

September 2022 Quarterly Activities Report

Albion Resources Limited (ASX: ALB) ("Albion" or the "Company") is pleased to provide the following summary of activities conducted over the September 2022 quarter, which largely focused on systematic exploration at the Company's 100% owned Lennard Shelf in WA.

Lennard Shelf Project:

Albion's Lennard Shelf Project is located in the world class Mississippi Valley type Zinc-Lead province, the Lennard Shelf, approximately 30 km southeast of Fitzroy Crossing in the Kimberley, Western Australia. Despite hosting significant historic mines, Pillara (19.3Mt @ 7.8% Zn + 2.6% Pb) and the Cadjebut Trend (16.4Mt @ 8.9% Zn + 5% Pb), regional exploration in the Lennard Shelf Province has been largely overlooked since the late 1980's. The Lennard Shelf Project, comprising three sub-projects, covers an expansive area of ~319 km² and contains comparable geology to Pillara and the Cadjebut Trend.

Recent Activities

Following the 2021 drill program, the Company identified two target areas for field investigation: 1) The western extension of the Uncle Billy Fault at Pillara East; and 2) the north striking faults in the vicinity of the Goongewa Zn-Pb mine at Prices Hill. During the September 2022 quarter, the Company undertook a field visit to review these two target areas.

Uncle Billy Fault – Pillara East

The 2021 diamond drilling program at Pillara East tested the Uncle Billy Fault north of Bobs Bore over a strike extent of approximately 400m and confirmed near surface zinc-lead mineralisation (refer to ASX announcement dated 31 January 2022). GSWA mapping shows that the fault extends further to the west across the Home Range (Figure 2).

During the quarter, Albion technical staff examined the western extension of the Uncle Billy Fault to determine whether any of the faults seen and drilled in 2021 on the eastern side, continue across the ranges.

The findings noted that whilst the western extension of the Uncle Billy Fault was present, there was abundant granite and schist outcrop forming the foundation for the Pillara limestone above. The presence of the granitic basement downgrades the area for significant mineralisation potential, as any limestone present near the Uncle Billy Fault would likely be very thin.

The yellow oval shows the area inspected at the western extension of the Uncle Billy Fault in July 2022. The grid is 2x2km.

North striking faults - Prices Hill

Prices Hill is an area of outcropping Devonian Pillara Formation with strong geochemical responses in stream sediment sampling. Albion identified the area as prospective due to north striking faults, which form a structural transfer zone between two major north-west striking faults (Pillara and Home Range).

Albion technical staff inspected the core of historical drillhole PHD2 at GSWA core yard and noted that the sandstone rich intervals of the Gap Creek Formation would not make suitable aquitards against mineralisation fluids. As such, it was formulated that prospective exploration targets at Prices Hill are likely to only occur where Emanuel shales are in the footwall of the north striking faults, as they would form an ideal seal to mineralising fluids.

A field visit was subsequently completed during the quarter to assess several transfer zone faults occurring in outcropping Pillara Formation limestone (Red circle, Figure 3). The findings noted that fault complexity was present, with many of the transfer zone faults containing breccias, fracture networks, and often abundant ferruginous material, highlighting that faults where Pillara Formation limestone is in the hanging wall and Emanuel Formation is in the footwall are potentially valid drill targets.

Leinster Project:

The Leinster Project, located 30km southeast of Leinster, covers an area of 42km² and is prospective for nickel-copper being located along strike from Auroch Minerals the Horn and related Ni-Cu prospects and adjacent to BHP's Nickel West Weebo Ni deposit.

Recent Activities

No work was undertaken on the Leinster Project during the quarter.

Mongers Lake Project:

The Company has applied for the Mongers Lake Project, comprising tenement applications E59/2576 and E59/2641 (Figure 5). The project covers the northern extents of the Retaliation Greenstone Belt located between the Mt Gibson and Rothsay Gold Projects, in the prospective Yalgoo region of Western Australia. The Company advanced its access agreement negotiations during the quarter and subsequent to quarter end received confirmation that E59/2576 was granted. Whilst the Company is not aware of any reason why E59/2641 will not be granted in due course, investors are cautioned that there is a risk the exploration licence will not be granted.

Corporate:

Cash on hand as the end of the quarter was \$2.3M. Albion continues to assess other opportunities as they are presented with a view to adding to the discovery potential within the Company's portfolio of projects. Subsequent to quarter end, Steven Formica and Julian Jarman were appointed to the Board as Non-Executive Chairman and Non-Executive Director, with Colin Locke and Mark Major resigning.

Related Party Payments

Pursuant to item 6 in the Company's Appendix 5B – Quarterly Cashflow Report for the Quarter ended 30 September 2022, the Company made payments of \$61k to related parties which relate to existing remuneration arrangements (director fees and superannuation).

Exploration

ASX Listing Rule 5.3.1: Exploration and Evaluation Expenditure during the Quarter was \$76k. Full details of activity during the Quarter are set out above.

ASX Listing Rule 5.3.2: There were no mining production and development activities during the Quarter.

In line with obligations under ASX Listing Rule 5.3.3, Albion provides the following information with respect to its Mining Tenement holdings as at 30 September 2022.

Competent Persons Statement

The information in this announcement is based on and fairly represents information compiled by Mr Nigel Wilson, geologist, who is a Member of the Australian Institute of Geoscientists and employed by Albion Resources Ltd, and is an accurate representation of the available data and studies for the Project. Mr Wilson has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he has undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Wilson consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

The information in this announcement that relates to historical exploration results was first reported by the Company in its IPO prospectus dated 18 March 2021. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Prospectus. Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
