ABOUT ELMORE

Elmore is an ASX listed contract mineral processing and development company which employs mobile plant and equipment, allowing the company to generate meaningful financial returns via the development of niche orebodies and mining projects.

The company has access to deep technical expertise, allowing Elmore to provide geological, metallurgical & process engineering, OH&S, mechanical and mining engineering consulting services and advice to the mining industry.

Elmore owns 100% of the NT-based Peko magnetite mining operation. Elmore acquired Peko after 12 months of work to design, build and commission the project's mining and processing operations as a contractor. Whilst Peko will initially focus on producing an iron magnetite product, the Elmore team plan to utilise wholly owned plant and equipment to produce copper, cobalt and gold from a tailings deposit at the Peko operations.
