of Meeting will be issued in due course.

This Announcement has been authorised for release by the Board.

About ChemX Materials (ASX: CMX)

ChemX is a materials technology company focused on providing critical materials required for electrification and decarbonisation. The Company's vision is to support the energy transition with materials and technology that provide real solutions to lowering carbon emissions.

Developed in-house, ChemX's HiPurA® Process is a unique technology that is capable of producing high purity alumina (HPA) and high purity aluminium cathode precursor salts for lithium-ion batteries. Initial testwork has indicated that the process is low cost and low in energy consumption, compared to alternative technologies. A key competitive advantage is that the HiPurA™ process is not tied to mine production, with the feedstock being a widely available chemical.

The Company has projects in South Australia and Western Australia.

The South Australian Eyre Peninsula projects include the Kimba Kaolin-REE Project and the Jamieson Tank Manganese Project. The ChemX HiPurA™ Project is located in Western Australia.
