Successful Completion of Field Exploration: Kookynie Gold Project

Highlights:

- **Successful completion of first pass auger soil geochemical program and regolith mapping across Reach Prospect, Niagara North and Niagara West tenements.**
- **Completed within schedule and budget.**
- **Samples submitted to laboratory for assays due in coming months.**

Regener8 Resources NL (ASX: R8R) (**Regener8** or the **Company**) is pleased to announce the completion of the first pass auger soil geochemical program and regolith mapping at the Kookynie Gold Project in Western Australia. The program was undertaken on Regener8's Reach Prospect, Niagara North and Niagara West areas.

Gyro Australia undertook the augering campaign under the supervision of CSA Global, within schedule and budget, zero safety incidents and in a low impact manner that required no vegetation clearing.

Figure 3: Campaign Team at Morapoi Station Homestead (L to R): Connor O'Callaghan (Gyro Australia), Adele Bonney (Morapoi Station), Carl Brauhart (CSA Global), Greg Stubbs (Morapoi Station), Jake Turner (Gyro Australia)

Samples from the field campaign have been delivered to the laboratory and scheduled in for assays, which results are anticipated to be received in 2-3 months.

The program results and mapping will be combined with airborne survey results to undertake integrated interpretation, within a mineral systems framework to develop and confirm target prioritisation for planning of the Phase 1 drilling campaign.

Managing Director, Stephen Foley, comments: *"We are proud of the safe and successful completion of our maiden field campaign at the Kookynie Gold project. This is thanks to the hardworking and productive team from Gyro Australia and CSA Global with great support from Morapoi Station. Regener8 could not have asked for more from this team and are very appreciative of their efforts. We now look forward to receiving assay results from the program and planning the drilling campaign for 2023."*

About Regener8 Resources NL

Regener8 Resources NL (ASX:R8R) listed on the Australian Securities Exchange Friday, 8 July 2022 and acquired the Kookynie Gold Project from GTI Energy Ltd (ASX:GTR).

Regener8's Kookynie Project is located in the Kookynie district of Western Australia, approximately 150km north of Kalgoorlie and 55km south of Leonora. This historically productive region has produced over 500,000oz* and has undergone a revival of activity in recent years, with encouraging resource growth and exploration results by neighbours such as Genesis Minerals, Iris Metals, Carnavale Resources and Metallicity.

Regener8 intends to investigate its underexplored tenements located in the heart of this district, with a view to adding value, whilst traversing lightly on country and in a climate sensitive manner.
