

QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDING 30 SEPTEMBER 2022

HIGHLIGHTS

- Pure's maiden drill programmed return result of 1.38% Ni
 - A significant 1.8km geochemical anomaly was identified to be targeted with follow-up drill testing.
 - Completion of Loyalty Option Issue to raise \$17,256.17 (before costs).
-

Pure Resources Limited ("Pure" or "Company") is pleased to provide the following report on its activities during the quarter ending 30 September 2022. The Company's primary focus during the reporting period was the reconnaissance sampling and maiden drill program at its Yundamindra Project (the "Project").

The Company completed a non-renounceable entitlement issue of options to eligible shareholders ("**Loyalty Options**"), as detailed in the Prospectus dated 25 August 2022 and announced to the Australian Securities Exchange ("**ASX**") on the same date ("**Offer**") raising \$17,256.17 (before costs).

Pure's Executive Chairman, Patric Glovac, commented:

"During the quarter, Pure focused its exploration activities on the Yundamindra Project, which included reconnaissance sampling of the project that was followed up by the Company's maiden drill program. The results of both programs were released after the quarter's end and were both promising and warranted follow-up exploration."

"To thank the loyalty of Pure's shareholders since the Company's listing on ASX, the Company completed a Loyalty Option Issue that was strongly supported by the shareholders. I would personally like to thank the shareholders of Pure for their ongoing loyalty and support."

Yundamindra Project

The Project consists of two tenements (E39/2251 & E39/2254) prospective for Kambalda Style nickel, and orogenic gold mineralisation (Figure 1). E39/2251 shares the same rock types and sits directly south, along strike, from the Eucalyptus Bore Ni-Co Project which has an Ore Reserve of 32.2 Mt @ 0.91% Ni & 0.06% Co. Concerning the gold potential, numerous prospects and historical workings occur both within greenstone and granite lithologies. Gold mineralisation is shear related and hosted by relatively high-grade auriferous quartz veins.

During an initial site visit conducted in August 2022, ten rock chip samples were collected from outcropping ultramafic rocks at the Project (Figure 2) to validate the potential for near-surface nickel mineralisation. Due to the presence of komatiitic rock types, which are essential for the development of Kambalda Style nickel deposits, the Company believes

there is the potential for lateritic and sulphide-hosted nickel-cobalt mineralisation. During the fieldwork, geologists observed wide areas of outcropping to sub-cropping ultramafic rocks, in parts covered by a thin veneer of transported colluvium.

The reconnaissance sampling of outcropping ultramafic rocks returned promising nickel values of 0.35% Ni (PRRK07), 0.31% Ni (PRRK08) and 0.29% Ni (PRRK09) (Table 1).

Pure followed up the initial soil sample with the Company's maiden drill program in September, which consisted of 1,171 auger drill holes. The program returned multiple assays >1% Ni (Table 2) with a peak assay of 1.38% Ni. The results from the auger campaign have highlighted a contiguous geochemical anomaly (>2,650ppm Ni, 90th percentile) that extends north-south over 1.8km (Figure 3). Additionally, the auger drilling has identified multiple, discrete nickel anomalies or 'hot spots' within broader geochemical haloes.

The auger results validate that there exists the potential for near-surface nickel mineralisation and the Company will now test the potential for lateritic and sulphide-hosted nickel-cobalt mineralisation.

Corporate Activity

During the quarter, the Company announced the completion of its non-renounceable entitlement issue of Loyalty Options to eligible shareholders, as detailed in the Prospectus dated 25 August 2022 and announced to the ASX on the same date.

The Company received valid applications for 17,256,092 Loyalty Options, raising a total of \$17,256.17 (before costs) under the Offer. A total of 1,493,913 Loyalty Options ("**Shortfall Options**") were placed at the discretion of the Board raising a further \$1,493.91 (before costs) following the September quarter.

Cash

The Company's consolidated cash at hand was \$4,026,748 as of 30 September 2022 with no debt. The majority of the expenditure was on Exploration and Evaluation (\$120,677), Staff costs (\$30,436) and Admin and Corporate costs (\$50,407). This information is presented in the Quarterly Cashflow Report ("**Appendix 5B**").

COVID-19 Update

Pure is continuing to review updates in relation to the COVID-19 pandemic and potential impacts on its exploration programs, drill schedules, health and well-being of its employees, contractors and other stakeholders. The Company has operational procedures and guidelines in-line with official health advice including vaccination requirements and government directives, which can be modified in response to changing conditions.

Pure is an active explorer and continues to progress its work programs subject to travel restrictions that may be enforced.

September Quarter ASX Releases

During the quarter, no project-related announcements were made. However, exploration activities were performed on the Yundamindra Project. The results of which were announced after 30 September 2022 and are listed below:

- 17 October 2022 - Widespread Outcropping Surface Nickel - Yundamindra Project
- 20 October 2022 - 1.38% Ni Drill Hit & 1.8km Geochemical Anomaly Identified

Project Generation

Throughout the quarter, the Company received several new project opportunities and only conducted high-level internal assessments. The Company will continue to assess any projects that are complementary to its business.

Key Activities Planned for the December 2022 Quarter

During the December 2022 quarter, the Company plans to:

- Complete aerial gravity and electromagnetic surveys over key target areas, specifically the Killarney Project.
- Community engagement with Traditional Owners, pastoralists and local stakeholders to facilitate Land Access and sustainable exploration.

ASX Additional Information

1. **ASX Listing Rule 5.3.1** – Mining exploration activities and investment activity expenditure during the quarter was \$120,677. Full details of the activity during the quarter are set out in this report.
2. **ASX Listing Rule 5.3.2** – Mining production and development activity expenditure for the quarter was nil and there were no substantive mining exploration activities for the quarter.
3. **ASX Listing Rule 5.3.3** – Tenement Schedule – Refer to Appendix 1 for details of the Company's tenements as of 30 September 2022.
4. **ASX Listing Rule 5.3.4** – The Company provides the proposed vs actual Use of Funds as outlined in Section 3.7 of the Prospectus dated 24 January 2022.

Proposed Use of Funds	Proposed \$	Actual \$	Variance
Exploration of Company Projects	2,550,000	147,677	Timing
New Project Evaluation	400,000	-	Timing
Cash reimbursement to Project Vendors	55,471	55,471	-
Expense of the offer	503,500	545,670	Higher Legal Fees
